#### Symbols and conventions

- . . . not available
  - nil or less than half the final digit shown.
  - figures above and below are not strictly comparable.
- Owing to rounding of figures, the sum of the separate items will sometimes differ from the total shown.
- "British government stocks" includes government guaranteed stocks (principally those of the nationalised industries).

#### Changes in this issue

##### **Table 13: Analysis of advances**

The quarterly analysis of advances by members of the British Bankers' Association [Table 13 (1)] has been superseded from February 1967 by a new quarterly analysis covering all banks in Great Britain [Table 13 (2)], which was introduced in a note in the March *Bulletin*.

##### **Table 17: Investment trusts**

Gross transactions by the trusts in quoted ordinary and deferred securities of U.K. companies are now shown in the additional notes.

##### **Table 18: Unit trusts**

Net sales of units are now shown in the table, and gross transactions by the trusts in quoted ordinary and deferred securities of U.K. companies in the additional notes.

##### **Table 21: U.K. external liabilities and claims in sterling**

The figures of overseas sterling area countries' holdings of British government stocks have been revised to include stocks held outside the United Kingdom by certain overseas banks.

a The periods shown are financial years ended 31 March and calendar quarters.

b For economic classification see Table 2.

c Net change in the official gold and currency reserves (increase -/decrease +), other than the increase arising from the transfer, in February 1966, of 316 from the Government's portfolio of dollar securities.

d The Banking Department's holdings of government debt and of notes and coin, less the deposits of the Exchequer and the Paymaster General with the Bank.

e Including +54 in the quarter ended March 1966, and -54 in the following quarter, in the Banking Department's holdings of government debt resulting from a special swap with the U.S. authorities and its repayment.

f Before the quarter ended June 1966 the figures were included under "other holders".

g See additional notes to Table 3 (2).

<sup>a</sup> Including estimated accrued interest to date.

<sup>b</sup> The figures for this and subsequent quarters are affected by transfers from ordinary accounts with the P.O.S.B. to special accounts, see additional notes.

<sup>c</sup> From 27 June 1966 figures for issues to "persons" relate to personal certificates and those for issues to "other" holders to company certificates; previously "persons" covered partnerships and private firms as well as individuals, and "other" holders included companies, building societies, co-operatives, nationalised industries and local authorities.

<sup>d</sup> Issues to "persons" are no longer adjusted for timing (the adjustment in the quarter ended June 1966 would have been -0.1), see additional notes.

<sup>a</sup> Including the sterling equivalent of items in other currencies.

<sup>b</sup> Including currencies of overseas sterling countries.

<sup>c</sup> Including ten new contributors, see additional notes.

<sup>d</sup> From March 1966 the overseas banks' balances on inter-branch accounts were reported net, whereas they had previously been mainly gross. Sterling deposits by, and advances to, overseas residents were thus each reduced by some 60. The change affected mainly "British overseas and Commonwealth banks" [Table 12 (1)] and "Other banks" [Table 12 (4)].

<sup>e</sup> From June 1966 includes issues of negotiable certificates of deposit, see additional notes.

<sup>a</sup> The number of trusts making returns varies from quarter to quarter, see additional notes.

<sup>b</sup> Investments are recorded when the contract is entered into (or the asset repaid). Positive figures indicate a net rise in assets or a fall in liabilities.

<sup>c</sup> Quoted securities are all valued at market prices except in the maturity classification, where values are nominal; unquoted securities are at current values and bills and mortgages at maturity values.

<sup>d</sup> Of which, in the United States, 21.0; Canada, 4.4; the sterling area, 12.2; other countries, 5.4.

<sup>e</sup> Of which, in the United States, 22.8; Canada, 4.5; the sterling area, 21.2; other countries, 5.5.

<sup>f</sup> Gross transactions in quoted ordinary and deferred securities of U.K. companies, included in these figures, are shown separately in the additional notes.

<sup>a</sup> Excluding overseas sterling area currencies, see additional notes.

<sup>b</sup> Including deposits with the Crown Agents for Oversea Governments and Administrations and with certain other financial institutions.

