

Lesson One

PREPARING A PRESENTATION

Lesson objectives

- To explore the key ideas of the chapter
- To understand more about our decision making and choices
- To work in a group on a collaborative research and planning task

Getting you thinking...

Look at the school canteen breakfast menu on your worksheet.

What items would you select from the menu if you had £1.00 to spend each day?

What would influence your choice:

- The cost of each item
- Whether or not it was healthy
- Your own dietary requirements, such as your faith or any allergies?

Understanding the key ideas of the chapter

Make a list of the decisions you have had to make so far for yourself today.

Think about:

- Getting up
- Your journey to school
- Your school day so far

Jot down your thoughts in your notebook.

Think/Pair/Share

1. Working with a partner reflect on the extract from chapter one
2. Use the discussion prompts on the worksheet to help you explore the key ideas from this section of the chapter
3. Make notes on your thoughts and ideas and prepared to feed back in a whole class plenary

Is price everything?

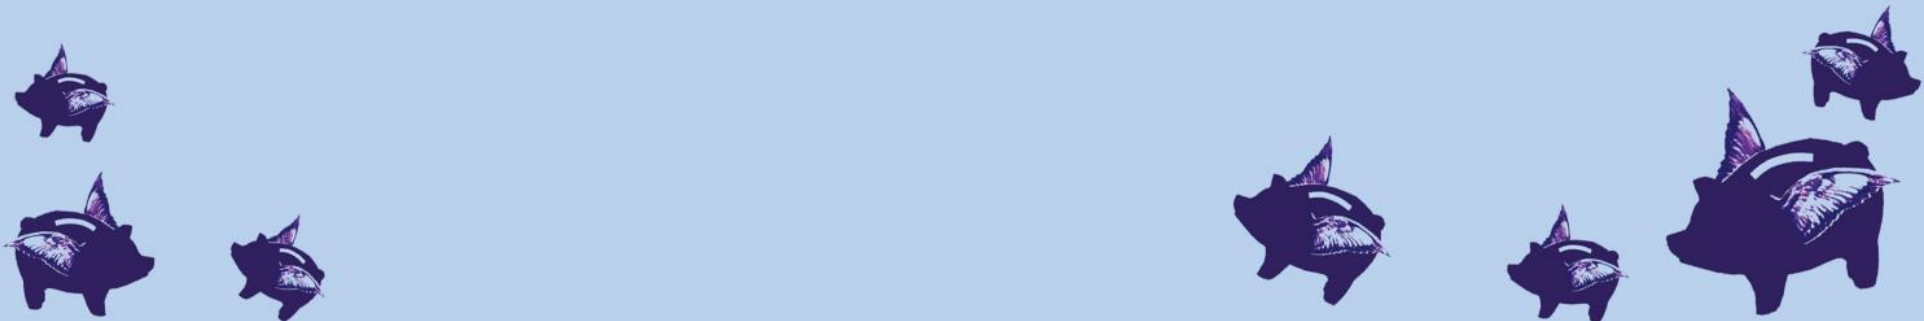

Group research and planning task

Your headteacher has agreed to fund a rewards trip for your year group following exceptional behaviour and results in the academic year. They have allocated a budget of £20 per pupil.

In your teams, create and present a proposal for this trip. You have decisions to make based on:

- The budget for the trip and whether everyone would be prepared to/able to pay an additional fee or not
- Where you can feasibly travel to in the day and how you will travel
- Whether you will include food and drinks
- What kind of trip would offer something enjoyable for everyone
