

Index

In the main, this index covers the material which regularly forms part of each issue of the *Bulletin* – the Commentary, analysis of financial statistics, and the statistical annex – though it also includes statistical information contained in articles. Summaries of the articles themselves are given separately in the synopsis of articles.

Analysis of financial statistics

The analysis of financial statistics studies the financial transactions each quarter of the main sectors of the economy – public sector, personal sector, industrial and commercial companies, banking sector, other financial institutions and overseas. Each analysis is centred on a particular quarter, named below, but it also ranges into earlier quarters and where figures are available into the following quarter – in the latter case principally in connection with banking sector figures, including money supply and domestic credit.

3rd quarter 1968	22– 8
4th quarter 1968	154– 8
1st quarter 1969	347–52
2nd quarter 1969	404–14

Banking sector, domestic credit and money supply:

4th quarter 1968	29–31
1st quarter 1969	159–61
2nd quarter 1969	353– 4
3rd quarter 1969	414–16

Annual transactions for 1968 are covered in a special section on pages 146-54.

The quarterly sector tables in the text employ seasonally adjusted figures. At the end of each analysis is a detailed matrix built up from un-adjusted figures. Brief notes on sources and definitions appear in each issue, fuller notes are in the June issue (page 167) and there is an explanatory note on the seasonal adjustments on page 416.