<sup>c</sup> The breakdown by area is partly estimated. Figures for local authorities comprise temporary loans; mortgages are excluded.

<sup>d</sup> Including Rhodesia up to the end of 1965 and Burma up to the end of 1966; thereafter these are included in non-sterling countries.

<sup>e</sup> See footnote <sup>d</sup>.

<sup>f</sup> Including, under Treasury bills, non-interest-bearing notes; see additional notes.

<sup>a</sup> Sterling held by residents outside the Scheduled Territories, available only for the purchase of sterling securities with not less than five years to run. Quotations ceased as from 12 April 1967, following the unification of the security sterling market with the official exchange market. (See page 121.)

<sup>b</sup> Foreign currency (expressed in terms of U.S. dollars) held by U.K. residents and available for the purchase of quoted foreign currency securities and approved direct investment in non-sterling countries.

<sup>c</sup> Calculated to the nearest  $\frac{1}{4}$  cent and shown as a decimal.

<sup>d</sup> Market selling rate in New York for 91-day Treasury bills.

<sup>e</sup> For Treasury bills, a representative London discount market selling rate for 91-day bills after the weekly tender. For local authority temporary loans and finance house deposits, the mean of the spread of rates shown in Table 25 (see footnotes e and f to that table).

<sup>f</sup> These columns provide only broad comparisons, rounded to the nearest .05%. The differences are obtained by deducting the forward premium (per cent per annum) on U.S. dollars from the appropriate U.K. rates.

a Average rate of discount on allotment for 91-day bills at the weekly tender.

b Rate calculated (to nearest  $\frac{1}{16}$ %) from the price at which the market bids for, and is allotted, 91-day bills.

c The rate at which trade bills are discounted depends upon their quality. The figures shown are market rates for bills of good average quality. Some trade bills are discounted at lower rates.

d Minimum rate of interest charged for loans to the discount market.

e For a minimum term of three months and thereafter at seven days' notice.

f Spread of 'fixed' rates quoted for new deposits of a fixed term of three months by some of the main hire purchase finance houses. Rates are to some extent subject to negotiation and different rates may be paid on large amounts. The rate for December 1965 relates to Monday, 3 January 1966.

<sup>a</sup> See additional notes.

<sup>b</sup> From August 1965 earnings are taken as gross profit less corporation tax (at 40%), other charges and gross preference dividends. Before that date earnings were taken as net profit (gross profit less income tax, profits tax, other charges and net preference dividends) grossed up for income tax.

## Additional notes to the tables

### Sources

Statistics taken from publications of H.M. Government are reproduced by permission of the Controller of H.M. Stationery Office. Particular acknowledgement is made to H.M. Treasury for the use of the figures of Exchequer financing in Table 1 and of the nationalised industries in Tables 9 and 13.

Acknowledgement is also made to the banks and other institutions which have made material available to the Bank, and to the following bodies which have allowed the Bank to reprint statistics compiled by them or have assisted the Bank in the collection of statistics from their members:

### Table 1: Exchequer

This table provides a summary, for calendar quarters and financial years, of all transactions affecting the Exchequer, and analyses Exchequer borrowing according to the source of the funds borrowed. It classifies Exchequer transactions in three main categories. First, it shows the net amount paid out, or received, on account of revenue and expenditure, the net amount of Consolidated Fund loans and the net change in extra-Exchequer funds. The aggregate of these items, called the central government's net balance, is a measure of the net expenditure (including lending) of the central government as a whole resulting broadly from decisions of a budgetary nature. Secondly, the table brings together under the heading "external transactions" any net cost or gain to the Exchequer resulting from the Exchange Equalisation Account's purchases or sales of gold and foreign exchange (as measured by the change in the official reserves), any increase or decrease in overseas holdings of government stocks and Treasury bills, and any change in other forms of debt to overseas. Together these items represent the impact on the Exchequer's domestic financing of overseas transactions of the country as a whole. Finally the table analyses the Exchequer's domestic borrowing to show changes in both the banks' and other domestic holdings of notes, coin and government debt. The domestic borrowing is equal to the sum of the central government's net balance and the external transactions.

