

National specific template Log NS.08 – business model analysis - financial guarantee insurers

General Comments

This annex contains additional instructions in relation to national specific template NS.08. The first column of the next table identifies the items to be reported by identifying the columns and lines as shown in the template.

This annex relates to annual submission of information for individual entities.

The general purpose of this template is to collect sufficient information about the portfolio of securities against which financial guarantees have been given to facilitate business model analysis.

All amounts are expressed in units of the currency used for reporting in accordance with the Implementing Technical Standard on Reporting. Where an underlying issue is denominated in a different currency, the monetary amounts of exposures, premium assets and claims liabilities must be converted in accordance with Article 3 of the Implementing Technical Standard on Reporting.

C0170	Expected loss given default	Percentage of loss given default used in the calculation of the best estimate of future claims within premium provisions.

CELL(S)	ITEM	INSTRUCTIONS
C0180	Probability of default	Percentage of expected probability of default used in the calculation of the best estimate of future claims within premium provisions.
C0190	Internal rating	Internal rating used in the solvency capital requirement (SCR)/minimum capital requirement (MCR) calculations.
C0200	Watchlist	“Y” if on firm’s Watchlist; “N” otherwise
C0210	Mean term	Calculate using the present value of the expected cash flows, aggregated at not less than yearly intervals.
C0220	Inception date	Identify the ISO 8601 (yyyy-mm-dd) code of the date the guarantee came into force.
C0230	Expected maturity date	Identify the ISO 8601 (yyyy-mm-dd) code of the maturity date of the security. This corresponds to the expected maturity used in the calculation of the future premium and the best estimate of future claims within premium provisions.
C0240	Currency	Identify the ISO 4217 alphabetic code of the currency of the issue
C0250	Gross par exposure	The amount guaranteed as at the reporting date, but reduced by the amount of the provision for claims. For securities performing within acceptable parameters, it may be assumed that all due payments will have been made prior to the reporting date.
C0260-C0750	Financial year end dates	Financial year end i years after the reporting date, where i corresponds to the number in the label. May be left blank where no current guarantee is in force during that financial year. Not strictly necessary, because these dates can be computed automatically, but undertakings may find it easier to download data by reference to a financial year than by reference to a number of years after a (variable) reporting date.
C0010 (under NS.08.01.01.03)	ID Code	An entry is required on this line for every guarantee in force at the reporting date. This must be the same code as entered in the list of exposures for the same guarantee.
C0760-C1250	Gross par exposure in future years	The amount expected to be guaranteed at the end of each subsequent financial year, but reduced by the amount of the provision for claims. For securities performing within acceptable parameters, it may be assumed that all due payments will have been made prior to the end of the respective financial year. May be left blank where no current guarantee is in force during that financial year.

C0010 (under NS.08.01.01.04)	ID Code	<p>An entry is required on this line for every guarantee in force at the reporting date, for which there is a future stream of premium income.</p> <p>This must be the same code as entered in the list of exposures for the same guarantee. However, it is not necessary to enter codes for which there is no future premium.</p>
C1260	Outstanding premium	<p>The amount is the sum of the premium receivable in each future year, and is calculated automatically.</p>
C1270-C1760	Premium receivable in each future year	<p>The amount of premium receivable in each future year, according to contract, without any discounting for the timing of receipt, and before any allowance for non-receipt. Where the amount of premium receivable is not a sum certain, then the amount should be estimated on the basis of mean expected performance and should be estimated consistently with the gross par exposure in the corresponding future year. The amounts will be consistent with the aggregate cash flows reported in S.18.01b.</p> <p>May be left blank where no current guarantee is in force during that financial year.</p>
C0010 (under NS.08.01.01.05)	ID Code	<p>An entry is required on this line for every guarantee in force at the reporting date, for which there is a future stream of claim payments / subrogation recoveries.</p> <p>This must be the same code as entered in the list of exposures for the same guarantee. However, it is not necessary to enter codes for which there is no provision for claims.</p>
C1770	Provision for claims	<p>The amount is the sum of the claims payable in each future year, and is calculated automatically.</p>
C1780-C2270	Claims payable in each future year	<p>Amounts payable before any reinsurance recoveries, without any discounting for the timing of payment, on a best estimate basis, for non-performing securities. The amounts will be consistent with the aggregate cash flows reported in S.18.01b.</p> <p>May be left blank where no current guarantee is in force during that financial year.</p>
