

NOT FOR PUBLICATION UNTIL 09:30 ON 29 OCTOBER 2009

Lending to individuals: September 2009

Total net lending to individuals rose by £0.7 billion in September (Table A). The twelve-month growth rate remained at 0.8%, and the three-month annualised growth rate increased 0.1 percentage points to 0.3%.

Within the total, **net lending secured on dwellings** increased by £0.9 billion (Table A), weaker than the August figure of £1.3 billion, but above the previous six-month average of £0.6bn. The twelve-month growth rate fell by 0.1 percentage points to 0.8%. The three-month annualised growth rate increased to 0.6%. Within total secured lending, secured lending by banks (excluding the effects of securitisations) increased by £3.5 billion, above both the £2.9 billion increase in August and the six-month average of £2.6bn. The **number of loan approvals for house purchase** (56,215) was above the August figure (52,970) and above the previous six-month average, whereas approvals for **remortgaging** (25,528) were below the August figure of 28,348 and below the previous six-month average. The number of loans approved for **other purposes** (27,956) was higher than in August, but below the previous six-month average (Table B).

Consumer credit fell by a net £0.3 billion, below the previous six-month average (Table A). **Credit card lending** increased by £0.1 billion and **other loans and advances** fell by £0.3 billion. The annual growth rate of consumer credit continued to fall, to 0.5%; the three-month annualised growth rate fell to -1.6%.

(a) Approvals secured on dwellings are measured net of cancellations. From January 2008 additional monthly gross approvals and cancellations data are available on the Bank's Statistical Interactive Database. The database can be accessed at www.bankofengland.co.uk/mfsd/iadb.

The additional series can be downloaded by clicking on "Tables", "Money and Lending", "Monthly lending secured on dwellings: gross approvals and cancellations, not seasonally adjusted".

(b) Owing to the method of seasonal adjustment of these series, they may not equal the sum of their component breakdown.

Chart 1: Growth rates of seasonally adjusted lending secured on dwellings

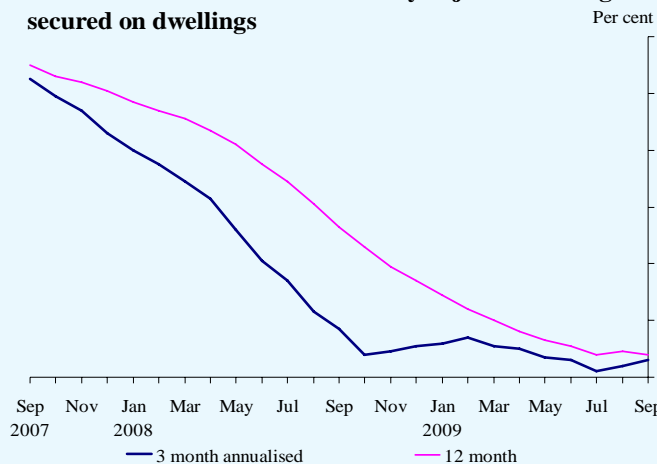

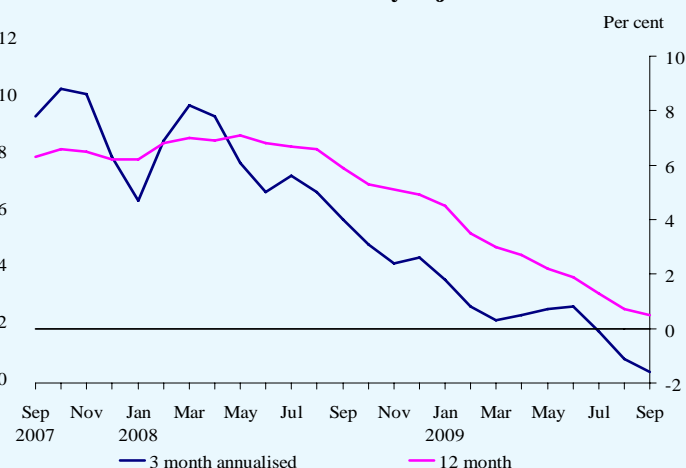

Chart 2: Growth rates of seasonally adjusted consumer credit

Notes to Editors

- 1 Full data on lending to individuals are available in Table A5 of Bank of England *Monetary and Financial Statistics* (www.bankofengland.co.uk/statistics/ms/current); these data are consistent with M4 lending, but are more comprehensive (as they include lending by institutions other than banks and building societies). Further information on the definitions of lending to individuals and calculations of growth rates are shown separately.
- 2 The consumer credit data include input from the Office for National Statistics. These data, and additional data not presented here, can be accessed free-of-charge from the Time Series data services at the National Statistics website www.statistics.gov.uk/statbase/tsdintro.asp
- 3 The Statistical Interactive Database (www.bankofengland.co.uk/mfsd/iadb) provides long runs of statistical data with comprehensive search options and the ability to download in a variety of formats. The series codes are listed in the tables in this release. The additional tables, shown separately, also illustrate the codes for each series which can be used for downloading long runs from the database.
- 4 Consumer credit consists of credit card lending and other loans and advances. Other loans and advances include loans made through Government student support schemes (currently through the Student Loans Company). From the academic year 2006/07 onwards, tuition fee loans were made available to new students affected by variable fees (fees charged at a higher rate than the previous fixed level fees) and also to those continuing students who were not entitled to 100% tuition fee grants and, hence, were paying all or part of their lower fixed level tuition fees. Such loans are made in instalments, mainly paid in February and May. All new entrants in academic year 2007/08 were affected by the variable fee regulations, whilst the corresponding group that had left university was mostly affected by the previous fixed level fees. Hence, the overall level of tuition fee loans rose significantly in 2007/08, and again in 2008/09. Further information on Government student support schemes can be found at www.slc.co.uk/statistics/national_statistics.html