Although the table is, in principle, a sterling cash account, derived mainly from statements of account, the division between domestic and overseas holdings of government stocks and Treasury bills is not exact. Some unidentified changes in overseas holdings may be included among the residual figures for domestic holdings, but the amounts involved are thought not to be very large.

A fuller description of this table was given in an article in the March 1966 *Bulletin*, page 29.

### Table 2: Central government

This table gives an economic classification of transactions which make up the central government's net balance in Table 1. It is a summary of the current and capital accounts of the central government, published by the Central Statistical Office in *Financial Statistics*.

### Table 3: Analysis of government debt

**1 Marketable debt** This section gives a further analysis by type of holder of the changes, included in Table 1, in the amount of government stocks and Treasury bills held by overseas holders, the banking sector and other domestic holders. Changes in holdings of stocks are shown at cash value except for those of the banking sector, where the figures relate mainly to changes in book value - any difference between the book and cash value being reflected in the residual figures for "other holders".

The figures for overseas holders, as in Table 1, are based partly on the series of U.K. external liabilities and claims in sterling (Table 21) and partly on information extracted from the registers of government stocks; they should not be regarded as more than estimates - any error being reflected in the figures for "other holders". "Central monetary institutions" covers the holdings of central banks, currency boards, the General and Note Security Funds of the Crown Agents, the Bank for International Settlements, and a few other accounts known to be used for central monetary purposes.

The table includes a maturity analysis of official transactions in government stocks. In this analysis stocks with optional redemption dates are classified according to the final date, and 4% Victory Bonds according to the average life to maturity; where stocks are converted, both sides of the operation are included, each in the appropriate category.

**2 National savings** This table, derived from National Savings Committee statistics, analyses the figures for national savings in Table 1. Changes in deposits with the special investment departments of the trustee savings banks and in investment accounts of the Post Office Savings Bank are excluded because they do not directly affect the Exchequer: that part of their funds which is invested in government debt is included in Table 1 under "other holders: marketable debt". The figures for this heading in Table 1, and for national savings, are therefore affected by transfers from ordinary savings bank accounts to the special accounts. The approximate totals of such transfers within the P.O.S.B. were: quarter ended June 1966, £7 million; September, £14 million; December, £14 million; March 1967, £12 million.

**3 Tax reserve certificates** In June 1966 separate certificates were introduced for persons and for companies – at different rates of interest and usable in settlement of different taxes. The opportunity was then taken, in the figures for the quarter ended June 1966, to change the form of the statistics.

Previously, the figures for "other" holders had been the residual between total issues and surrenders of tax reserve certificates and issues to, and surrenders by, "persons" as shown in the Bank of England's records – and this residual had been affected by a timing adjustment applied to figures for persons. This adjustment was made so that the figures could be used with other statistics of personal savings in the national income accounts; applications from persons received at the Bank during the first three working days of a quarter were included with the figures for the previous quarter. As most applications for certificates reach the Bank through a commercial bank, the applicant's bank account is debited a few days before the subscription is transferred to the Exchequer: the timing adjustment therefore related the figures of issues to persons so far as possible to the date on which applicants paid for the certificates.

From 27th June 1966 the figures for issues to "persons" and to "other" holders relate strictly to the amounts received into the Exchequer on account of the two types of tax reserve certificates. The figures of surrenders, however, include the amounts paid out of the Exchequer on account of the previous type of certificate, which will continue to be surrendered for the next year or so: ultimately the figures of surrenders will be on the same basis as those of issues.

An article describing tax reserve certificates appeared in the September 1962 *Bulletin*, page 176.

**Table 4: Currency circulation**

Figures for the Bank of England and the London clearing banks relate to the average of Wednesdays in each month; those for the Scottish banks and the Northern Ireland banks relate to the average of Saturdays in periods of four consecutive weeks, as published in *The London Gazette* and *The Belfast Gazette* respectively, with as close a correspondence as possible to the calendar month.

Some of the figures for the latest months are provisional.

