

Statistical annex

The tables should be used in conjunction with the additional notes which follow them. Some figures may be revised in future issues, as more complete information becomes available.

Table

	Central government
1	Current and capital accounts
2	Borrowing requirement and its financing
3	Analysis of government debt: 1 Stocks 2 Treasury bills 3 National savings and tax reserve certificates
	Banking
4	Currency circulation
5	Bank of England
6	Treasury bill tender and Bank of England's minimum lending rate
7	Discount market: 1 Discount houses 2 Undefined assets multiple
8	1 Banks in the United Kingdom: summary 2 Deposit banks: London clearing banks 3 Deposit banks: Scottish clearing banks 4 Deposit banks: Northern Ireland banks 5 Deposit banks: other 6 Accepting houses 7 Overseas banks: British overseas and Commonwealth 8 Overseas banks: American 9 Overseas banks: foreign banks and affiliates 10 Other overseas banks 11 Other UK banks
9	Eligible liabilities, reserve assets, reserve ratios and special deposits: 1 Banks 2 Finance houses 3 Special and supplementary deposits
10	Analysis of advances by banks in the United Kingdom
11	UK banking sector: 1 Liabilities and assets 2 Analysis of current and deposit accounts 3 Analysis of advances 4 Changes in liabilities and assets
12	Money stock: 1 Amounts outstanding 2 Changes 3 Influences on money stock and domestic credit expansion
	Capital markets
13	Stock exchange transactions
14	Transactions in British government stocks on the stock exchange
15	Capital issues on the UK market (excluding British government stocks): 1 Gross domestic and international issues 2 Net domestic issues 3 Net domestic issues by listed UK public companies
16	Acquisitions and mergers by financial companies within the United Kingdom: 1 Type of transaction 2 Form of expenditure 3 Business of acquiring company
17	Investment trust companies
18	Unit trusts
19	Property unit trusts

Table

	External finance
20	Balance of payments
21	Reserves and related items
22	Official short and medium-term borrowing from abroad
23	External liabilities and claims of UK banks in foreign currencies: 1 Summary 2 Geographical details
24	Maturity analysis of liabilities and claims of UK banks in foreign currencies: 1 Summary 2 Sectoral analysis of net positions 3 Sectoral analysis of liabilities and claims
25	Exchange reserves in sterling; and banking and money market liabilities in sterling to holders other than central monetary institutions: 1 Exchange reserves in sterling held by central monetary institutions 2 Banking and money market liabilities to other holders
26	External advances and overdrafts in sterling
	Yields, rates and prices
27	UK short-term money rates
28	Exchange rates and comparative interest rates
29	Foreign exchange rates: 1 Against sterling 2 Against US dollars 3 Against the special drawing right 4 Effective changes
30	UK security yields

Additional notes to the tables

Symbols and conventions

.. not available.

– nil or less than half the final digit shown.

... figures above and below are not strictly comparable.

Owing to rounding of figures, the sum of the separate items will sometimes differ from the total shown.

'Government stocks' comprises British government and government-guaranteed stocks (now only those of the gas and electricity industries).

Changes in this issue

Table 12 / 3 Influences on money stock and domestic credit expansion

The Issue Department's transactions in commercial bills in the course of market operations, previously given in the additional notes, and included as an offset under purchases of central government debt by the private sector, are now shown separately under 'lending to private sector'.

Table 24 Maturity analysis of liabilities and claims of UK banks in foreign currencies

This new table gives the results of the most recent maturity analyses. Hitherto these have been discussed in separate articles in the *Bulletin*; from now on the results will be covered in the financial review.

Table 29 / 3 Foreign exchange rates: against the special drawing right

This new table gives rates for prominent currencies against the special drawing right as valued by the International Monetary Fund.

External banking and money market liabilities in sterling: further detail (formerly Table 25)

This table has been discontinued, the figures being included in the companion table (Exchange reserves in sterling; and banking and money market liabilities in sterling to holders other than central monetary institutions).

[a] The rate is normally ½% higher than the average rate of discount established at the tender, rounded to the nearest ¼% above; it then becomes effective, for lending by the Bank, from the following Monday. A special change, a rise to 13%, was made on 13 November 1973.

[b] Thursday.

[a] Excluding funds placed through specialised financial markets.

[b] Fixed-rate credits for exports and domestic shipbuilding are included irrespective of any amounts refinanced, whereas such amounts are deducted in Tables 8, 11 and 12.

[c] The second set of figures for November 1973 includes advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. These advances are excluded, because of difficulties in classification, from mid-August 1973 figures, at which time they amounted to £1,894 million. Quarterly changes between August and November 1973 are based on the first set of figures, whereas changes between November 1973 and February 1974 are based on the second set.

[d] No seasonal adjustment has been attempted for the separate foreign currency series.

[e] Advances to overseas are included indistinguishably with advances to UK residents.

[f] Included in other manufacturing.

[a] Excludes internal accounts and all inter-bank items.

[b] Including negotiable dollar and sterling certificates of deposit.

[c] Current and deposit accounts and issues of dollar and sterling certificates of deposit, other than those held by UK banks and the discount houses, less an adjustment for transit items - see additional notes.

[d] Drawn on UK residents; including refinanceable credits to end-March 1972 and Treasury bills of the Northern Ireland Government.

Additional notes follow the tables

[a] Changes in money stock may differ from those which can be calculated by reference to amounts outstanding in Table 12 / 1.

