ARTICLE 6D RETENTION OF THE ORIGINATOR'S INTEREST IN A REVOLVING SECURITISATION OF REVOLVING EXPOSURES

- 1 The retention of the *originator's* interest of not less than 5% of the nominal value of each of the securitised exposures as referred to in point (b) of Article 6(3) shall only be considered fulfilled where the retained credit risk of such exposures ranks *pari passu* with or is subordinated to the credit risk securitised in relation to the same exposures.

[Note: This Article was previously Article 5 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6E RETENTION OF RANDOMLY SELECTED EXPOSURES EQUIVALENT TO NOT LESS THAN 5% OF THE NOMINAL VALUE OF THE SECURITISED EXPOSURES

- 1 The pool of at least 100 potentially securitised exposures from which retained non-securitised and securitised exposures are to be randomly selected, as referred to in point (c) of Article 6(3), shall be sufficiently diverse to avoid an excessive concentration of the retained interest.
- 2 When selecting the exposures referred to in paragraph 1, retainers shall take into account quantitative and qualitative factors that are appropriate for the type of securitised exposures to ensure that the distinction between retained non-securitised and securitised exposures is random. For that purpose, and where relevant, retainers shall take into consideration the following factors when selecting exposures:
 - (a) the time of the origination of the loan (vintage);
 - (b) the type of securitised exposures;
 - (c) the geographical location;
 - (d) the origination date;
 - (e) the maturity date;
 - (f) the loan to value ratio;
 - (g) the collateral type;
 - (h) the industry sector;
 - (i) the outstanding loan balance; and
 - (j) any other factor deemed relevant by the retainer.
- 3 Retainers shall not select different individual exposures at different points in time, except where that may be necessary to fulfil the retention requirement in relation to a *securitisation* in which the securitised exposures fluctuate over time, either due to new exposures being added to the *securitisation* or to changes in the level of the individual securitised exposures.
- 4 Where the retainer is the *securitisation's servicer*, the selection conducted in accordance with this Article shall not lead to a deterioration in the servicing standards applied by the retainer on the transferred exposures relative to the retained exposures.

[Note: This Article was previously Article 6 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6F RETENTION OF THE FIRST LOSS TRANCHE

- 1 The retention of the *first loss tranche* referred to in point (d) of Article 6(3) may be fulfilled by holding either on-balance sheet or off-balance sheet positions and by any of the following methods:
 - (a) provision of a *contingent form of retention* or of a *liquidity facility* in the context of an *ABCP programme*, which fulfils all of the following criteria:
 - (i) the exposure covers at least 5% of the nominal value of the securitised exposures
 - (ii) the exposure constitutes a first loss position in relation to the *securitisation*;
 - (iii) the exposure covers the credit risk for the entire duration of the retention commitment;
 - (iv) the exposure is provided by the retainer; and
 - (v) the *investors* have been given access within the initial disclosure to all information necessary to verify that points (i) to (iv) are complied with; or

(b) overcollateralisation, as defined the Securitisation (CRR) Part, if that overcollateralisation operates as a 'first loss' position of not less than 5% of the nominal value of the securitised exposures.

2 Where the *first loss tranche* exceeds 5% of the nominal value of the securitised exposures, the retainer may chose to retain a pro rata portion of such *first loss tranche* only, provided that that portion is equivalent to at least 5% of the nominal value of the securitised exposures.

[Note: This Article was previously Article 7 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6G RETENTION OF A FIRST LOSS EXPOSURE OF NOT LESS THAN 5% OF EVERY SECURITISED EXPOSURE

1 The retention of a first loss exposure at the level of every securitised exposure as referred to in point (e) of Article 6(3) shall only be considered to be fulfilled where the retained credit risk is subordinated to the credit risk securitised in relation to the same exposures.

2 By way of derogation from paragraph 1 of this Article, the retention of a first loss exposure at the level of every securitised exposure as referred to in point (e) of Article 6(3) may also be fulfilled through the sale by the *originator* or *original lender* of the underlying exposures at a discounted value where each of the following conditions is met:

(a) the amount of the discount is not less than 5% of the nominal value of each exposure; and

(b) the discounted sale amount is refundable to the *originator* or *original lender* only if, that discounted sale amount is not absorbed by losses related to the credit risk associated to the securitised exposures.

[Note: This Article was previously Article 8 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6H RETENTION OF A PORTION OF THE FIRST LOSS TRANCHE AND OF A PORTION OF THE NOMINAL VALUE OF EACH OF THE TRANCHES SOLD OR TRANSFERRED TO INVESTORS

1 The combination of retained risk referred to in point (f) of Article 6(3) shall be fulfilled by applying Article 6F to the retained portion of the *first loss tranche* referred to in point (d) of Article 6(3) and by applying Article 6C to the retained portion of the nominal value of each of the *tranches* sold or transferred to *investors* as referred to in point (a) of Article 6(3).