**Table 5: Bank of England**

Special Deposits are called by the Bank of England, under the scheme announced in July 1958, from the London clearing banks and the Scottish banks and are not at the banks' free disposal. A full description of the scheme was given in the December 1960 *Bulletin*, page 18. By the end of 1962 all the original calls had been released (see the March 1963 *Bulletin*, page 77). Subsequently calls were again made, on 29th April 1965 and 14th July 1966; on each occasion 1% was called from the London clearing banks and  $\frac{1}{2}$ % from the Scottish banks.

**Table 7: Discount market**

The discount market is defined as the members

of the London Discount Market Association. Holdings of British government stocks are given at nominal value.

Other domestic banks comprise the Northern Ireland banks (U.K. offices), C. Hoare & Company, Isle of Man Bank Limited, Lewis's Bank Limited, the English offices of the Royal Bank of Ireland Limited (there are no branches in Northern Ireland and therefore this bank is not regarded as a Northern Ireland bank), Yorkshire Bank Limited, and the Banking Departments of the Co-operative Wholesale Society Limited and the Scottish Co-operative Wholesale Society Limited. The figures for these banks were included in "other sources" before 30th June 1963.

Accepting houses and overseas banks comprise the institutions listed in the March 1966 *Bulletin*, page 96, as subsequently amended (see additional notes to Table 12). Before 30th June 1963 they were defined as banks whose main business was conducted outside the British Isles.

**Table 8: U.K. banking sector**

This table continues the series described in the December 1963 *Bulletin*, page 285. The figures, which are confined to U.K. offices of the reporting banks, are designed to show transactions between the banks and their non-bank customers. They therefore exclude the banks' own internal funds, all inter-bank items, and transactions between the banks and the discount market; and advances are shown without deduction of provisions for bad and doubtful debts.

The domestic banks are the London clearing banks, the Scottish banks, the Banking Department of the Bank of England, and the other domestic banks listed in the additional notes to Table 7. The Northern Ireland banks were unable to report figures for June 1966 owing to a strike of bank employees: the figures for March 1966 were therefore carried forward.

Accepting houses and overseas banks and the discount market comprise those institutions whose figures appear in Tables 10 and 7. The figures shown here differ from those in Tables 10 and 7, mainly because the items which are there shown together under "other assets" are here allocated to the appropriate headings.

Net deposits comprise current and deposit accounts, other than those held for U.K. banks and the discount market, plus credits in course of transmission, less cheques in course of collection and items in transit between offices of the same bank.

Net Exchequer indebtedness to the Banking Department is defined in footnote *d* to Table 1.

**Table 9: Domestic banks**

**1 London clearing banks** Net deposits are defined as gross deposits less (a) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (b) items in transit between offices of the same bank (see the article in the December 1963 *Bulletin*, page 285).

Total liquid assets comprise coin, notes and balances with the Bank of England (excluding Special Deposits), money at call and short notice, and bills discounted, which include refinancable export credits. The ratio of total liquid assets to gross deposits (the liquidity

ratio) is the clearing banks' conventional measure of their liquidity; it does not take account of the extent to which they may hold other assets of comparable liquidity (see the article in the December 1962 *Bulletin*, page 248).

The nationalised industries comprise those parts of the coal, transport, airways, gas and electricity industries which are in public ownership and to which bank advances may be made under Treasury guarantee. Figures are supplied by H.M. Treasury.

The method of seasonal adjustment was described in an article in the March 1966 *Bulletin*, page 46. The series should not be regarded as exact; moreover, it cannot take account of the changed pattern of tax payments in 1966 and 1967. It is given to the nearest £5 million. Estimates for the months after December 1966 are provisional.

The figures for April 1966 were affected by the transfer of the Irish business of the National Bank to the National Bank of Ireland on 31st March 1966; deposits with the National Bank fell by about £80 million and advances and investments by about £40 million and £20 million respectively.

**2 Scottish banks** Notes outstanding include the 'authorised' circulation, which was £2.7 million at all the dates shown; the remainder of this item is covered by holdings of Bank of England notes and coin.

Net deposits are defined as gross deposits less items in transit between offices of the same bank (see the article in the December 1963 *Bulletin*, page 285).