[b] M₁ equals columns 3+4.

[c] M₃ equals columns 3+5.

[d] See Table 11 / 4.

[e] See additional notes.

Additional notes follow the tables

Table 12 / 3

Influences on money stock and domestic credit expansion

[a] See Table 2.

[b] See Table 11 / 4.

[c] Equals the central government's 'total external transactions' in Table 2 together with any overseas borrowing by the rest of the public sector.

[d] Bank deposits from overseas residents less lending to overseas residents - see Table 11 / 4.

[e] Equals the total of columns 1 to 9 - see also Table 12 / 2.

[f] Domestic credit expansion equals the sum of columns 1 to 6 plus bank lending in sterling to overseas residents less bank lending in foreign currencies to UK residents for investment overseas.

[g] See additional notes.

Additional notes follow the tables

[a] Figures represent the sum of both brokers' purchases and their sales on behalf of clients – the transfer of a security from one investor to another therefore counts twice in the totals.

Additional notes follow the tables

Table 14
Transactions in British government stocks on the stock exchange

£ millions: percentage of total in italics

	Total	Official holders	Banks	Discount houses	Other financial institutions						Other holders (residual)	
					Total	Insurance companies	Pension funds	Building societies	Savings banks' investment accounts	Investment and unit trusts		
Up to 5-year stocks

[a] From December 1971, convertible currencies are valued at middle or central rates – equivalent to \$2.60571=£1 until February 1973 and \$2.89524=£1 thereafter. Gold continues to be valued at £14.5833 per fine ounce and special drawing rights at SDR 2.40=£1.

[b] Represents an automatic drawing right on the Fund and equals the amount by which the UK quota exceeds holdings of sterling by the IMF; apart from UK drawings/repurchases, it will rise or fall as other countries draw sterling from or repay sterling to, the IMF. It was included in the reserves after June 1972.

[a] Drawings outstanding at end of period. Sterling values are calculated at a rate of \$2.40=£1 to end-September 1971 and \$2.60571=£1 from end-December 1971 to end-June 1972.

[b] Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries; excludes accumulated charges in sterling (less IMF expenditure in sterling) amounting to £83 million at the end of March 1972, which were repaid by the end of April 1972.

[a] Middle market rates as recorded by the Bank of England during the late afternoon.

[b] Foreign currency (expressed in terms of US dollars) held by UK residents and available for the purchase of quoted foreign currency securities and for approved direct investment in non-sterling countries.

[c] Market selling rate in New York for 3-month Treasury bills, expressed as a yield (per cent per annum of 365 days).

[d] For Treasury bills, the yield per cent per annum of 365 days derived from a representative London discount market selling rate for 91-day bills after the weekly tender. For local authority temporary loans and inter-bank sterling deposits, a mean closing rate has been taken.

(3 months)		Interest-rate differentials[e] between			London gold price[f]	
Inter-bank sterling deposits[d]	Euro-dollar deposits in London[a]	UK and US Treasury bills	Local authority temporary loans	Inter-bank sterling deposits	US \$ per fine ounce	Last working days
		and Euro-dollar deposits in London (against the UK -)

[e] These columns provide only broad comparisons. The differences are obtained after deducting the forward premium (per cent per annum) on US dollars from the appropriate UK rates, or adding the forward discount.

[f] At the fixing at 3 p.m.

[g] The London foreign exchange market was closed on 12 February 1973. The devaluation of the US dollar by 10% to stand at \$=0.736662 grammes of gold was announced. The official sterling/dollar middle rate, based on £1=2.13281 grammes of gold, accordingly changed from £1=\$2.60571 to £1=\$2.89524.

[h] Thursday.

[a] Until August 1973, monthly figures are for last Wednesday in each month.

Additional notes follow the tables

Additional notes to the tables

Sources

Statistics taken from government publications are reproduced by permission of the Controller of HM Stationery Office. Particular acknowledgement is made to the Treasury for the use of the figures of central government financing in Table 2.

Acknowledgement is also made to the banks and other institutions which have made material available to the Bank, and to the following bodies which have allowed the Bank to reprint statistics compiled by them or have assisted the Bank in the collection of statistics from their members:

The Accepting Houses Committee
The American Banks' Association of London
The Association of Investment Trust Companies
The Association of Unit Trust Managers
The British Bankers' Association
The British Overseas and Commonwealth Banks' Association
The Committee of London Clearing Bankers
The Committee of Scottish Clearing Bankers
The Council of The Stock Exchange
The Eastern Exchange Banks' Association
The Faculty of Actuaries in Edinburgh
The Financial Times
The Foreign Banks and Affiliates Association
The Institute of Actuaries in London
The Japanese banks in London
The London Discount Market Association
The Northern Ireland Bankers' Association
The Royal Mint

Table 1: Central government: current and capital accounts

This table gives a national income accounts classification of transactions which make up the central government borrowing requirement (net balance) in Table 2. It is a summary of the current and capital accounts of the central government, published by the Central Statistical Office in *Financial Statistics*.

