IM.00 – Internal model risk output - Content of the submission and Basic information

General comment

This document provides instructions to complete the set of IM.00 templates. The set of templates can be split into two types: content of the submission and basic information.

Content of Submission

The content of the submission templates have the following entry points: IM.00.01.01 and IMR.00.01.01.

IM.00.01.01 is applicable to all firms

IMR.00.01.01 is applicable to firms where there is reporting by ring-fenced fund.

For each data point in the content of submission templates, one of the options in the following closed list shall be used:

1 – Reported

2 – Not reported as no RFF / MAP / with-profits fund

3 – Not reported as business covered by template is not carried on by the firm. (Eg a firm that carries on no life business would use this option for the IM.01 template).

6 – Exempt under Supervisory statement SS25/15. (A firm that carries on no life business would use this option for the IM.02 template.)

7 – Not reported as partial internal model used to calculate SCR and the outputs to which the template relates are not in scope of the partial internal model.

0 – Not reported other reason (in this case special justification is needed, the explanation is not to be submitted within the reporting template but shall be part of the dialogue between undertakings and national competent authorities).

Basic information

The basic information templates have the following entry points: IM.00.02.01 and IM.00.03.01

IM.00.02.01 is applicable to all firms

IM.00.03.01 is applicable to firms where there is reporting by ring-fenced fund

All ring-fenced (whether matching adjustment portfolio, with-profits funds, other) shall be identified for IMR.02, IMR.03.08, MOR.03.08. Firms should report all ring-fenced funds, noting that some with-profits funds may not be a ring-fenced fund for Solvency II purposes and some ring-fenced funds may not be a with-profits fund.