Total liquid assets comprise coin, notes and balances with the Bank of England (excluding Special Deposits), balances with other banks etc., money at call and short notice, and bills discounted, which include refinanceable export credits.

Coin, notes and balances with Bank of England include cover for Scottish bank notes in excess of the 'authorised' circulation (see above), and also banks' holdings of each other's notes.

Balances with other banks etc. include both balances with, and cheques in course of collection on, other banks in the United Kingdom.

**3 Northern Ireland banks** The figures relate to liabilities and assets of all banking offices situated within the United Kingdom, other than those of the National Bank.

Notes outstanding include the 'authorised' circulation, which was approximately £2 million at all the dates shown: the remainder of this item is covered by holdings of Bank of England notes and coin.

Coin, notes and balances with Bank of England include cover for the note issues of the Northern Ireland banks in excess of the 'authorised' circulation (see above), and also banks' holdings of each other's notes.

Balances with other banks etc. include balances with, and cheques in course of collection on, other banks in the United Kingdom and items in transit between offices of the same bank.

Figures in the present form were first collected in April 1963. Earlier figures, not entirely consistent with the present series, were given in previous issues of this *Bulletin*.

#### **Table 10: Accepting houses and overseas banks in the United Kingdom**

This table summarises the figures of the contributors to Tables 11 and 12, and gives separate figures for deposits (other than those of U.K. banks) and advances in sterling and in other currencies. The figures for other currencies are not comparable with those shown in Table 20; apart from minor differences of definition, the coverage of banks is less comprehensive and currencies of overseas sterling countries are included in this table but excluded from Table 20.

The figures for December 1963 are not comparable with those thereafter, because at March 1964 ten new contributors, previously treated by other contributors as U.K. companies, were included for the first time. The effect of their inclusion can be seen by comparing the two sets of figures for March 1964 which last appeared in the December 1964 *Bulletin*, page 316.

Negotiable certificates of deposit denominated in U.S. dollars were first issued in London during May 1966. End-quarter figures of certificates issued and outstanding (1966, June, £5 million; September, £45 million; December, £80 million; 1967, March, £88 million) are included in the total of deposit liabilities in non-sterling currencies to overseas residents.

#### **Table 11: Accepting houses**

#### **Table 12: Overseas banks in the United Kingdom**

The contributing institutions are those which, at the appropriate dates, were members of the following groups.

- Table 11 : The Accepting Houses Committee.
- Table 12 (1): The British Overseas and Commonwealth Banks Association.
- (2): The American banks in London.
- (3): The Foreign Banks and Affiliates Association.
- (4): The Japanese banks in London, and 34 other banks listed in the March 1966 *Bulletin*, page 96, as amended by the substitution of Keyser Ullmann Ltd. for Ullmann & Co. Ltd. and the addition of the United Bank of Kuwait (from December 1966) and Bank Melli Iran, Barclays Bank (France) Ltd. and National Commercial and Schroders Ltd. (from March 1967).

The figures cover the business of all offices of the banks within the United Kingdom. Brief notes are given below; fuller notes were published in the December 1962 *Bulletin*, page 267.

Current and deposit accounts include, in addition to the banks' deposit liabilities, their liabilities on loans and advances (including money at call and short notice) received from other U.K. banks, and their net liabilities on internal accounts to their offices, or to their head office, overseas. Sterling equivalents of foreign currency deposits are included.

Balances with other U.K. banks comprise all balances, in sterling and in foreign currency, with other U.K. banks, together with loans and advances to those banks (including any money at call or short notice). U.K. banks are defined as

the U.K. offices of the banks contributing to these tables together with the domestic banks whose figures appear in Table 8.

Loans to U.K. local authorities comprise funds placed with, and loans and advances made to, U.K. local authorities. Any money placed by the banks with local authorities where the banks are acting solely as agents and have no corresponding deposit liabilities is excluded.

The figures for British government stocks are given at book value or cost.

Advances comprise amounts outstanding in sterling and in foreign currency on loan and overdrawn accounts, and the banks' foreign currency balances with banks and financial institutions overseas. Loans to U.K. local authorities are excluded. The figures are shown without deduction of provisions for bad and doubtful debts, and exclude advances to other U.K. banks.