Table 2: Central government: borrowing requirement and its financing

This table provides a summary, for calendar quarters and financial years, of all transactions affecting the central government, and analyses government borrowing according to the source of the funds borrowed. It classifies transactions in three main categories. The first category comprises:

- a The net amount paid out, or received, by the Consolidated Fund: this is mainly on account of current revenue and expenditure, but also covers certain domestic loans – including any at subsidised rates of interest – and all overseas lending.
- b The amount lent from the National Loans Fund (all at market rates) to local authorities, nationalised industries and other domestic bodies, less the repayments of principal on such loans. Interest on these loans, together with the profits of the Issue Department of the Bank of England, is set off in the National Loans Fund against the cost of interest, management and expenses of the national debt. Any shortfall is made good by a transfer from the Consolidated Fund, so that receipts and payments relating to debt servicing are self-balancing in the National Loans Fund by the end of a financial year.
- c The amounts due from nationalised industries to redeem their government-guaranteed stocks. These stocks are treated in the borrowing statistics as if they were direct liabilities of the central government. The transactions shown under 'redemption of guaranteed stocks' represent in part actual receipts by the central government from nationalised industries in redemption of stock bought in by the Government before the redemption and in part notional receipts which enable the central government to be shown as itself redeeming stock still held in the market.
- d The net change in other central government funds and accounts, the largest components of which are the balances of the National Insurance Funds and departmental balances held with the Paymaster General. This category also includes various statistical adjustments.
- e The borrowing requirement of the Northern Ireland Government.

The aggregate of these items, called the central government borrowing requirement (net balance), is a measure of the net expenditure (including lending) of the central government resulting broadly from decisions of a budgetary nature.

Secondly, the table brings together under the heading 'external transactions' any net cost or gain in sterling resulting from:

- a changes in the official reserves and other items financing the total currency flow in the balance of payments accounts; these comprise changes resulting from the Exchange Equalisation Account's transactions in gold, foreign exchange and special drawing rights (other than allocations), and changes in net transactions with the International Monetary Fund (except for the payment of subscriptions) and with other monetary authorities; and
- b any other increase or decrease in overseas holdings of government stocks and Treasury bills, and any change in other forms of central government debt to overseas.

Together these items represent the impact on the central government's domestic financing of the overseas transactions of the country as a whole.

Finally, the table analyses government domestic borrowing to show changes in both the banks' and other domestic holdings of notes, coin and government debt. Financing of the Northern Ireland Government's borrowing requirement takes the form of bank advances and changes in holdings of stocks, Treasury bills and other securities issued by the Northern Ireland Government. Domestic borrowing is equal to the sum of the central government borrowing requirement (net balance) and the external transactions.

The division between domestic and overseas holdings of government stocks and Treasury bills is not exact. Some unidentified changes in overseas holdings may be included among the residual figures for domestic holdings, but the amounts involved are thought not to be very large.

Tax deposit accounts were introduced with effect from 2 April 1973 to enable companies to anticipate payment of corporation tax (but not advance corporation tax). The scheme was terminated on 8 October 1974, but may be reintroduced at a later date. The accounts, operated by the Inland Revenue, continue to attract interest at Treasury bill rate, with a bonus of 2½% per annum if the funds are used to meet the tax. Existing deposits will need to be applied in satisfaction of tax or withdrawn for cash within the period ending 1 January 1977.

More details of the components of central government financing were given in an article in the March 1966 *Bulletin*, page 29, and the changes resulting from the National Loans Act 1968 were explained in the September 1968 *Bulletin*, page 280.

Table 3: Analysis of government debt

1 Stocks

This section gives a more detailed analysis by type of holder of the changes, included in Table 2, in the amount of government stocks held by overseas holders, the banking sector and other domestic holders. Changes are shown at cash value except for those of the banking sector, where the figures relate mainly to changes in book value – any difference between the book and cash value being reflected in the residual figures for 'domestic holders (other than banks)'.

The figures for overseas holders, as in Table 2, are based partly on the statistics of UK external liabilities in sterling (Table 25) and partly on information extracted from the registers of government stocks; they should not be regarded as more than estimates – any error being reflected in the residual figures for 'domestic holders (other than banks)'. 'Central monetary institutions' covers the holdings of central banks, currency boards, the General and Note Security Funds of the Crown Agents, the Bank for International Settlements, and a few other accounts known to be used for central monetary purposes.

The table includes a maturity analysis of official transactions in government stocks. In this analysis, stocks with optional redemption dates are classified according to the final date.

2 Treasury bills

This table gives a further analysis of the changes, included in Table 2, in the amount of Treasury bills – at nominal value – held by overseas holders and the banking sector.

Figures for overseas holdings of Treasury bills include changes in Treasury bills held as the counterpart of official financing transactions with overseas monetary authorities. These are not identifiable in Table 2 as they are one component only of the item 'total external currency flow'.

3 National savings and tax reserve certificates

The first part of this table, derived from Department for National Savings statistics, analyses the figures for national savings in Table 2. Changes in deposits with the special investment departments of the trustee savings banks and in the investment account of the National Savings Bank are excluded because they do not directly affect the central government: that part of their funds which is invested in government debt is included in Table 2 under 'domestic borrowing (other than from banking sector): marketable debt'.

Tax reserve certificates are no longer issued, having been replaced by tax deposit accounts (see notes to Table 2). Company certificates were intended for bodies liable to corporation tax, while personal certificates were for individuals, partnerships, trustees, and others not liable to corporation tax. The last issue of company certificates was withdrawn on 31 December 1971 but a final personal issue was made available from 3 January 1972 until 29 June 1973. Figures for gross issues and surrenders were given in the *Bulletin* up to March 1974; an article describing the history of tax reserve certificates appeared in the December 1968 *Bulletin*, page 391.

