
1. Introduction

Maintaining confidence in the currency requires that cash users trust the physical integrity of the Bank of England’s banknotes. In support of this and following a review of current practice, the Bank has decided to publish a new voluntary framework document for the testing of automatic banknote handling machines with counterfeit notes and with genuine notes of varying fitness levels. The framework will set minimum standards, which manufacturers of such machines will be able to demonstrate that their machines are capable of meeting.

2. Objectives.

2.1 To check that models of automatic banknote handling machines sold for use into the UK market do not give value for counterfeit notes and where these machines also check fitness, to test that they are capable of separating fit notes from unfit according to minimum standards set by us.

2.2. To test example models of machines, at least annually, to verify that they continue to meet the minimum standards set.

2.3 To facilitate these objectives we will:

(a) Check that machines accept genuine banknotes of a range of fitness levels.
(b) Check that machines either reject or separate any suspect banknotes from genuine notes depending on their end use/functionality.
(c) Check that machines used for fitness sorting and localised recycling are capable of differentiating fit notes from unfit notes according to minimum standards set by us.
(d) Check that, where appropriate, customer information relating to the deposit of counterfeit banknotes is retained for customer operated business machines.

Further details of the tests are set out in Section 7 and Appendix 1.
3. **Scope**

3.1 Tests will be carried out on banknote handling machines that accept banknotes issued by the Bank of England only. Only banknotes issued by the Bank of England will be used in tests and references in this framework to “notes” or “banknotes” are to banknotes issued by the Bank of England.

3.2 Manufacturers of banknote handling machines described in Section 3.3 below, including manufacturers of host machines incorporating another manufacturer’s authentication device, will be permitted to submit machines for testing. Agents, suppliers or distributors are not eligible to submit machines for testing, but the Bank may, at its discretion, extend testing to a supplier or distributor that is officially nominated by the Manufacturer, such nomination to be confirmed by the Manufacturer, if the Manufacturer is based outside the United Kingdom and cannot participate in person.

3.3 The following types of banknote handling machines are eligible for testing (and for the purposes of this framework are referred to as “machines”):

(a) Point of sale machines (manual or automatic insertion) where an automatic indication is made that a suspect banknote is identified.
(b) Desktop note counters with authentication sensors.
(c) Desktop fitness sorters with authentication sensors.
(d) Note acceptors/bill validators (single note readers).
(e) Business machines (bunch note acceptors, customer self service and teller assist).
(f) Recycling machines (note accepting and recycling and those that also fitness sort).
(g) Medium speed note sorters (around 10-15 banknotes per second).
(h) High speed note sorters (around 40 banknotes per second).
(i) Recycling machines for anonymous customer transactions.
(j) Any other machines where the machine differentiates between genuine and counterfeit and/or fit and unfit notes without human assistance.

3.4 The following types of banknote handling machines are not eligible for testing as part of this framework:
(a) Equipment where a person makes a judgement about whether a note is suspect, e.g. magnifying equipment, UV lamps, IR viewers, felt-tip detector pens.

(b) Automatic Teller Machines (ATM’s) that dispense only without authentication.

(c) Equipment not CE marked (European Safety Directive).

(d) Equipment not intended to handle Bank of England banknotes.

4. **Conditions for participation in the testing framework**

4.1 Each manufacturer wishing to take part in the framework shall enter into a bilateral agreement with the Bank before testing commences in respect of a machine. The form of the agreement includes provisions, among others, in respect of confidentiality, the publication of test results by the Bank and a disclaimer of liabilities. This framework document and the agreement shall together form the terms and conditions applicable to manufacturers in respect of their participation in the testing framework. This framework may be revised or amended by the Bank at any time. The Bank will endeavour to give notice of any amendment but reserves the right to introduce amendments with immediate effect if necessary.

4.2 Admission to the framework is conditional on manufacturers submitting certain information on the equipment to be tested before testing takes place. The information required to be submitted is available on request. If the manufacturer is not able to disclose the information required because of confidentiality obligations that it might have to a supplier then the Bank would engage directly with that supplier to receive this information prior to testing taking place. Information shared with the Bank will be considered confidential unless otherwise indicated by the manufacturer. We will however seek permission to publish information required as part of the publication of test results described in Section 8 and Appendix 2.