ARTICLE 6I APPLICATION OF THE RETENTION OPTIONS ON NPE SECURITISATIONS

1 In the case of *NPE securitisations* as referred to in Article 6(3A), for the purposes of applying Article 6C(1)(a) and Articles 6D to 6H to the share of *non-performing exposures* in the pool of underlying exposures of a *securitisation*, any reference to the nominal value of the securitised exposures shall be construed as a reference to the net value of the *non-performing exposures*.

2 For the purposes of Article 6, the net value of the retained *non-performing exposures* shall be calculated using the same amount of the *non-refundable purchase price discount* that would have been applied had the retained *non-performing exposures* been securitised.

3 For the purposes of point (a) of Article 6C(1), Article 6D and Article 6G, the net value of the retained part of the *non-performing exposures* shall be computed using the same percentage of the *non-refundable purchase price discount* that applies to the part that is not retained.

4 Where the *non-refundable purchase price discount* as referred to in the second subparagraph of Article 6(3A) has been agreed at the level of the pool of underlying *non-performing*

exposures, the net value of individual securitised *non-performing exposures* included in the pool or sub-pool, as applicable, shall be calculated by applying a corresponding share of the *non-refundable purchase price discount* agreed at pool or sub-pool level to each of the securitised *non-performing exposures* in proportion to their nominal value or, where applicable, their outstanding value at the time of origination.

- 5 Where the *non-refundable purchase price discount* includes the difference between the nominal amount of one *tranche* or several *tranches* of a *NPE securitisation* underwritten by the *originator* for subsequent sale and the price at which that *tranche* or those *tranches* are first sold to unrelated third parties as referred to in the second subparagraph of Article 6(3A), that difference shall be taken into account in the calculation of the net value of individual securitised *non-performing exposures* by applying a corresponding share of the difference to each of the securitised *non-performing exposures* in proportion to their nominal value.

[Note: This Article was previously Article 9 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6J MEASUREMENT OF THE LEVEL OF RETENTION

- 1 When measuring the level of retention of the net economic interest, the following criteria shall be applied:
- (a) the origination shall be considered as the time at which the exposures were first securitised;
 - (b) where the calculation of the level of retention is based on nominal values, it shall not take into account the acquisition price of assets;
 - (c) finance charge collections and other fee income in respect of the securitised exposures net of costs ('excess spread') shall not be taken into account when measuring the retainer's net economic interest; and
 - (d) the retention option and methodology used to calculate the net economic interest shall not be changed during the life of a *securitisation* transaction, unless exceptional circumstances require a change and that change is not used as a means to reduce the amount of the retained interest.
- 2 The retainer shall not be required to replenish or readjust its retained interest to at least 5% as losses are realised on its retained exposures or allocated to its retained positions.

[Note: This Article was previously Article 10 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6K MEASUREMENT OF THE MATERIAL NET ECONOMIC INTEREST TO BE RETAINED FOR EXPOSURES IN THE FORM OF DRAWN AND UNDRAWN AMOUNTS OF CREDIT FACILITIES

- 1 The calculation of the net economic interest to be retained for credit facilities, including credit cards, shall be based on amounts already drawn, realised or received only and shall be adjusted in accordance with changes to those amounts.

[Note: This Article was previously Article 11 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6L PROHIBITION OF HEDGING OR SELLING THE RETAINED INTEREST

- 1 The obligation in the first subparagraph of Article 6(1) to retain on an ongoing basis a material net economic interest in the *securitisation* shall be deemed to have been met only where, taking into account the economic substance of the transaction, both of the following conditions are met:

- (a) the retained material net economic interest is not subject to any credit risk mitigation or hedging of either the retained *securitisation* positions or the retained exposures; and
 - (b) the retainer does not sell, transfer or otherwise surrender all or part of the rights, benefits or obligations arising from the retained net economic interest.
- 2 By way of derogation of paragraph 1(a) of this Article, the retainer may hedge the net economic interest where the hedge:
- (a) is not against the credit risk of either the retained *securitisation positions* or the retained exposures; or
 - (b) is undertaken prior to the *securitisation* as a prudent element of credit granting or risk management and does not create a differentiation for the retainer's benefit between the credit risk of the retained *securitisation positions* or exposures and the *securitisation positions* or exposures transferred to *investors*.
- 3 The retainer may use retained exposures or *securitisation positions* as collateral for secured funding purposes including, where relevant, funding arrangements that involve a sale, transfer or other surrender of all or part of the rights, benefits or obligations arising from the retained net economic interest, provided that such use as collateral does not transfer the exposure to the credit risk of those retained exposures or *securitisation positions* to a third party.
- 4 Paragraph 1(b) of this Article shall not apply:
- (a) in the event of the insolvency of the retainer; or
 - (b) in the case of retention on a *consolidated basis*, in accordance with Article 6N.