Table 4: Currency circulation

Figures for the Bank of England and the London clearing banks relate to the average of Wednesdays in each month; those for the Scottish clearing banks and the Northern Ireland banks relate to the average in periods of four consecutive weeks, as published in the *London Gazette* and the *Belfast Gazette* respectively, with as close a correspondence as possible to the calendar month.

The figures for the amount of coin in circulation are provided by the Royal Mint, and make allowance for coin which has been lost, destroyed, or otherwise wasted. Coin in the Bank of England, Issue Department (none held since February 1972) is excluded.

Tables 7, 8 and 9

A list of contributors to these tables as at 17 October 1973 was published in the December 1973 *Bulletin*, page 538. Amendments as at 16 January, 17 April, and 17 July were published in the March, June, and September *Bulletins* respectively in the additional notes to Tables 7, 8 and 9. The following further amendments had been made as at 16 October:

Discount houses

Delete

Mid-September Norman & Bennet Ltd

American banks

Add

End-September Ocean Finance and Trust Corporation Ltd

Change of name

Mid-June First Pennsylvania Bank N.A. (formerly The First Pennsylvania Banking and Trust Company)

Foreign banks and affiliates

Add

Mid-August Westdeutsche Landesbank Girozentrale (formerly 'other overseas banks')

Other overseas banks

Add

End-September Banco de Vizcaya

Change of name

Mid-July Habib Bank Ltd [formerly Habib Bank (Overseas) Ltd]

Other UK banks

Add

End-September Lombard and Ulster Banking Ltd

Change of name

Mid-August Bank of America International Ltd (formerly Bank of America Ltd)

The various groupings in these tables were therefore made up as follows as at 16 October 1974:

Key

- [a] Not part of the banking sector.
- [b] Added since the list for 17 October 1973 published in the December 1973 *Bulletin*.
- [c] In a different group in the 1973 list.
- [d] Change of title since the 1973 list.

Table 7: Discount market

1 Discount houses

This group comprises the members of the London Discount Market Association.

From 15 August 1973 additional information on foreign currency business has been made available by the discount houses and incorporated in the table.

Figures for government stocks and local authority securities are at nominal values.

2 Undefined assets multiple

The discount market is here defined as the discount houses, together with certain other firms carrying on an essentially similar type of business. These are the two discount brokers and the money trading departments of six banks traditionally maintaining such business.

From 19 July 1973 public sector lending ratios were abolished (a general description of the former arrangements appeared in the September 1971 *Bulletin*, page 314). Since then credit control has been applied to the discount market through a limit on each institution's aggregate holding of 'undefined assets' to a maximum of twenty times its capital and reserves. Undefined assets for this purpose are all assets other than those in the following list:

- a balances at the Bank of England;
- b UK and Northern Ireland Treasury bills;
- c government stocks with not more than five years to final maturity;
- d local authority stocks with not more than five years to final maturity;
- e local authority and other public boards' bills eligible at the Bank;
- f local authority negotiable bonds; and
- g bank bills drawn by nationalised industries under specific government guarantee.

For further details see 'Competition and credit control: modified arrangements for the discount market' in the September 1973 *Bulletin*, page 306.

The capital resources base for the calculation of the multiple in 1973 was £103 million and in 1974 is £96 million.

Table 8: Banks in the United Kingdom

This table covers all banks observing the common 12½% reserve ratio introduced on 16 September 1971, including the six money trading departments which observe an undefined assets multiple. Other institutions observing an undefined assets multiple are not included, nor are the National Giro and the Banking Department of the Bank of England. Table 8/1, which summarises the figures of the contributors to Tables 8/2 to 8/11, is thus not comparable with Table 11 which covers the whole banking sector. Also, the adjustments made in Table 11 to eliminate inter-bank transactions and transit items (see the notes to Table 11) have not been made in this table. The figures cover the business of all the banks' offices within the United Kingdom.

The figures for non-sterling currencies are not comparable with those shown in Table 23. Apart from minor differences of definition, the coverage of banks is less comprehensive in this table; and until December 1971 Table 23 excluded currencies of overseas sterling countries. The figures are affected by movements in exchange rates.

Overseas residents are defined here, and elsewhere in the *Bulletin*, as overseas governments (including their diplomatic representatives in the United Kingdom) and public authorities, UK branches or agencies of international institutions, and persons, companies and other bodies whose permanent or registered address is outside the United Kingdom. This includes overseas branches of UK-registered companies and agents or agencies located in the United Kingdom acting on behalf of, or for the account of, overseas residents.

UK residents are defined as UK public authorities, persons, companies and other bodies whose permanent or registered address is within the United Kingdom. This includes branches located within the United Kingdom of overseas-registered companies and UK diplomatic and military representatives overseas.

Current and deposit accounts include, as well as the banks' deposit liabilities, their liabilities on loans and advances (including money at call and short notice) received from other UK banks, and, where appropriate, their net sterling liabilities to their offices or to their head office overseas.

Balances with other UK banks include money at call and short notice, and loans and advances to UK offices of other banks contributing to these tables, including the National Giro. Cheques in course of collection on other banks in the United Kingdom are, however, excluded. For the London and Scottish clearing banks and the Northern Ireland banks the item also includes indistinguishably certain internal or impersonal accounts together with provisions for bad and doubtful debts.

