(a) Sterling loans exclude the effects of securitisations and loan transfers.

(b) Not seasonally adjusted (Capital issues series have been found not to be significantly seasonal).

(c) This series has not been seasonally adjusted as, after examination, it was found not to be significantly seasonal. This series will, however, be reviewed for seasonality along with all other series on a regular basis.

(d) Owing to the method of the seasonal adjustment of this series, it may not equal the sum of its component breakdown.

Funds raised by **PNFCs** from UK MFIs and capital markets totalled £5.3bn in November, lower than the £13.7bn raised in October. Further information on capital issues can be found in the *Capital Issuance* release of 20 December.

(a) Data in **bold italics** are revised from the provisional release published on 20 December.**Notes to Editors**

- 1 The growth rates of sectoral M4 lending shown in Table A (and the accompanying text and chart) exclude the effects of securitisations and loan transfers. Securitisations reduce both the stock of lending by MFIs and the associated flow. Growth rates excluding the effects of securitisations etc, which more accurately reflect the indebtedness of borrowers, are used in the Bank of England *Inflation Report* and in the minutes of the meetings of the Monetary Policy Committee. Growth rates of sectoral M4 lending not adjusted for the effects of securitisations etc. are available in Table A4.1 of Bank of England *Monetary and Financial Statistics* ([www.bankofengland.co.uk/statistics/ms/current](http://www.bankofengland.co.uk/statistics/ms/current)).
- 2 The household sector comprises individuals, unincorporated businesses other than unlimited liability partnerships (i.e. sole traders) and non-profit institutions serving households (e.g. charities and universities). Data for total lending to individuals, i.e. including that by non-MFI mortgage and credit grantors (such as specialist securitisation vehicles), are available in the *Lending to individuals* statistical release, also published today. Further information on the definitions of M4, M4 lending, sectoral breakdown of M4 and calculations of growth rates are shown separately.
- 3 Table B shows a wider measure of financing by PNFCs. This measure encompasses their sterling and foreign currency borrowing from UK MFIs (but excluding MFIs' holdings of securities issued by PNFCs) and the funds raised through issues of sterling and foreign currency equities and bonds and commercial paper in the UK.
- 4 The Statistical Interactive Database provides long runs of statistical data with comprehensive search options and the ability to download in a variety of formats. This database can be accessed at [www.bankofengland.co.uk/mfsd/iadb](http://www.bankofengland.co.uk/mfsd/iadb). The tables shown separately illustrate the codes for each series which can be used for downloading long runs from the database.