[Note: This Article was previously Article 12 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6M TRANSACTIONS FOR WHICH THE RETENTION REQUIREMENT DOES NOT APPLY AS REFERRED TO IN ARTICLE 6(6)

- 1 Transactions for which the retention requirement does not apply, as referred to in Article 6(6), shall include *securitisation positions* in the *ACTP* for which the underlying instruments satisfy the criterion in Article 325(6)(b) of the Market Risk: General Provisions (CRR) Part or are eligible for inclusion in the *ACTP*.

[Note: This Article was previously Article 13 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6N RETENTION ON A CONSOLIDATED BASIS

- 1 A *mixed financial holding company*, a *UK parent institution* or *financial holding company established in the UK* satisfying, in accordance with Article 6(4), the retention requirement on the basis of its *consolidated situation* shall, in the case the retainer is no longer included in the scope of supervision on a *consolidated basis*, ensure that one or more of the remaining entities included in the scope of supervision on a *consolidated basis* fulfils the retention requirement.

[Note: This Article was previously Article 14 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6O ARRANGEMENTS OR EMBEDDED MECHANISMS

- 1 Retainers shall not use arrangements or embedded mechanisms in the *securitisation* by virtue of which the retained interest at origination would decline faster than the interest transferred. In the allocation of the cash flows, the retained interest shall not be prioritised to preferentially benefit from being repaid or amortised ahead of the transferred interest.

- 2 The amortisation of the retained interest via cash flow allocation set out in paragraph 1 or through the allocation of losses that, in effect, reduce the level of retention over time, shall be allowed.

[Note: This Article was previously Article 15 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6P FULFILMENT OF THE RETENTION REQUIREMENT IN SECURITISATIONS OF OWN ISSUED DEBT INSTRUMENTS

- 1 Where an entity securitises its own issued debt instruments, including covered bonds as defined in the *FCA Handbook*, and the underlying exposures of the *securitisation* comprise exclusively those own-issued debt instruments, the retention requirement in Article 6(1) shall be considered complied with.

[Note: This Article was previously Article 16 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6Q RETENTION REQUIREMENT ON RESECURITISATIONS

- 1 Subject to paragraph 2 of this Article, in the context of a *resecuritisation* as far as enabled in accordance with Article 8, a retainer shall retain the material net economic interest in relation to each of the respective transaction levels.
- 2 The *originator* of a *resecuritisation* shall not be obliged to retain a material net economic interest at the transaction level of the *resecuritisation* where all of the following conditions are met:
- (a) the *originator* of the *resecuritisation* is also the *originator* and the retainer of the underlying *securitisation*;
 - (b) the *resecuritisation* is backed by a pool of exposures comprising solely exposures or positions which were retained by the *originator* in the underlying *securitisation* in excess of the required minimum net economic interest prior to the date of origination of the *resecuritisation*; and
 - (c) there is no maturity mismatch between the underlying *securitisation* positions or exposures and the *resecuritisation*.
- 3 A *fully supported ABCP programme* which meets the requirements of Article 8(4) shall not be deemed a *resecuritisation* for the purposes of this Article.

[Note: This Article was previously paragraphs 1 to 3 of Article 17 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6R ASSETS TRANSFERRED TO SSPE

- 1 For the purposes of Article 6(2), assets held on the balance sheet of the *originator* that according to the documentation of the *securitisation* meet the eligibility criteria shall be deemed to be comparable to the assets to be transferred to the *SSPE* where, at the time of the selection of the assets, both of the following conditions are met:
- (a) the expected performance of both the assets to be further held on the balance sheet and the assets to be transferred is determined by similar factors; and
 - (b) on the basis of indications including past performance and applicable models, it can be reasonably expected that the performance of the assets to be further held on the balance sheet will not be significantly better during the time period referred to in Article 6(2) than the performance of the assets to be transferred.

- 2 An *originator* shall be deemed to have complied with Article 6(2) where, after the *securitisation*, there are no exposures left on the *originator's* balance sheet that are comparable to the securitised exposures, other than the exposures which the *originator* is already contractually committed to securitise, and provided that that fact has been clearly communicated to *investors*.