Other assets include sterling securities (other than sterling bills discounted and British government stocks), trade investments, and foreign currency assets not included elsewhere (such as investments and discounted bills denominated in currencies other than sterling).

**Table 13: Analysis of advances**

**1 British Bankers' Association** The figures relate to all advances made by member banks of the British Bankers' Association through offices located within Great Britain, irrespective of the borrower's country of residence. The figures for the London clearing banks and for the Scottish banks relate mainly to the third Wednesday in the month; those for other banks relate to various dates, mostly about the middle of the month. The definition of advances excludes bills discounted, foreign bills negotiated or bought, and impersonal or internal accounts. Except for the personal advances included in "personal and professional", the classification is based on the business of the borrower and no account is taken of the object of the advance or the nature of the security held.

Some seasonally adjusted figures for this series were first given in the September 1963 *Bulletin*, page 196; and later figures have been published regularly in *Financial Statistics*. The method of seasonal adjustment currently applied to this series was described in the September 1966 *Bulletin*, page 257.

The figures for November 1966 were the last in this series, which has been replaced by a new analysis of advances [Table 13 (2)].

**2 All banks in Great Britain** This new analysis is based so far as possible on the Standard Industrial Classification: there are twenty-five categories grouped under the broad headings of manufacturing, other production, financial, services, personal and overseas. Advances are classified by industry, irrespective of owner (i.e. private, local authority or government); and if an advance cannot be attributed to any particular activity, it is classed according to the main activity of the borrower – if necessary within the residual groups provided under the broad divisions. Advances to merchants, brokers, importers and exporters are included in the new category of "other distribution". Thus, although some headings in this new analysis are similar to those in the B.B.A. series,

the contents of most of these headings are by no means identical.

The new analysis covers all banks in Great Britain which contribute to the banking sector statistics (Table 8). It includes advances, both in sterling and foreign currencies, provided by banks to their customers; but does not include funds placed through the specialised financial markets with other banks (both in the U.K. and overseas) or with local authorities or finance houses.

A fuller description of the analysis was given in the March *Bulletin*, page 48.

**Table 14: Capital issues on the U.K. market**

The estimates relate to new money raised by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by local authorities and quoted public companies in the United Kingdom; and by overseas public authorities (including local authorities and international organisations) and companies. The estimates include U.K. local authority negotiable bonds (of not less than one year) issued to, or through the agency of, banks, discount houses, issuing houses or brokers. Mortgages, and bank advances and any other loans redeemable in less than twelve months, are excluded; so also are loans from U.K. government funds – but not government subscriptions made *pari passu* with the market to company issues. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of the amounts raised are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed interest securities of the kinds included as issues; conversions are included in the gross figures of both issues and redemptions.

The division between U.K. and overseas company borrowers is determined by the location of the registered office. U.K. "local authorities" include, in addition to local governments, such public bodies as water, dock and harbour boards. "Special finance agencies" are quoted public companies engaged in the provision of medium and long-term finance to industry (e.g. Industrial and Commercial Finance Corporation Limited). The industrial classification in part 3 of the table is according to the primary occupation of the borrowing company or group and is based on the Standard Industrial Classification.

Issues in foreign currencies are included where U.K. institutions took a leading part in arranging them. The amounts included are estimates of the proportions for which U.K. institutions arranged subscriptions.

A fuller description of the estimates appeared in the June 1966 *Bulletin*, page 151.

**Table 15: Company acquisitions of subsidiaries etc.**

The estimates are of purchases for cash, by industrial and commercial companies registered in the United Kingdom, of securities of U.K. companies. They exclude purchases from other U.K. industrial and commercial companies. "Purchases of subsidiaries" relates to transactions which result in the buyer holding more

than 50% of the equity capital of the company whose securities are acquired; "minorities bought in" to acquisitions of minority interests in the purchaser's existing subsidiaries; and "trade investments" to purchases which give a holding of equity capital of 50% or less. Acquisitions are shown, so far as possible, under the periods in which the purchase money is paid.

