Notes to Editors

1. These data are compiled from supervisory data collected through the **Mortgage Lenders & Administrators Return** (MLAR) provided by regulated firms. It covers information on residential mortgage lending and some non-regulated business, i.e. buy-to-let and second charge mortgages. This information is published quarterly.
2. The definition within these data of a reportable arrears case covers loans where the amount of actual arrears is 1.5% or more of the borrower's current loan balance. For example, if the loan balance is £100,000 and arrears on the loan amount to £1,500 or more, then it is a reportable arrears case for MLAR purposes.
3. The definition of a possession within these data refers to an arrears case where the lender, having formally been granted a Possession Order by a Court, is then able to sell the underlying property (against which the loan is secured) and use the proceeds to reduce or pay-off the mortgage debt. Our figures relate to individual loan accounts in possession.
4. In terms of 'loan accounts in possession', this number does not represent the number of borrowers that have been subject to possession. It represents the number of individual loan accounts in possession, and covers possessions arising on first charge loans, second and subsequent charge loans (where the borrower takes an extra loan from another lender).
5. No breakdown is available for these statistics on a regional or local authority basis.
6. Further detailed definitions are available in the Technical Notes at the end of the published **Statistical release** and the additional **Explanatory Notes** published by the Bank.