[Note: This Article was previously Article 18 of Chapter 4 of this Part as it applied before [DATE]]

ARTICLE 6S DISCLOSURE OF THE LEVEL OF THE COMMITMENT TO MAINTAIN A NET ECONOMIC INTEREST

- 1 The retainer shall disclose to *investors* within the final offering document, prospectus or other transaction documentation at least the following information regarding the level of its commitment to maintain a net economic interest in the *securitisation*:
- (a) confirmation of the retainer's identity, whether it retains as *originator*, *sponsor* or *original lender* and, where the retainer is the *originator*, how it meets the requirements set out in the fifth subparagraph of Article 6(1) taking into account the principles set out in Article 6A(6);
 - (b) which of the modalities provided for in points (a), (b), (c), (d), (e) or (f) of the second subparagraph of Article 6(3) has been applied to retain a net economic interest; and
 - (c) confirmation of the level of retention at origination and of the commitment to retain on an on-going basis, which shall relate only to the continuation of fulfilment of the original obligation and shall not require data on the current nominal or market value, or on any impairments or write-downs on the retained interest.
- 2 Where the exemptions referred to in paragraph 5 or 6 of Article 6 apply to a *securitisation* transaction, *firms* acting as *originator*, *sponsor* or *original lender* shall disclose within the final offering document, prospectus or other transaction documentation information on the applicable exemption to *investors*.
- 3 The disclosure referred to in paragraphs 1 and 2 of this Article shall be appropriately documented within the final offering document, prospectus or other transaction documentation and made publicly available, except in bilateral or private transactions where private disclosure is considered by the parties to be sufficient. The inclusion of a statement on the retention commitment in the prospectus for the securities issued under the *securitisation* programme shall be considered an appropriate means of fulfilling the requirement.

Originators, sponsors and original lenders shall have effective systems in place to apply those criteria and processes in order to ensure that credit-granting is based on a thorough assessment of the obligor's creditworthiness taking appropriate account of factors relevant to verifying the prospect of the obligor meeting the obligor's obligations under the credit agreement.~~

- 1A An originator, sponsor or original lender must have effective systems in place to apply the criteria and processes it maintains in compliance with paragraph (1) above in order to ensure credit-granting is based on a thorough assessment of the obligor's creditworthiness taking appropriate account of factors relevant to verifying the prospect of the obligor meeting the obligor's obligations under the credit agreement.

- ~~(iii) the liquidity facility is provided by the originator, sponsor or original lender in the securitisation transaction; and~~
- ~~(iv) the investors becoming exposed to such securitisation have been given access to appropriate information with the initial disclosure to enable them to verify that points (i), (ii) and (iii) are complied with; or~~

- 1 The pool of at least 100 potentially securitised exposures from which retained non-securitised and securitised exposures are to be randomly selected, as referred to in point (c) of Article 6(3) of Chapter 2, shall be sufficiently diverse to avoid an excessive concentration of the retained interest. [Deleted]
 - 2 When selecting the exposures referred to in paragraph 1, retainers shall take into account quantitative and qualitative factors that are appropriate for the type of securitised exposures to ensure that the distinction between retained non-securitised and securitised exposures is random. For that purpose, and where relevant, retainers shall take into consideration the following factors when selecting exposures:
 - ~~(a) the time of the origination of the loan (vintage);~~
 - ~~(b) the type of securitised exposures;~~
 - ~~(c) the geographical location;~~

- 4 ~~Where the retainer is the *securitisation's servicer*, the selection conducted in accordance with this Article shall not lead to a deterioration in the servicing standards applied by the retainer on the transferred exposures relative to the retained exposures.~~~~[Deleted]~~

ARTICLE 7 RETENTION OF THE FIRST LOSS TRANCHE ~~[DELETED]~~

- 1 ~~The retention of the *first loss tranche* referred to in point (d) of Article 6(3) of Chapter 2 may be fulfilled by holding either on-balance sheet or off-balance sheet positions and by any of the following methods:~~

 - ~~(ii) the exposure constitutes a first loss position in relation to the securitisation;~~
 - ~~(iii) the exposure covers the credit risk for the entire duration of the retention commitment;~~
 - ~~(iv) the exposure is provided by the retainer; and~~
 - ~~(v) the *investors* have been given access within the initial disclosure to all information necessary to verify that points (i) to (iv) are complied with; or~~

- 2 ~~Where the *first loss tranche* exceeds 5% of the nominal value of the securitised exposures, the retainer may chose to retain a pro-rata portion of such *first loss tranche* only, provided that that portion is equivalent to at least 5% of the nominal value of the securitised exposures.~~~~[Deleted]~~