5. **Scheduling**

5.1 The Bank aims to accommodate testing as quickly as scheduling will allow on a first-come–first-served basis. We will notify manufacturers when a particular machine is scheduled for an annual re-test and the manufacturer should then contact the Bank to schedule a re-test within eight weeks of the date of such notification. The Bank reserves the right to remove the results in respect of a machine(s) from the list of test results published on the Bank’s website if the manufacturer of that machine does not re-schedule the annual re-test within this time frame.
5.2 If a machine fails a test, the manufacturer should schedule a re-test as soon as practicable and the Bank will accommodate the re-test as soon as a free slot becomes available. The Bank reserves the right to remove the results in respect of a machine(s) from the list of test results published on the Bank’s website if the manufacturer fails a test, until such time that it passes a re-test.

5.3 In addition to the above, manufacturers can re-submit their machines at any time, for example following an update to their software, subject to there being available slots in the testing schedule and subject to paragraph 6.2 below.

6. **Location, duration and cost of testing**

6.1 Tests are conducted at the Bank of England, Debden and, subject to paragraph 6.2 below, will be free of charge.

6.2 If the Bank of England receives requests for multiple testing, such as during the development phase of new equipment outside of normal regular tests, then in such cases the Bank reserves the right to charge for such tests. The amount of any such charge will be notified in advance and will cover the Bank’s reasonable costs in carrying out the tests requested.

6.3 Tests are conducted by Bank personnel in the presence of a nominated official of a manufacturer in accordance with the test procedures set out in Section 7 and Appendix 1. We would normally expect this to take place over the course of one day.

6.4 Manufacturers will pay for their own expenses e.g. travel and accommodation, and the packaging and transportation of machines to and from the testing location in all circumstances.

6.5 Large machines that are logistically difficult to move will be tested at a mutually agreeable location. The Bank reserves the right to charge for travel and accommodation in such circumstances.

6.6 Manufacturers are encouraged to loan their machines to the Bank so that additional tests with new counterfeit types can be checked by the Bank in-between regular testing. In the event of a failure being found with a new counterfeit type, the manufacturer will be asked to update their machine as appropriate and re-submit for testing; section 5.2 above would apply to such re-test.
6.7 Manufacturers will be able to access the counterfeit library and the fitness test packs to record and analyse information for later evaluation (“data grabbing exercises”) outside of the testing regime.

7. **Types of tests and testing procedures.**

7.1 Prior to the commencement of testing, manufacturers must enter into the agreement with the Bank referred to in Section 4.1 above and supply the information referred to in Section 4.2. Once the agreement has been signed and the information provided, the tests will be conducted in the following order:

(a) Recognition test with genuine banknotes (various fitness levels) – all machines
(b) Detection test with counterfeit banknotes – all machines
(c) Sorting test with unfit notes – machines that can fitness sort only.

Details of each of these tests and the procedure are set out in Appendix 1.

7.2 Immediately following a test taking place, the Bank and the manufacturer shall agree the results and the manufacturer shall confirm its agreement of the results by signing an acceptance in the form set out in Appendix 2. The acceptance form contains a confirmation that the manufacturer agrees to the publication on the Bank’s external web site of the test results in respect of a machine that passes a test along with certain information that identifies the machine model and software version tested described in Section 8.

7.3 In the event that (i) a machine fails a test, or (ii) the Bank and a manufacturer are unable to agree the results of a test, the Bank will not publish the results of that particular test in respect of the relevant machine.

7.4 Results shall be published within one month of the date on which a test took place, however, so that all manufacturers are treated fairly in the first year, no test results shall be published in the first 12 months following the date of the commencement of the framework.

---

1 Available on request as a separate document.
8. **Web page:**

8.1 We will publish the following information with the test results with the manufacturers consent:
   (a) Manufacturer/address/contact details.
   (b) Machine category or type; and intended use.
   (c) Model number.
   (d) Software and or firmware and or table set version and whether the user can check this.
      (To note there may be more than one version per model of machine, and all successful
      versions submitted for testing will be listed from July 2013)
   (e) Test date; test pack issue number/version; and the date the test packs were created.
   (f) The issue number/version and date of the latest counterfeit test pack in use by the Bank
      of England.
   (g) The results (- failed machines will not be reported on).

8.2 We will also publish the following information (from July 2013):
   (a) The date of the next test due date.
   (b) Software and or firmware and or table set versions that are no longer valid.

9. **Disclaimer**

9.1 Manufacturers are responsible for updating and re-testing machine(s) regularly in accordance
   with the framework.

9.2 Business owners and/or users of machines are responsible for checking that the machines they
   use are still supported by the manufacturer and that they have the latest updates installed.

9.3 The publication or non-publication of results in respect of a machine does not contain or imply
   a recommendation or endorsement by the Bank for the use or non-use of such machine and
   manufacturers may not represent or imply that the Bank has given or made such an
   endorsement or recommendation.