Treasury bills comprise British government Treasury bills only. Northern Ireland government Treasury bills are included in other UK bills.

Money at call and short notice to the discount houses comprises all sterling funds lent to the members of the London Discount Market Association. Money at call and short notice to other borrowers comprises sterling funds lent for periods not exceeding one month to:

- a money brokers on the stock exchange;
- b discount brokers;
- c jobbers and stockbrokers; and
- d bullion brokers, excluding those listed as UK banks,

together with reporting banks' own holdings of tax reserve certificates.

Special and supplementary deposits include, from July 1974, non-interest-bearing supplementary deposits. Notes on special and supplementary deposits are included in the additional notes to Table 9.

Government stocks comprise British government stocks (including government-guaranteed nationalised industry stocks) only and are given at book value or cost.

Sterling loans to local authorities comprise funds placed with, and loans and advances made to, UK local authorities. Any money placed by the banks with local authorities where the banks are acting solely as agents and have no corresponding deposit liabilities is excluded.

Advances comprise amounts outstanding on loan and overdrawn accounts, the banks' foreign currency balances with banks and financial institutions overseas, and net sterling claims on their offices or on their head office overseas. Sterling loans to UK local authorities are excluded, but other currency loans are included within other currency advances to UK residents (public sector). The figures are shown without deduction of provisions for bad and doubtful debts and exclude advances to other UK banks.

Other assets include banks' own holdings of US dollar certificates of deposit, sterling securities (other than sterling bills discounted and government stocks), trade investments, and foreign currency assets not included elsewhere (such as investments and discounted bills denominated in currencies other than sterling).

Some further notes on individual tables are given below.

2 London clearing banks

This group comprises the members of the Committee of London Clearing Bankers. The figures are available in this form from mid-October 1971 and are partly estimated. Figures for mid-September 1971 and before are arranged differently and were included in the additional notes in the March 1972 *Bulletin*, page 149, taken up to mid-December 1971; additional notes on this earlier series last appeared in the December 1971 *Bulletin*, page 566. The considerations leading to the change in the form of the table and the main differences between the two series were described in the March 1972 *Bulletin*, page 76.

Other accounts cover such items as credits in course of transmission, and various other internal funds and accounts.

Advances include certain refinanceable export and shipbuilding credits (the refinance facilities are described in the issues of the *Bulletin* for September 1969, page 292, December 1970, page 395, December 1971, page 445, and June 1972, page 205).

3 Scottish clearing banks

This group comprises the members of the Committee of Scottish Clearing Bankers. Like those for the London clearing banks, the figures are available in this form from mid-October 1971 and are partly estimated; figures in the previous format, taken up to mid-December 1971, were included in the March 1972 *Bulletin*, page 150.

Notes outstanding include the 'authorised' circulation, which was approximately £2.7 million at all dates shown; the remaining notes are covered by holdings of Bank of England notes and by coin. These form part of 'coin, notes and balances with Bank of England', which also includes the banks' holdings of each other's notes.

Other accounts cover such items as credits in course of transmission and various other internal funds and accounts.

Advances include certain refinanceable export and shipbuilding credits (see *London clearing banks*).

4 Northern Ireland banks

This group comprises the members of the Northern Ireland Bankers' Association. The figures relate to the liabilities and assets of their banking offices situated within the United Kingdom. Like those for the London and Scottish clearing banks they are available in this form from mid-October 1971 and are partly estimated. Figures in the previous format taken up to end-December 1971 were included in the March 1972 *Bulletin*, page 151.

For operational reasons, the Northern Ireland banks' figures are reported on dates different from those of other banks in the United Kingdom. For the first two months of each calendar quarter they are usually made up a day earlier than the other banks, while for the third month they are made up on the last working day. When compiling aggregates for all the banks at mid-March, June, etc. in the summary Table 8/1, the Northern Ireland banks' mid-February, May, etc. figures are used in preference to the end-quarter figures.

Notes outstanding include the 'authorised' circulation which was approximately £2 million at all dates shown.

5 Other deposit banks

See the list above. Separate figures for this group of banks are not available before mid-October 1971.

6-11

Monthly figures for the remaining groups of banks are not available before mid-September 1971, only end-quarter figures.

6 Accepting houses

The members of the Accepting Houses Committee together with certain of their Channel Islands and Isle of Man banking subsidiaries.

7 British overseas and Commonwealth banks

The members of the British Overseas and Commonwealth Banks' Association together with certain of their banking subsidiaries.

9 Foreign banks and affiliates

The members of the Foreign Banks and Affiliates Association together with one Channel Islands subsidiary.

Table 9: Eligible liabilities, reserve assets, reserve ratios and special deposits

1 Banks

In the calculation of banks' reserve ratios, eligible liabilities comprise, in broad terms, sterling deposit liabilities, excluding deposits having an original maturity of over two years, plus any sterling resources obtained by switching foreign currencies into sterling. Inter-bank transactions and sterling certificates of deposit (both held and issued) are taken into the calculation of individual banks' liabilities on a net basis, irrespective of term. Adjustments are also made in respect of transit items.