The series, which depends very largely on published information, is believed to be reasonably complete for purchases of subsidiaries, particularly those by quoted companies. Coverage of acquisitions of minority interests and of trade investments, which are less well publicised, is much less complete.

A fuller description of the estimates appeared in the December 1966 *Bulletin*, page 348.

**Table 16: Stock exchange transactions**

The figures for the London stock exchange represent the sum of brokers' purchases on behalf of clients plus the sum of their sales on behalf of clients; that is, the transfer of a security from one member of the public to another counts as two deals. The Scottish figures are not comparable because any such transfer negotiated between two Scottish brokers is regarded as one deal. There is also an unknown element of duplication between the two series.

**Table 17: Investment trusts**

The investment trusts which contribute returns are either members of the Association of Investment Trusts or listed as investment trusts by the London stock exchange; nearly 300 are covered by the statistics. Returns are not sought from about 50 small trusts, whose assets at end-1966 totalled roughly £25 million.

Net current assets do not take account of contingent assets and liabilities such as claims on, or sums due to, the Inland Revenue, or the liability for accrued loan interest and for dividends proposed but not yet paid. They include, however, (in "other short-term assets in the United Kingdom" or "other short-term borrowing in the United Kingdom") sums due from, or to, stock-brokers on account of securities sold or purchased and still awaiting settlement. The figures include the investment currency premium where appropriate.

The end-year figures of assets may be reconciled approximately as follows:

£ millions	
Assets at end-1965	3,144.9
Transactions in trusts' own capital	+ 54.0
Adjustment due to changes in trusts making returns	+ 2.5
Undistributed income and changes in market valuation (residual)	- 208.0
Assets at end-1966	2,993.4

Transactions in trusts' own capital includes net issues of share and debenture capital for cash (excluding estimated costs of issue), other identified long-term borrowing at home and abroad, and issues of capital against the acquisition of trusts not previously included in the statistics.

Gross transactions in quoted ordinary and deferred securities of U.K. companies were:

£ millions	Purchases	Sales
1966 1st quarter	57.3	31.5
2nd "	45.3	37.9
3rd "	32.5	30.0
4th "	27.5	27.2
Year	162.6	126.6
1967 1st quarter	47.6	29.9

An article introducing this series appeared in the September 1961 *Bulletin*, page 29.

**Table 18: Unit trusts**

The returns cover all unit trusts authorised by the Board of Trade under the Prevention of Fraud (Investments) Act 1958. They are collected in the main through the Association of Unit Trust Managers, but also include returns of trusts whose managers are not members of the Association. The numbers of trusts covered by the returns were: 1965, December, 121; 1966, March, 128; June, 130; September, 133; December, 138; 1967, March, 143.

Gross transactions in quoted ordinary and deferred securities of U.K. companies were:

£ millions	Purchases	Sales
1966 1st quarter	37.6	8.9
2nd "	36.9	9.4
3rd "	21.5	10.5
4th "	24.7	10.0
Year	120.7	38.8
1967 1st quarter	35.0	14.4

An article introducing this series appeared in the September 1961 *Bulletin*, page 29.

**Table 19: Balance of payments**

The figures are as published in the March 1967 issue of *Economic Trends*. The items are defined in *United Kingdom Balance of Payments 1966* (H.M.S.O., August 1966).

Within monetary movements, net liabilities in foreign currencies include changes in official liabilities in addition to liabilities and claims of U.K. banks, which are shown in Table 20.

Net liabilities in sterling exclude changes in the International Monetary Fund's holding of sterling, which are reflected in "account with I.M.F.". Otherwise, the figures are changes in the U.K. external liabilities and claims in sterling, as shown in Table 21 (1), except for any revisions not yet included in the latest balance of payments figures.

**Table 20: External liabilities and claims of U.K. banks in foreign currencies**

The figures are gross, as shown in the reporting banks' books at the close of business on the last working day of the period, currency amounts being calculated in sterling terms at the middle closing rate for the day. They comprise:

*1 U.K. liabilities*

Deposits and advances received from overseas residents; commercial bills drawn on U.K. residents and held by the banks on behalf of their overseas customers; and, from June 1966,

negotiable certificates of deposit issued in London and denominated in U.S. dollars, held by the banks on behalf of their overseas customers.

