

Priorities and roadmap for transition by end-2021

Updated: May 2021

May 2021: Factual update, reflecting recent developments and forthcoming FCA consultations (slide 4)

Working Group on Sterling Risk-Free Reference Rates (RFRWG)

Top Level Priorities - 2021

1. Be fully prepared for the end of GBP LIBOR, by the end of 2021
2. Continue to enable and promote widespread use of SONIA compounded in arrears throughout wholesale sterling markets
3. By end-Q1 2021, cease initiation of new GBP LIBOR-linked loans, bonds, securitisations and linear derivatives* that expire after the end of 2021
4. By end-Q1 2021, complete identification of all legacy GBP LIBOR contracts expiring after end 2021 that can be actively converted, and progress active conversion where viable through to completion by end-Q3 2021
5. Take steps to enable a shift of volumes from GBP LIBOR to SONIA in non-linear derivative markets:
 - a) by end-Q2 2021, cease initiation of new GBP LIBOR-linked non-linear derivatives* that expire after the end of 2021; and,
 - b) by end-Q3 2021, complete active conversion where viable

* Except for risk management of existing positions (see [link](#) for details)

Target milestones: product class breakdown

In support of the RFRWG's objectives to establish clear frameworks to cease trading of new LIBOR-linked products and manage transition of legacy LIBOR products, the table below provides a product-by-product view of the steps needed to meet the key milestones established by the RFRWG.

By end of:	Q1 2021	Q2 2021	Q3 2021	Q4 2021
Derivatives	<ul style="list-style-type: none"> • Cease initiation of new GBP LIBOR-linked linear derivatives that expire after the end of 2021, except for risk management of existing positions* • Complete identification of all legacy LIBOR contracts expiring after end 2021 that can be actively converted • Accelerate active conversion where viable (e.g. compression/renewal) to reduce legacy volume • Widespread sign-up to the ISDA protocol ahead of effective date** 	<ul style="list-style-type: none"> • By end-Q2, cease initiation of new GBP LIBOR non-linear derivatives that expire after the end of 2021, except for risk management of existing positions* • By end-Q2, cease initiation of new GBP LIBOR-linked exchange traded futures and options that expire after the end of 2021, except for risk management of existing positions* • During Q2/Q3, cease initiation of cross-currency derivatives with a LIBOR-linked sterling leg, expiring after 2021, except for risk management of existing positions* • Complete active conversion across linear and non-linear derivatives where viable, and if not viable, ensure robust fallbacks are adopted where possible 		
Bonds and securitisations	<ul style="list-style-type: none"> • Cease new issuance of GBP LIBOR-referencing products maturing after 2021 • Complete identification of all legacy LIBOR contracts expiring after end 2021 that can be actively converted • Accelerate active conversion where viable (e.g. consent solicitation mechanisms) to reduce legacy volume 	<ul style="list-style-type: none"> • Complete active conversion where viable 		<ul style="list-style-type: none"> • Be fully prepared for the end of GBP LIBOR
Loans	<ul style="list-style-type: none"> • Cease new issuance of GBP LIBOR-referencing products maturing after 2021 • Complete identification of all legacy LIBOR contracts expiring after end 2021 that can be actively converted • Accelerate active conversion where viable (e.g. at renewal, proactive negotiation, or using pre-agreed terms) to reduce legacy volume 	<ul style="list-style-type: none"> • Complete active conversion where viable • Where active conversion is not viable, ensure robust fallbacks are adopted where possible 		

*More detail on exceptions for risk management is available [here](#). It is acknowledged cross-currency RFR markets currently remain nascent, and that further developments will be necessary in 2021.

**Subject to individual firms' usual governance procedures and negotiations with counterparties as necessary. Where the protocol is not used, other appropriate arrangements will need to be considered to mitigate risks