Reserve assets comprise balances with the Bank of England (other than special and supplementary deposits), British government and Northern Ireland government Treasury bills, company tax reserve certificates, money at call with the London money market, government stocks and stocks of nationalised industries guaranteed by the Government with one year or less to final maturity, local authority bills eligible for rediscount at the Bank of England and (up to a maximum of 2% of eligible liabilities) commercial bills eligible for rediscount at the Bank of England. Other assets, which are held only by the Northern Ireland banks, are defined in the article 'Competition and credit control: further developments' in the March 1973 *Bulletin*, page 51. The transitional period for this item has been extended for a further year.

Unlike in Table 8/4, figures for the Northern Ireland banks are reported on the third Tuesday of every month.

2 Finance houses

In the calculation of the finance houses' reserve ratios, eligible liabilities comprise deposits with an original maturity of two years or less received from UK residents, other than banks, or from overseas. The definition of reserve assets is the same as for banks.

Definitions of the items in this table are contained in the article 'Reserve ratios: further definitions', in the December 1971 *Bulletin*, page 482.

3 Special and supplementary deposits

Special deposits may be called by the Bank of England from all banks under the arrangements for credit control which came into operation on 16 September 1971. See the consultative document *Competition and credit control*, reprinted in the June 1971 *Bulletin*, page 189; *Reserve ratios and Special Deposits*, a supplement to the September 1971 *Bulletin*; 'Competition and credit control: the discount market', September 1971 *Bulletin*, page 314; 'Reserve ratios: further definitions', December 1971 *Bulletin*, page 482; 'Competition and credit control: further developments', March 1973 *Bulletin*, page 51; and 'Competition and credit control: modified arrangements for the discount market', September 1973 *Bulletin*, page 306. For the recent developments on non-interest-bearing supplementary deposits see 'Credit control: a supplementary scheme', March *Bulletin*, page 37; 'Credit notice: supplementary deposits', June *Bulletin*, page 161; and 'Credit control: notice, 12 November 1974', page 420.

Supplementary deposits are paid by banks and deposit-taking finance houses, according to growth in excess of the guideline, at rates (from November 1974) of 5% (up to 3% excess), 25% (over 3% up to 5%) and 50% (above 5%) of interest-bearing eligible liabilities. The same institution may therefore be penalised in one, two, or all three tranches in any month. Although the table shows total amounts paid in each tranche, the number of institutions comprises only those banks and deposit-taking finance houses whose maximum rate of penalty falls within each tranche.

Table 10: Analysis of advances by banks in the United Kingdom

This analysis is based as far as possible on the Standard Industrial Classification: there are twenty-five categories grouped under the broad headings of manufacturing, other production, financial, services, personal, and overseas. Advances are classified by industry, irrespective of owner (i.e. private, local authority or government); and if an advance cannot be attributed to any particular activity, it is classed according to the main activity of the borrower — if necessary within the residual groups provided under the broad divisions. Advances to merchants, brokers, importers, and exporters are included in retail distribution or other distribution as appropriate.

The analysis, which mainly relates to the third Wednesday in February, May, August and November, covers all institutions which contribute to the banking sector statistics (Table 11) except for the National Giro and the discount houses. It includes advances, both in sterling and foreign currencies, provided by banks to their customers; but does not include funds placed through the specialised financial markets with other banks (both in the United Kingdom and overseas) or with local authorities or finance houses.

Figures for the Northern Ireland banks relate to the third Tuesday in each quarter and are broadly comparable with those provided by the other contributors to the table, but are in less detail.

An article introducing the analysis and describing how it differs from an earlier series appeared in the March 1967 *Bulletin*, page 48.

The seasonal adjustments were described in an article in the June 1972 *Bulletin*. These have since been revised, and amended figures for changes up to February 1973 have been published in *Financial Statistics*.

Table 11: UK banking sector

The UK banking sector comprises all banks included in Table 8 together with the Banking Department of the Bank of England, the National Giro and the members of the London Discount Market Association. The figures are designed to show transactions between banks and third parties; they exclude, therefore, the banks' own internal funds, and all inter-bank items, including transactions between the banks and the discount houses; advances are shown without deduction of provisions for bad and doubtful debts.

Adjustments are also made to banks' gross figures in Tables 11/1 and 11/4 to allow for transit items between institutions within the banking sector as well as between offices of the same bank. Transit items appear in an individual bank's balance sheet both as credit items (e.g. standing orders) and debit items (e.g. cheques in course of collection). When banks' figures are aggregated these items may give rise to double-counting of deposits received from customers outside the banking system or, where overdrawn or loan accounts are concerned, to the undervaluing of total advances made to such customers. In accordance with the treatment adopted for the calculation of reserve ratios (see 'Reserve ratios: further definitions', in the December 1971 *Bulletin*, page 482), it is assumed that 60% of the total value of debit items less credit items affects deposits. This proportion is therefore deducted from gross deposits in the calculation of net deposits; the remaining 40% is added to advances.

Two lines of figures appear at various points in Tables 11/1 to 11/3 for end-March 1972 and end-March 1973. In each case these show the assets and liabilities of the banking sector and its constituent groups of banks before and after the inclusion of new contributors to the banking statistics. In the first line of figures, these institutions are regarded for all purposes as being outside the banking sector and other banks' advances to them, for example, are included among advances to UK residents (other than banks) in Table 11/3. In the second line, they are regarded for all purposes as part of the banking sector: their assets and liabilities are included with those of the accepting houses, overseas and other banks, but other banks' advances to them are treated as inter-bank transactions and excluded.

