(a) Details on the revisions to previous versions of this table are available separately.

(b) Data shown in £ millions are available on the Bank's Statistical Interactive Database - See Notes to Editors 3.

(c) This series has not been seasonally adjusted as, after examination, it was found not to be significantly seasonal. This series will, however, be reviewed for seasonality along with all other series on a regular basis.

(d) Owing to the method of the seasonal adjustment, M4 may not equal the sum of its components or counterparts. Residuals can be found on the Bank's Statistical Interactive Database.

**Notes to Editors**

- 1 Separate data are shown for M4 lending and M4 lending excluding the effects of securitisations and loan transfers. Securitisations reduce both the stock of lending by MFIs and the associated flow. Growth rates excluding the effects of securitisations etc., which more accurately reflect the indebtedness of borrowers, are used in the Bank of England *Inflation Report* and in the minutes of the meetings of the Monetary Policy Committee.
- 2 M4 comprises the M4 private sector's (i.e. the UK private sector other than monetary financial institutions (MFIs)) holdings of: sterling notes and coin; sterling deposits, including certificates of deposit; commercial paper, bonds, FRNs and other instruments of up to and including five years' original maturity issued by UK MFIs; claims on UK MFIs arising from repos; and estimated holdings of sterling bank bills. M4 lending comprises sterling lending by MFIs to the M4 private sector. Further information on the definitions of M4, M4 lending, the counterparts to M4 and calculations of growth rates can be found in the Bank of England *Monetary and Financial Statistics* publication or via the following links:
