

Andrew G Haldane

Experience

Joined the Bank in 1989. Worked initially as an economist on the design of monetary policy frameworks. Following sterling's exit from the ERM in 1992, this involved research on the design and specification of the UK's new inflation targeting regime.

Conducted research into the practical and theoretical case for central bank independence, prior to the 1997 monetary policy reforms.

Served as consultant for a number of countries internationally during the 1990s on the design of their inflation targeting frameworks.

At the start of the Asian crisis, moved to head-up the Bank's work on International Finance. This included the design and implementation of the Bank's reform plan for the international monetary system. Seconded to the International Monetary Fund in 2002 to work on international monetary reform.

Between 2003-05, headed the Bank's work on Market Infrastructure, which included designing and implementing a new risk framework and a new annual publication – *Payment System Oversight Report*.

Since 2005, headed the Bank's Systemic Risk Assessment work, responsible for the Bank's new quantitative risk assessment framework and its six-monthly *Financial Stability Report*.

Most recently, worked on the redesign of the Bank's new financial stability framework under the proposed new Banking Bill and the design and implementation of the recapitalisation plan for UK banks, announced in mid-October.

Publications

Written extensively on domestic and international monetary and financial stability, authoring around 80 articles and three books on issues including inflation targeting, central bank independence, international financial crises, financial stability frameworks and payment systems.

Member of various international public policy committees, economics associations, editorial boards and academic advisory committees.

Qualifications

BA in economics and finance: University of Sheffield (1988)

MA in economics: University of Warwick (1989)

Personal details