ARTICLE 8 RETENTION OF A FIRST LOSS EXPOSURE OF NOT LESS THAN 5% OF EVERY SECURITISED EXPOSURE ~~[DELETED]~~

- 1 ~~The retention of a first loss exposure at the level of every securitised exposure as referred to in point (e) of Article 6(3) of Chapter 2 shall only be considered to be fulfilled where the retained credit risk is subordinated to the credit risk securitised in relation to the same exposures.~~~~[Deleted]~~
- 2 ~~By way of derogation from paragraph 1 of this Article, the retention of a first loss exposure at the level of every securitised exposure as referred to in point (e) of Article 6(3) of Chapter 2 may also be fulfilled through the sale by the *originator* or *original lender* of the underlying exposures at a discounted value where each of the following conditions is met:~~
- ~~(a) the amount of the discount is not less than 5% of the nominal value of each exposure; and~~
 - ~~(b) the discounted sale amount is refundable to the *originator* or *original lender* only if, that discounted sale amount is not absorbed by losses related to the credit risk associated to the securitised exposures.~~~~[Deleted]~~

ARTICLE 9 APPLICATION OF THE RETENTION OPTIONS ON NPE SECURITISATIONS

[DELETED]

- 1 In the case of *NPE securitisations* as referred to in Article 6(3A) of Chapter 2, for the purposes of applying Article 4(1)(a) and Articles 5 to 8 of this Chapter to the share of *non-performing exposures* in the pool of underlying exposures of a *securitisation*, any reference to the nominal value of the securitised exposures shall be construed as a reference to the net value of the *non-performing exposures*.~~[Deleted]~~
- 2 For the purposes of Article 6 of this Chapter, the net value of the retained *non-performing exposures* shall be calculated using the same amount of the *non-refundable purchase price discount* that would have been applied had the retained *non-performing exposures* been securitised.~~[Deleted]~~
- 3 For the purposes of Article 4(1)(a), Article 5 and Article 8 of this Chapter, the net value of the retained part of the *non-performing exposures* shall be computed using the same percentage of the *non-refundable purchase price discount* that applies to the part that is not retained.~~[Deleted]~~
- 4 Where the *non-refundable purchase price discount* as referred to in the second subparagraph of Article 6(3A) of Chapter 2 has been agreed at the level of the pool of underlying *non-performing exposures*, the net value of individual securitised *non-performing exposures* included in the pool or sub-pool, as applicable, shall be calculated by applying a corresponding share of the *non-refundable purchase price discount* agreed at pool or sub-pool level to each of the securitised *non-performing exposures* in proportion to their nominal value or, where applicable, their outstanding value at the time of origination.~~[Deleted]~~
- 5 Where the *non-refundable purchase price discount* includes the difference between the nominal amount of one *tranche* or several *tranches* of a *NPE securitisation* underwritten by the *originator* for subsequent sale and the price at which that *tranche* or those *tranches* are first sold to unrelated third parties as referred to in the second subparagraph of Article 6(3A) of Chapter 2, that difference shall be taken into account in the calculation of the net value of individual securitised *non-performing exposures* by applying a corresponding share of the difference to each of the securitised *non-performing exposures* in proportion to their nominal value.~~[Deleted]~~

ARTICLE 10 MEASUREMENT OF THE LEVEL OF RETENTION [DELETED]

- 1 When measuring the level of retention of the net economic interest, the following criteria shall be applied:

 - (b) where the calculation of the level of retention is based on nominal values, it shall not take into account the acquisition price of assets;
 - (c) finance charge collections and other fee income in respect of the securitised exposures net of costs ('excess spread') shall not be taken into account when measuring the retainer's net economic interest; and
 - (d) the retention option and methodology used to calculate the net economic interest shall not be changed during the life of a *securitisation* transaction, unless exceptional circumstances require a change and that change is not used as a means to reduce the amount of the retained interest.~~[Deleted]~~
- 2 The retainer shall not be required to replenish or readjust its retained interest to at least 5% as losses are realised on its retained exposures or allocated to its retained positions.~~[Deleted]~~

 - (a) is not against the credit risk of either the retained *securitisation positions* or the retained exposures; or
 - (b) is undertaken prior to the *securitisation* as a prudent element of credit granting or risk management and does not create a differentiation for the retainer's benefit between the credit risk of the retained *securitisation positions* or exposures and the *securitisation positions* or exposures transferred to investors. [Deleted]
- 2 The retainer may use retained exposures or *securitisation positions* as collateral for secured funding purposes including, where relevant, funding arrangements that involve a sale, transfer or other surrender of all or part of the rights, benefits or obligations arising from the retained net economic interest, provided that such use as collateral does not transfer the exposure to the credit risk of those retained exposures or *securitisation positions* to a third party. [Deleted]

ARTICLE 15 ARRANGEMENTS OR EMBEDDED MECHANISMS [DELETED]

