Sterling Monetary Framework

Level B Collateral Set

The range of securities eligible as Level B collateral comprises high quality securities that would normally be expected to trade in liquid markets and which the Bank is able to effectively value and risk manage as collateral. In determining the eligibility of a security as Level B collateral the Bank will need to be satisfied that (i) the debt is sufficiently liquid such that it could be realised in the event of counterparty default; and that (ii) market price behaviour and liquidity are sufficiently predictable that the Bank is able to risk manage collateral by imposing appropriate haircuts. Participants should always consult the SMF Documentation, including any relevant market notices, for a complete guide to eligible collateral. In all cases, eligibility is subject to any settlement constraints.

Securities with the following characteristics are eligible as Level B collateral:

- **Sovereign and Central Bank debt**

Sovereign and Central Bank debt (including associated strips) of Australia, Austria, Belgium, Denmark, Finland, Ireland, Italy, Japan, Luxembourg, New Zealand, Norway, Portugal, Spain, Sweden, and Switzerland, issued in either the domestic currency or in sterling, euro or US dollars, and sovereign debt of China, issued in offshore RMB under English law.

Subject to diversification requirement that no more than 10% of the total value of the portfolio may be from a single issuer. For the purposes of this requirement, legal entities in the same group or those with close links as determined by the Bank, will be treated as a single issuer.

The following further requirements apply:

- In each case the underlying assets must be cash, not synthetic (i.e. not derivatives).
- Securities whose credit quality is on the basis of a guarantee or insurance provided by a third party ("a wrap") will not be eligible (with the exception of government guaranteed instruments noted above).
- Covered bonds and securitisations containing assets originated by the Participant (own-name securities) will not be accepted as level B collateral but may be considered for level C collateral.
- Securitisations containing securitisations will not be accepted.
- Securities may be denominated in Sterling, Euro, US dollars, Australian dollars, Canadian dollars, Swedish krona, Swiss francs, or in the case of Japanese Government Bonds and bank debt issued under the UK Government's Credit Guarantee Scheme, Yen.
- Securities must be capable of being delivered to the Bank via the delivery mechanisms listed in the Bank's operating procedures.

- Securitisations and covered bonds must meet the Bank's transparency requirements (see: <http://www.bankofengland.co.uk/markets/Pages/money/eligiblecollateral.asp>)
- In certain cases, including but not limited to where the Bank has had to do due diligence to determine whether a particular asset is eligible, these costs may be charged back to the relevant Participant.
- Securities which give rise to registration charges, transfer taxes, VAT or other similar taxes or charges on transfer will not be eligible.
- The Bank considers the role of rating agencies, the evolution of the securitisation regulatory environment and the principles attached to such frameworks as part of the review process. The Bank remains independent in its assessment and only accepts collateral that it can value and risk manage effectively in the bounds of its risk appetite.

A list of eligible securities is updated monthly and is available at <https://www.bankofengland.co.uk/markets/eligible-collateral>