In Tables 11/1 and 11/3 the figures for end-June 1972 for the deposit banks are shown after the transfer from bills discounted to advances of £707 million of refinanceable credits at mid-May 1972. Within the analysis of bank advances to UK residents in Table 11/3, advances to financial institutions have been increased by £7 million, those to companies by £204 million and those to other UK residents by £175 million; the remaining £321 million has been added to advances to overseas residents.

In Table 11/2 the allocation between domestic and overseas holdings of negotiable dollar and sterling certificates of deposit is partly estimated; and the division between the different groups of banks is also an estimate related to total issues by each group. Identified domestic holdings of dollar certificates were included, for the first time, in the second line of figures for end-March 1973. Overseas deposits include net liabilities to offices abroad, deposits and advances from banks abroad, and estimated overseas holdings of negotiable dollar and sterling certificates of deposit. Identified overseas holdings of sterling certificates are given in the additional notes to Table 25.

Table 11/4 shows annual, quarterly and monthly changes in the banking sector's assets and liabilities, grouped by sector. Some of the monthly figures are partly estimated. Non-deposit liabilities (net) comprise the banking sector's capital and reserves and other non-deposit liabilities less investment in premises and other non-financial assets; this item is also in effect a balancing item between banks' reported assets and liabilities and can therefore reflect errors and omissions in other items in the banking sector balance sheet.

In Table 11/4, the changes for the first quarter of 1973 have been calculated with new contributors treated for all purposes as part of the private sector. For subsequent quarters and months the changes are derived with new contributors as part of the banking sector.

Table 12: Money stock

Two definitions of the money stock are used in this table. The first definition (M_1) is a narrow one consisting of notes and coin in circulation with the public plus sterling current accounts held by the private sector only. The other definition (M_3) comprises notes and coin in circulation with the public together with all deposits, whether denominated in sterling or other currencies, held by UK residents in both the public and private sectors. M_3 includes sterling certificates of deposit held by UK residents (other than banks); their identified holdings of dollar certificates of deposit are also included from the second lines of figures for end-March and mid-April 1973. In both

definitions 60% of the net value of transit items within the banking sector is deducted from deposits – see additional notes to Table 11.

The figures for M_1 given in Tables 12/1 and 12/2 are partly estimated and only the quarterly series is available before October 1971. Until then, various assumptions were used to isolate sterling current accounts held by the private sector. These were described in an article in the September 1970 *Bulletin*, page 324. Since October 1971, the assumptions have been substantially modified, mainly in the light of additional statistical information supplied by the London and Scottish clearing banks. This has reduced the amount of estimation involved in calculating quarterly M_1 , and in Table 12/1, therefore, a break is shown in the series between September and December 1971. The new information also made it possible to produce a monthly series of M_1 . This involves some small degree of estimation over and above that necessary for the quarterly series.

Monthly figures for M_3 are available from June 1971 onwards. Some comments on the method of seasonal adjustment of the monthly figures were given in the March 1972 *Bulletin*, page 78.

In Table 12/3 net purchases of commercial bills by the Bank of England, Issue Department in the course of market operations, which have previously been included under column 4 as an offset to purchases of central government debt by the private sector (other than banks), are now shown separately under column 5.

In Table 12/1, the two lines of figures for mid and end-March 1972, and for end-March and mid-April 1973 show, in each case, the money stock and its components before and after the inclusion of new contributors (see additional notes to Table 11). In the first line of figures new contributors are treated for all purposes as part of the private sector and in the second line as part of the banking sector. Quarterly series eliminating breaks, for M_1 and M_3 , have been prepared in the Bank and are available on application to the Economic Intelligence Department at the address given on the reverse of the contents page.

The changes in the money stock given in Table 12/2 may not equal the differences between the amounts outstanding in Table 12/1. This is because changes in bank liabilities arising directly from alterations in the composition of the banking sector, or from the use of new sources of information (as in the fourth quarter of 1971 – see above), are excluded from Table 12/2. Small discrepancies in the quarterly figures also arise because the changes in notes and coin in circulation with the public do not allow for wastage and hoarding of coin as do the amounts outstanding in Table 12/1. Also, the seasonally-adjusted changes in M_1 and M_3 may not be the same as the differences between seasonally-adjusted amounts outstanding in Table 12/1, because the latter are rounded whereas the former are not.

In Tables 12/2 and 12/3 the changes for the first quarters of 1972 and 1973 and, in Table 12/2 for the months to mid-March 1972 and mid-April 1973, have been calculated, in each case, with new contributors treated for all purposes as part of the private sector. For subsequent quarters and months the changes are derived with new contributors as part of the banking sector.

Tables 12/2 and 12/3 are further discussed in an introductory article in the December 1972 *Bulletin*, page 512.

Table 13: Stock exchange transactions

Table 14: Transactions in British government stocks on the stock exchange

In both tables, transactions are recorded at dealing (contract) dates, rather than at settlement dates. Until 1973 statistics were available for the London, Scottish and Belfast exchanges, but not for the other stock exchanges, although deals done by London brokers on behalf of brokers on other exchanges were included in the London figures. Following the union of the stock exchanges of the United Kingdom and the Republic of Ireland in March 1973 to form one exchange (the Stock Exchange), the statistics from April 1973 cover all floors of the exchange, except that figures for the Republic of Ireland were not available for that month. In Table 14 the effect of the increased coverage is thought to be very small.