- 1 ~~Retainers shall not use arrangements or embedded mechanisms in the securitisation by virtue of which the retained interest at origination would decline faster than the interest transferred. In the allocation of the cash flows, the retained interest shall not be prioritised to preferentially benefit from being repaid or amortised ahead of the transferred interest.~~[Deleted]
- 2 ~~The amortisation of the retained interest via cash flow allocation set out in paragraph 1 or through the allocation of losses that, in effect, reduce the level of retention over time, shall be allowed.~~[Deleted]

ARTICLE 16 FULFILMENT OF THE RETENTION REQUIREMENT IN SECURITISATIONS OF OWN ISSUED DEBT INSTRUMENTS [DELETED]

- 1 ~~Where an entity securitises its own issued debt instruments, including covered bonds as defined in the FCA Handbook, and the underlying exposures of the securitisation comprise exclusively those own issued debt instruments, the retention requirement in Article 6(1) of Chapter 2 shall be considered complied with.~~[Deleted]

ARTICLE 17 RETENTION REQUIREMENT ON RESECURITISATIONS [DELETED]

 - ~~(c) there is no maturity mismatch between the underlying securitisation positions or exposures and the resecuritisation.~~[Deleted]
- 3 ~~A fully supported ABCP programme which meets the requirements of Article 8(4) of Chapter 2 shall not be deemed a resecuritisation for the purposes of this Article.~~[Deleted]

Amendments to the Securitisation (CRR) Part

In this Annex, new text is underlined and deleted text is struck through.

3 SECURITISATION (CRR) PART

...

ARTICLE 249 RECOGNITION OF CREDIT RISK MITIGATION FOR SECURITISATION POSITIONS

...

- 3C. Where the *Parameter Substitution Method* is used to determine the effect of the credit risk protection, the following modifications shall apply to the application of Article 236 of the Credit Risk Mitigation (CRR) Part:

...

- (c) for the purpose of determining the risk weight of the covered part of the exposure (r_d), the LGD of the exposure shall be 100%—calculated as if there was no credit protection (LGD) shall be 100%, except as provided for in Article 260A;

...

...

ARTICLE 260A TREATMENT OF QUALIFYING SECURITISATIONS UNDER THE SEC-IRBA

1. By way of derogation from Article 259, this Article applies when calculating the risk-weighted exposure amount for a position in a *qualifying securitisation* using point (c) of Article 245(1).
2. Under the SEC-IRBA, the risk-weighted exposure amount for a position in a *qualifying securitisation* using point (c) of Article 245(1) shall be calculated by multiplying the exposure value of the position as calculated in accordance with Article 248 by a risk weight equal to the sum of:
 - (a) the risk weight that would be calculated under Article 154 of the Credit Risk: Internal Ratings Based Approach (CRR) Part in respect of the underlying exposure as if it had not been securitised; and
 - (b) the expected loss calculated under Article 158 of the Credit Risk: Internal Ratings Based Approach (CRR) Part in respect of the underlying exposure as if it had not been securitised multiplied by 12.5.
3. For the purpose of point (c) of Article 249(3C), where relevant, the institution may, if it is not applying the adjustment set out in paragraph 4, choose to use the LGD which would be calculated under the Credit Risk: Internal Ratings Based Approach (CRR) Part in respect of the underlying exposure as if it had not been securitised in place of 100%.
4. Where:
 - (a) there are two tranches in the qualifying securitisation and the originator institution holds the entirety of the senior tranche; and
 - (b) the originator institution's rating system that is used to produce the LGD estimate for the underlying exposure as if it had not been securitised includes estimates of at least the following components:

- (i) the probability that the real estate on which the exposure is secured is repossessed, conditional on default having occurred ('the probability of possession given default component'); and
- (ii) the loss incurred by the institution conditional on the real estate on which the exposure is secured having been repossessed ('the loss given possession component')

the originator institution may adjust the loss given possession component as set out in paragraphs 5 to 8 to reflect recoveries that would be received under the credit protection in the event the real estate on which the exposure is secured is repossessed. The LGD estimate resulting from this adjustment may be used for the purpose of determining the risk-weighted exposure amount referred to in paragraph 2 for the senior *tranche* of the *qualifying securitisation*.

5. For the purposes of the adjustment in paragraph 4, the institution shall, subject to paragraphs 6 to 8, apply the following formulaic adjustment to the estimate of the loss given possession component:

$$LGP_A = \frac{LGP * EAD - R_p}{EAD - R_p}$$

where:

LGP is the loss given possession for the underlying exposure (pre-adjustment), expressed as a proportion of EAD.

LGP_A is the loss given possession post adjustment

EAD is the expected amount outstanding at default of the underlying exposure; and

R_p is the recoveries that would be received under the credit protection in the event the real estate on which the exposure is secured is repossessed, calculated in accordance with Article 233 of the Credit Risk Mitigation (CRR) Part and subsequently reduced for material discount effects and material direct and indirect costs associated with realising the credit protection.

