Sectoral breakdown of aggregate M4 and M4 lending: June 2005

M4 lending (excluding the effects of securitisations etc) to the **household sector** totalled £8.1 billion in June, the annual growth rate falling to 10.9%. The annual rate of growth of the household sector's holdings of M4 rose to 8.9%. M4 lending (excluding the effects of securitisations etc) to **private non-financial corporations** (PNFCs) totalled £6.5 billion in June, the strongest monthly outturn in the series. Annual growth rose to 14.5%, the strongest since October 2000. PNFCs increased their holdings of M4 by £0.4 billion. Holdings of M4 by **other financial corporations** (OFCs) and M4 lending (excluding the effects of securitisations etc) to OFCs both fell during June, with their respective annual growth rates falling as a consequence.

(a) The changes and growth rates of the sectoral breakdown of M4 lending shown in Table A and

Chart 2, as well as sterling loans in Table B, exclude the effects of securitisations and loan transfers.

(b) Not seasonally adjusted. (Capital issues series have been found not to be significantly seasonal).

(c) This series has not been seasonally adjusted as, after examination, it was found not to be significantly seasonal. This series will, however, be reviewed for seasonality along with all other series on a regular basis.

(d) Owing to the method of the seasonal adjustment of this series, it may not equal the sum of its component breakdown.

Funds raised by **PNFCs** from UK MFIs and the capital markets totalled £8.6 billion in June, the strongest outturn since June 2001. Further information on capital issues can be found in the *Capital Issuance* statistical release of 20 July.

(a) Data in **bold italics** are revised from the provisional release published on 20 July.**Notes to Editors**

- The growth rates of sectoral M4 lending shown in Table A (and the accompanying text and chart) exclude the effects of securitisations and loan transfers. Securitisations reduce both the stock of lending by MFIs and the associated flow. Growth rates excluding the effects of securitisations etc, which more accurately reflect the indebtedness of borrowers, are used in the Bank of England *Inflation Report* and in the minutes of the meetings of the Monetary Policy Committee. Growth rates of sectoral M4 lending not adjusted for the effects of securitisations etc. are available in Table A4.1 of Bank of England *Monetary and Financial Statistics* (www.bankofengland.co.uk/mfsd/current/ms/index.htm).
- The household sector comprises individuals, unincorporated businesses other than unlimited liability partnerships (i.e. sole traders) and non-profit institutions serving households (e.g. charities and universities). Data for total lending to individuals, i.e. including that by non-MFI mortgage and credit grantors (including specialist securitisation vehicles), are available in the *Lending to individuals* statistical release, also released today. Further information on the definitions of M4, M4 lending, sectoral breakdown of M4 and calculations of growth rates can be found in Bank of England *Monetary and Financial Statistics* or via the following links:
www.bankofengland.co.uk/mfsd/iadb/notesiadb/m4.htm
www.bankofengland.co.uk/mfsd/iadb/notesiadb/m4_sectoral.htm
www.bankofengland.co.uk/mfsd/iadb/notesiadb/growth_rates.htm
- Table B shows a wider measure of borrowing by PNFCs. This measure encompasses their sterling and foreign currency borrowing from UK MFIs (but excluding MFIs' holdings of securities issued by PNFCs) and the funds raised through issues of sterling and foreign currency equities and bonds and commercial paper in the UK.
- The Statistical Interactive Database provides long runs of statistical data with comprehensive search options and the ability to download in a variety of formats. This database can be accessed at www.bankofengland.co.uk/mfsd/iadb. The internet version of this release illustrates the codes for each series which can be used for downloading long runs from the database.
