

# Bank of England PRA

## Notes on submitting the Pillar 2 data items: FSA071 to FSA082

Firms should submit their Pillar 2 data through their usual secured email system to [PRAPillar2Capital@bankofengland.co.uk](mailto:PRAPillar2Capital@bankofengland.co.uk). This mailbox replaces the previous [PRAPillar2Capital@bankofengland.gsi.gov.uk](mailto:PRAPillar2Capital@bankofengland.gsi.gov.uk) address, as the 'gsi.gov.uk' domain has officially been de-commissioned.

They should not 'password protect' the email or document, 'zip' the file and embed the file in any other document. Queries on the data items should not be sent to the secure email address, but submitted to the line supervisor in the usual way.

For data items FSA071, FSA076, FSA077, FSA078, FSA079, FSA081, and FSA082, firms should submit their complete data items in an XML format. Firms may choose between the following methods for generating the XML:

**Method 1:** a firm can automate the outputting of the data from its own system by requesting an XSD file from its line supervisor;

**Method 2:** if a firm wishes to output the data manually, it should use the updated data items proposed in the [Supervisory Statement](#). Once completed, the firm should right click any of the cells in the template and select 'XML' > 'Export'. Alternatively, the firm can click on the 'Export to XML' tab on the ribbon, and select 'Export' to export an XML file.

Firms should not insert any additional rows or columns into the XML files. In addition, comment boxes are limited to 255 characters. If firms have additional comments to accompany the templates, these should be submitted separately to the PRA via electronic means.

All validation errors should be cleared before submission to avoid rejections of the data submission.