6. Before applying the adjustment in paragraph 4 and regularly thereafter, the institution shall assess, in accordance with paragraph 7, whether the adjusted LGD estimate resulting from the formula in paragraph 5 underestimates LGD of the underlying exposure. Where underestimation is identified, the institution shall increase the adjusted loss given possession component referred to in paragraph 4 to eliminate that underestimation.
7. For the purpose of the assessment in paragraph 6, the LGD of the underlying exposure shall:
- (a) be measured conditional on the provider of the credit protection meeting its contractual obligations in relation to the credit protection;
 - (b) reflect material discount effects and material direct and indirect costs of realising the credit protection; and
 - (c) reflect downturn economic conditions, as identified by the institution for the underlying exposure in accordance with Article 181A(1) of the Credit Risk: Internal Ratings Based (CRR) Part.
8. An adjustment to the estimate of the loss given possession component shall not:
- (a) exceed the value of the unfunded credit protection;

(b) result in an adjusted value of *LGD* that is below the input floor value set out in Article 164(4)(a) of the Credit Risk: Internal Ratings Based Approach (CRR) Part;

(c) result in a value for the loss given possession component that is below zero.

9. An institution applying the adjustment in paragraph 4 shall:

(a) regularly validate the resulting *LGD* estimate and use the results of that validation to inform the assessment referred to in paragraph 6;

(b) collect and store data on the realised recoveries from the credit protection and use such data to inform the assessment referred to in paragraph 6 and to undertake the validation referred to in point (a);

(c) have clear and effective policies and procedures for the assessment referred to in paragraph 6; and

(d) ensure that the adjustment and validation process is approved by the institution's management body or a designated committee thereof. These parties shall possess a general understanding of the adjustment and detailed comprehension of its associated management reports.

...

ARTICLE 269 RESECURITISATIONS

1. Subject to paragraph (5) below, for a position in a *resecuritisation*, institutions shall apply the SEC-SA in accordance with Article 261, with the following changes:

(a) $W = 0$ for any exposure to a *securitisation tranche* within the pool of underlying exposures;

(b) $p = 1.5$;

(c) the resulting risk weight shall be subject to a risk-weight floor of 100%.

...

5. In the case of a *resecuritisation* that is permitted under either point (c) or (d) of Article 8(1), an institution may, instead of applying the capital treatment under paragraphs (1) to (4) above, apply the following:

(a) in relation to point (c), for each *resecuritisation position*, calculate the capital requirement in accordance with the Securitisation (CRR) Part as if each underlying senior position were a pro rata share of the related underlying exposures; and

(b) in relation to point (d), apply the capital treatment required by this Securitisation (CRR) Part to each *securitisation position* as if none of the underlying exposures were *tranché* and not taking account of the associated credit protection.

The resulting risk weights determined under both sub-paragraphs (a) and (b) above shall be subject to a risk-weight floor of 15%.

1 APPLICATION AND DEFINITIONS

...

1.2 In this Part, the following definitions apply:

forbearance measure

~~means a concession by an institution towards an obligor that is experiencing or is likely to experience difficulties in meeting its financial commitments, where:~~

- ~~(1) a concession may entail a loss for the lender and shall refer to either of the following actions:~~
 - ~~(a) a modification of the terms and conditions of a debt obligation, where such modification would not have been granted had the obligor not experienced difficulties in meeting its financial commitments;~~
 - ~~(b) a total or partial refinancing of a debt obligation, where such refinancing would not have been granted had the obligor not experienced difficulties in meeting its financial commitments;~~
- ~~(2) at least the following situations shall be considered forbearance measures:~~
 - ~~(a) new contract terms are more favourable to the obligor than the previous contract terms, where the obligor is experiencing or is likely to experience difficulties in meeting its financial commitments;~~
 - ~~(b) new contract terms are more favourable to the obligor than contract terms offered by the same institution to obligors with a similar risk profile at that time, where the obligor is experiencing or is likely to experience difficulties in meeting its financial commitments;~~
 - ~~(c) the exposure under the initial contract terms was classified as non-performing before the modification to the contract terms or would have been classified as non-performing in the absence of modification to the contract terms;~~
 - ~~(d) the measure results in a total or partial cancellation of the debt obligation;~~
 - ~~(e) the institution approves the exercise of clauses that enable the obligor to modify the terms of the contract and the exposure was classified as non-performing before the exercise of those clauses, or would be classified as non-performing were those clauses not exercised;~~
 - ~~(f) at or close to the time of the granting of debt, the obligor made payments of principal or interest on another debt obligation with the same institution, which was classified as a *non-performing exposure* or would have been classified as non-performing in the absence of those payments;~~
 - ~~(g) the modification to the contract terms involves repayments made by taking possession of collateral, where such modification constitutes a concession.~~
- ~~(3) the following circumstances are indicators that forbearance measures may have been adopted:~~

