AUTL78	Deposit Amount	The sum of all obligor amounts held by the originator or seller that are potentially off-settable against the underlying exposure balance, excluding the benefit of any national deposit compensation scheme. To prevent double-counting, this is to be capped at the lower of (1) the deposit amount, and (2) the maximum potential off-settable amount at the obligor-level (i.e., not underlying exposure-level) within the pool. Use the same currency denomination as that used for this underlying exposure. If an obligor has more than one underlying exposure outstanding in the pool, then this field is to be completed for each underlying exposure, and it is up to the discretion of the reporting entity to decide to allocate the deposit amount across each of the underlying exposure, subject to the above-mentioned cap and so long as the total entries for this field across the multiple underlying exposures adds up to the accurate amount. For example, if Obligor A has deposit balance of £100, and two underlying exposures outstanding in the pool of: underlying exposure 1 £60 and underlying exposure 2 £75. This field could be completed as either underlying exposure 2 £60 and underlying exposure 2 £60, or underlying exposure 1 £60 and underlying exposure 2 £60 or underlying exposure 1 £60 for underlying exposure 2 £75 (i.e. the relative entries for this field in each underlying exposure 1 and at £75 for underlying exposure 2 and the sum of the values across underlying exposure 2 and the sum of the values across underlying exposure 1 and underlying exposure 2 must equal £100). Include the currency in which the amount is denominated, using {CURRENCYCODE_3} format.		YES
