

**Impact of data errors on the SONIA benchmark determination process**

As set out in the SONIA Key features and policies document <sup>1</sup>, the Bank has put in place policies and procedures to satisfy itself of the quality of data inputs to the SONIA benchmark to allow timely publication. However, the Bank recognises that errors may occur in limited circumstances.

This table provides summary information on errors that did not meet the SONIA republication criteria. This is updated on a quarterly basis, published one month in arrears. Errors whose absolute impact is less than 0.001 percentage points are excluded from this analysis.

Please note that once the republication deadline for SONIA has passed, no amendments will be made to the benchmark rate under any circumstances.