- (a) ~~the initial contract was past due by more than 30 days at least once during the three months prior to its modification or would be more than 30 days past due without modification;~~
- (b) ~~at or close to the time of concluding the credit agreement, the obligor made payments of principal or interest on another debt obligation with the same institution that was past due by 30 days at least once during the three months prior to the granting of new debt;~~
- (c) ~~the institution approves the exercise of clauses that enable the obligor to change the terms of the contract, and the exposure is 30 days past due or would be 30 days past due were those clauses not exercised;~~
- (4) ~~the difficulties experienced by an obligor in meeting its financial commitments shall be assessed at obligor level, taking into account all the legal entities in the obligor's group which are included in the accounting consolidation of the group, and natural persons who control that group.~~

[Note: This rule corresponds to Article 47b of the *CRR* as it applied immediately before its revocation by the *Treasury*]

Non-performing exposure or NPE

means:

- (1) ~~any of the following:~~
 - (a) ~~an exposure in respect of which a default is considered to have occurred in accordance with the Credit Risk: Internal Ratings Based Approach (CRR) Part Article 178;~~
 - (b) ~~an exposure which is considered to be impaired in accordance with the applicable accounting framework;~~
 - (c) ~~an exposure under probation in accordance with paragraph (6) below, where additional forbearance measures are granted or where the exposure becomes more than 30 days past due;~~
 - (d) ~~an exposure in the form of a commitment that, were it drawn down or otherwise used, would likely not be paid back in full without realisation of collateral;~~
 - (e) ~~an exposure in the form of a financial guarantee that is likely to be called by the guaranteed party, including where the underlying guaranteed exposure meets the criteria to be considered as non-performing.~~
- (2) ~~For the purposes of point (1)(a), where an institution has on-balance-sheet exposures to an obligor that are past due by more than 90 days and that represent more than 20% of all on-balance-sheet exposures to that obligor, all on- and off-balance-sheet exposures to that obligor shall be considered to be non-performing.~~
- (3) ~~Exposures that have not been subject to a forbearance measure shall cease to be classified as non-performing where all the following conditions are met:~~
 - (a) ~~the exposure meets the exit criteria applied by the institution for the discontinuation of the classification as impaired in accordance with the applicable accounting framework and of the classification as defaulted in accordance with Credit Risk: Internal Ratings Based Approach (CRR) Part Article 178;~~
 - (b) ~~the situation of the obligor has improved to the extent that the institution is satisfied that full and timely repayment is likely to be made;~~
 - (c) ~~the obligor does not have any amount past due by more than 90 days.~~

Appendix 1

- ~~(4) The classification of a *non-performing exposure* as a non-current asset held for sale in accordance with the applicable accounting framework shall not discontinue its classification as *non-performing exposure*.~~
- ~~(5) *Non-performing exposures* subject to *forbearance measures* shall cease to be classified as non-performing where all the following conditions are met:~~
- ~~(a) the exposures have ceased to be in a situation that would lead to their classification as non-performing under the provisions above;~~
 - ~~(b) at least one year has passed since the date on which the *forbearance measures* were granted and the date on which the exposures were classified as non-performing, whichever is later;~~
 - ~~(c) there is no past due amount following the *forbearance measures* and the institution, on the basis of the analysis of the obligor's financial situation, is satisfied that full and timely repayment of the exposure is likely. Full and timely repayment may be considered likely where the obligor has executed regular and timely payments of amounts equal to either of the following:~~
 - ~~(i) the amount that was past due before the *forbearance measure* was granted, where there were amounts past due;~~
 - ~~(ii) the amount that has been written off under the *forbearance measures* granted, where there were no amounts past due.~~
- ~~(6) Where a *non-performing exposure* has ceased to be classified as non-performing pursuant to paragraph (5) above, such exposure shall be under probation until all the following conditions are met:~~
- ~~(a) at least two years have passed since the date on which the exposure subject to *forbearance measures* was re-classified as performing;~~
 - ~~(b) regular and timely payments have been made during at least half of the period that the exposure would be under probation, leading to the payment of a substantial aggregate amount of principal or interest;~~
 - ~~(c) none of the exposures to the obligor is more than 30 days past due.~~
- ~~[Note: This rule corresponds to Article 47a(3) to (7) of the *CRR* as it applied immediately before its revocation by the *Treasury*]~~