#### 2 U.K. claims

Deposits with, and advances to, overseas residents; notes and coin; treasury bills and similar short-term paper; commercial bills drawn on overseas residents and owned by the reporting institutions or held by them on behalf of their U.K. customers; and claims on overseas customers arising from acceptances.

A description of the contents and definitions of this series, which does not include official liabilities in foreign currencies arising from drawings on central bank facilities, appeared in the June 1964 *Bulletin*, page 100.

Apart from U.S. dollars, the currencies most commonly handled on the London market are Swiss francs and deutschemerk. Liabilities and claims of U.K. banks in these currencies, included in Table 20, were:

£ millions		
End of period	Swiss francs	Deutschemark
<b>U.K. liabilities</b>		
1963	76	65
1964	83	83
1965	72	96
1966 June	107	95
Sept.	97	101
Dec.	109	104
1967 Mar.	106	113
<b>U.K. claims</b>		
1963	71	68
1964	85	119
1965	81	162
1966 June	83	178
Sept.	89	183
Dec.	94	167
1967 Mar.	104	194

**Table 21: U.K. external liabilities and claims in sterling**

These comprise:

#### 1 U.K. liabilities

a Deposits, Treasury bills (see *d* below) and commercial bills and promissory notes held for overseas banks (including overseas offices of U.K. banks), central banks and other account holders abroad by banks and their nominee companies in the United Kingdom (including the Bank of England, accepting houses, discount houses, the U.K. offices of Commonwealth and foreign banks and certain other financial institutions). British government stocks known to be held by overseas banks and central monetary institutions are also included, mainly at nominal values, but not those held by other official bodies, private individuals and firms.

b Sterling funds held with the Crown Agents and by currency boards, excluding investments in Commonwealth and South African sterling securities and in U.K. local authority mortgages and securities, and excluding British government stocks held in the Special Funds.

c In Table 21 (1) only, temporary loans to local authorities and deposits with hire purchase finance companies, whether made direct by overseas residents or by U.K. banks and other U.K. agents for account of overseas residents. [These funds are excluded from Table 21 (2) because a

detailed analysis of them is not available.]

d The following amounts of non-interest-bearing notes held by international organisations, which are included under Treasury bills:

£ millions	of which	
End of:	Total	I.M.F.
1963	539	515
1964	903	874
1965	1,397	1,370
1966 June	1,547	1,528
Sept.	1,547	1,531
Dec.	1,554	1,529
1967 Mar.	1,530	1,507

#### 2 U.K. claims

Claims of banks in the United Kingdom payable in sterling, including acceptances outstanding under acceptance credit facilities and sterling commercial bills and promissory notes held for U.K. customers payable by overseas residents.

A description of the contents and definitions of this series, and a comparison with the "Overseas sterling holdings" series, now discontinued, appeared in the June 1963 *Bulletin*, page 98, and a further, largely historical, review entitled "Overseas sterling holdings" appeared in December 1963, page 264.

The present series excludes overseas sterling area currencies; net U.K. liabilities in these currencies were:

£ millions		
End of:		
1963	66	
1964	74	
1965	81	
1966 June	86	
Sept.	41

**Table 26: Security yields**

For British government stocks other than 3½% War Loan the table shows gross redemption yields for selected maturities derived from yield-maturity curves fitted by computer; an outline of the method used was given in the March *Bulletin*, page 52, together with end-month figures back to January 1963. In 1963-65 the calculation omitted stocks with coupons below 4%; but after 1965 this limit was raised to 5%. This caused a drop of 0.06% in the series for short-dated stocks, but did not affect the figures for longer-dated maturities.

3½% War Loan is shown as the representative undated stock because it is the most widely held stock and it is used in the calculation of the yield curves. The monthly average yield on 2½% Consols will continue to be included in *Financial Statistics*, published by the Central Statistical Office.