9.4 No warranty or representation is given or implied by the Bank that all machines of the model
   type tested will in use detect, correctly identify and/or reject or separate counterfeit and/or
genuine and/or composed banknotes without error and/or is fit for purpose and manufacturers may not represent or imply that the Bank has given or made such a warranty or representation.

9.5 The Bank accepts no liability for any claim, loss, damage or expense of any kind or nature suffered or incurred by a manufacturer or any third party howsoever caused in respect of the participation of the manufacturer in this framework.

9.6 No permission express or implied is given by the Bank to a manufacturer to, and the manufacturer may not, make use of the Bank’s name, logo or brand or any information about the Bank acquired by the manufacturer through its dealings with the Bank for any purpose.

9.7 The Bank may at its sole discretion and without notice terminate the agreement and remove a manufacturer’s machine from the published list of test results if it considers that there has been a breach of paragraphs 9.3, 9.4 or 9.6 above. Without prejudice to this clause or clauses 9.3, 9.4 or 9.6, manufacturers may create a hyperlink from its website to this framework on the Bank’s website, and may inform its customers that its machine(s) has been tested.
Appendix 1 Tests to be carried out.

For the purposes of these tests the following definitions and actions are defined:

<table>
<thead>
<tr>
<th>Category</th>
<th>Classification</th>
<th>Properties</th>
<th>Treatment</th>
<th>Treatment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Not recognised as a Bank of England banknote</td>
<td>Machine does not recognise the image as a Bank of England banknote</td>
<td>Reject</td>
<td>No value to be given</td>
</tr>
<tr>
<td>2</td>
<td>Suspect counterfeit banknotes</td>
<td>Machine recognises the image but it does not conform to the template for a genuine banknote <strong>and</strong> one or more authentication features missing or clearly out of tolerance</td>
<td><strong>Customer operated business machines with a sorting and retention facility:</strong> Suspect counterfeit notes(^2) should be retained(^3) and not given back to the customer. Notes should be identified to the particular customer and removed from circulation and handed to the police in accordance with the Forgery and Counterfeiting Act 1981(^4). <strong>Staff operated sorting machines:</strong> Suspect counterfeit notes should be outsorted or clearly identified to the user that they are suspect and removed from circulation and handed to the police in accordance with the Forgery and Counterfeiting Act 1981. <strong>All other machines</strong> : Suspect counterfeit notes should be rejected by the machine, in some cases such as manual desktop devices a visual or audible signal is sufficient. Where a member of staff is present, they should retain the notes and hand them to the police in accordance with the Forgery and Counterfeiting Act 1981. More information on what to do with a counterfeit banknote can be found at <a href="http://www.bankofengland.co.uk/banknotes">www.bankofengland.co.uk/banknotes</a></td>
<td></td>
</tr>
</tbody>
</table>

\(^{2}\) These are notes where the machine knows or has sufficient reason to believe that the note is counterfeit. Manufacturers should obtain their own legal advice with respect to the Forgery and Counterfeiting Act 1981.

\(^{3}\) Some exceptions apply; please see the relevant section 2.

\(^{4}\) Under Home Office guidelines, financial institutions are allowed to return suspect notes back to the Bank of England via the banking system, if there is no reasonable chance of a successful prosecution, i.e. If the notes cannot be identified to a particular person. (These are known a ‘dead utterings’.)
Recognition of genuine banknotes.

The test pack size will be determined by the type of machine to be tested, i.e. single manual feed or bunch note feed/accept. It will contain new notes and used notes of varying fitness levels. Unfit notes will not be used.

The large test pack will comprise:

<table>
<thead>
<tr>
<th>Denomination</th>
<th>New banknotes</th>
<th>Circulated Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 (Fry)</td>
<td>5</td>
<td>13</td>
</tr>
<tr>
<td>10 (Darwin)</td>
<td>3</td>
<td>34</td>
</tr>
<tr>
<td>20 (Adam Smith)</td>
<td>12</td>
<td>74</td>
</tr>
<tr>
<td>50 (Boulton and Watt)</td>
<td>3</td>
<td>6</td>
</tr>
<tr>
<td><strong>Total: 150</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The small test pack will comprise: (rounded up to nearest whole note)

<table>
<thead>
<tr>
<th>Denomination</th>
<th>New banknotes</th>
<th>Circulated Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 (Fry)</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td>10 (Darwin)</td>
<td>1</td>
<td>6</td>
</tr>
<tr>
<td>20 (Adam Smith)</td>
<td>3</td>
<td>14</td>
</tr>
<tr>
<td>50 (Boulton and Watt)</td>
<td>1</td>
<td>1</td>
</tr>
<tr>
<td><strong>Total: 30 notes</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Banknotes are selected to reflect average type of notes in circulation by denomination.

Results:

There is no pass/fail mark for this test.

1. All machine types: Report the percentage of genuine notes accepted in all orientations by the machine. e.g. 90% accepted in all orientations;
Detection of counterfeit notes

The counterfeit test pack will comprise counterfeit notes from each relevant denomination and class. The Bank will decide when to include a counterfeit note type according to a perceived threat level, based on quantity and/or quality of notes detected from circulation. The test pack will contain at least five notes of each of the counterfeit classes that make up 90% of the total number of counterfeits in the last 12 months; and at least one of each of the remaining classes considered relevant. In addition, if a counterfeit class is deemed to be a threat but is seen in very few numbers at least five notes will be included. In addition, the test pack will contain composed notes that are more than 50% composed of counterfeit parts.

Results.

1. Cash validation only machines:
   - Pass if all counterfeit notes rejected by the machine for all orientations accepted

2. Business machines. (Machines that are used for re-issuance of banknotes, i.e. those likely to be used and owned by professional cash handlers, finance and credit institutions, whether operated by customers or staff only)
   - Staff operated machines: Pass if all counterfeit notes rejected and or outsorced as suspect counterfeit notes for all orientations accepted.
   - Customer operated machines: Pass if all counterfeit notes retained as suspect counterfeit by the machine for all orientations accepted.
     - Exception 1 Withdrawn series counterfeit notes can be rejected if the machine does not contain a template for that genuine banknote. This must be tested with genuine withdrawn series notes to verify.
     - Exception 2 In certain cases, when it can be demonstrated by physical evidence, the machine is allowed to reject a counterfeit note back to the customer if the machine is not able to identify the document as being one object, for example, due to thickness or is not able to identify the document as a valid item, for example if the size of the banknote is smaller or bigger than the tolerance of a genuine banknote of that denomination.

---

5 This exception was made on 12th October 2010 to allow for limitations in the capability of machines, and may be withdrawn in the future when the capability of machines has improved.
6 This exception was made on 9th September 2015 to allow for limitations in the capability of machines, and may be withdrawn in the future when the capability of machines has improved.
Detection of unfit notes.

This section of the framework is for information only so that manufacturers are aware that it will be included at some future date. The Bank is currently reviewing fitness standards with members of its Note Circulation Scheme. We will wait until this work completes before introducing tests for machines that are used for local recycling.

Only machines that have a fitness sorting mechanism will be tested with this test pack.

The test pack will contain notes of a range of notes of different fitness levels. The unfit notes will be artificially created. Each note will have one fault type. The notes in the test pack will be checked visually and or measured between each test to check consistency between manufacturer tests. Notes that have deteriorated significantly will be replaced before the next test.

Results.

Business machines. (Machines that are used for the re-issuance of banknotes, i.e. those likely to be used and owned by finance and credit institutions, whether operated by customers or staff only)

Pass if <5% of unfit notes per denomination per test sorted as fit.

Tracing system test

Manufacturers of customer operated business machines should demonstrate that customer information can be retained in the event that a banknote is identified as suspect.

Pass if it can be demonstrated that the machine has the capability to identify retained suspect counterfeit notes to a particular customer/transaction.
Appendix 2

Form of agreement of test results and information to be published

Framework for the Testing of Banknote Handling Machines

[Company name] hereby agrees that the information set out below is correct and agrees to the publication of such information (only if pass awarded) by the Bank on its web site at:

www.bankofengland.co.uk

(a) the name and address of the Manufacturer;
(b) the category, type and intended use of the Machine tested is;
(c) the model number of the Machine tested is;
(d) the Software and or Firmware and or Table Set of the Machine tested is;
(e) the Test of the above Machine took place on;
(f) test pack versions/issue numbers used during the test;
(g) the test results of the above Machine are:
   - Recognition of genuine notes;
   - Detection of counterfeit notes;
   - Detection of unfit notes;
   - Tracing system test;
(h) Software/Firmware/Table set information that will be de-listed (in accordance with section 8.2b)

(i) Signed by

………………………
for and on behalf of [Company Name]

Schedule 1 form supplied

In addition to successfully passing the test the information requested in Schedule 1 must be supplied before this machine can be listed on the Bank of England website, www.bankofengland.co.uk/