There are certain transactions, mainly cash subscriptions to new issues and redemption payments on maturing stocks, which do not pass through stockbrokers and are not therefore included in stock exchange turnover. Such transactions have been eliminated as far as possible from the institutional figures in Table 14. In this table, official holders include the Issue and Banking Departments of the Bank of England, the National Debt Commissioners, government departments, and the Northern Ireland Government. The estimates of turnover for banks are rounded to the nearest £5 million; the special temporary purchase of short-dated stock by the Bank of England from the banks in June 1972

is excluded. Before the second quarter of 1971, figures for discount houses' turnover in short-dated stocks included, indistinguishably, turnover in medium and long-dated stocks. Savings banks' investment accounts comprise the National Savings Bank investment account and the trustee savings banks special investment departments. Figures for financial institutions other than those listed are included within 'other holders (residual)'.

Table 15: Capital issues on the UK market (excluding British government stocks)

The estimates relate to new money raised by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by local authorities and listed public companies in the United Kingdom; and by overseas public authorities (including local authorities and international organisations) and companies. Issues by UK public authorities are included, except domestic issues guaranteed by the Government. The estimates include UK local authority negotiable bonds (of not less than one year) issued to, or through the agency of, banks, discount houses, issuing houses or brokers. Mortgages, and bank advances and any other loans redeemable in less than twelve months, are excluded; so also are loans from UK government funds (including the Industrial Reorganisation Corporation) – but not government subscriptions to company issues made *pari passu* with the market. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of the amounts raised are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed-interest securities of the kinds included as issues; conversion issues in lieu of cash repayment are included in the gross figures of both issues and redemptions. No allowance is made for company liquidations or other repayments of share capital.

The estimates for loan capital include issues of debentures and loan stock carrying the right of conversion into, or subscription to, equity capital. The amounts included in parts 2 and 3 of the table for such issues by UK companies are as follows:

£ millions	
1970	105.0
1971	63.5
1972	101.5
1973	38.5
1973 2nd quarter	14.7
3rd quarter	4.4
4th quarter	4.2
1974 1st quarter	0.3
2nd quarter	—
3rd quarter	—
1973 Oct.	—
Nov.	3.8
Dec.	0.4
1974 Jan.	—
Feb.	—
Mar.	0.3
Apr.	—
May	—
June	—
July	—
Aug.	—
Sept.	—
Oct.	20.0
Nov.	0.5

As the series relates only to new money raised, bonus issues, share exchanges and issues for other forms of consideration are excluded, as are issues in which the cash raised accrues not to the borrowing company but to its existing shareholders. It is not possible to segregate funds destined, in turn, for the purchase of existing securities or for subscription to other new issues, but the separate analysis of issues by financial institutions goes some way towards doing so.

The division between UK and overseas company borrowers is determined by the location of the registered office. 'Financial companies' in part 3 of the table comprises listed UK public companies within the definitions of the banking sector and other financial institutions for flow of funds statistics (see the notes on sources, definitions and seasonal adjustments of the flow of funds accounts in the financial review). The industrial classification is according to the primary occupation of the borrowing company or group and is based on the Standard Industrial Classification.

International issues (usually issues made on more than one market and through an international syndicate) are included in part 1 of the table if UK institutions took a leading part in arranging them. The amounts included, which are rough estimates of the proportions for which UK sponsors arranged subscriptions, are as follows:

£ millions	Total	UK borrowers	Overseas borrowers
1970	172.6	20.2	152.4
1971	252.9	28.4	224.5
1972	397.1	59.7	337.4
1973	273.1	121.5	151.6
1973 2nd quarter	45.0	35.2	9.8
3rd quarter	38.2	19.7	18.5
4th quarter	73.4	26.3	47.1
1974 1st quarter	44.1	11.2	32.9
2nd quarter	14.4	—	14.4
3rd quarter	16.5	—	16.5
1973 Oct.	54.4	25.2	29.2
Nov.	14.5	1.1	13.4
Dec.	4.5	—	4.5
1974 Jan.	18.2	8.6	9.6
Feb.	8.5	2.6	5.9
Mar.	17.4	—	17.4
Apr.	4.1	—	4.1
May	2.8	—	2.8
June	7.5	—	7.5
July	—	—	—
Aug.	16.5	—	16.5
Sept.	—	—	—
Oct.	4.8	—	4.8
Nov.	6.9	—	6.9

An article in the June 1966 *Bulletin*, page 151, presented annual figures of capital issues in broadly the present form back to 1954 together with an earlier series going back to 1927, and described the differences between the series.

Table 16: Acquisitions and mergers by financial companies within the United Kingdom

These figures cover company acquisitions and mergers initiated by financial companies and include, besides amalgamations between financial companies, the acquisition by financial companies of non-financial companies. They complement the Department of Industry's statistics for industrial and commercial companies (which include acquisitions by non-financial companies of financial companies).

'Financial companies' as defined comprises companies falling within Minimum List Headings 860-2 of the Standard Industrial Classification 1968 (insurance; banking and bill discounting; other financial institutions — which include investment, hire purchase, export finance, leasing and factoring companies). Deals involving unincorporated businesses, and financial institutions such as building societies which are not incorporated under the Companies Act, are not covered. Companies with diverse activities are classified according to what appears to be the main one. In some cases the classification is necessarily arbitrary.

Acquisitions are defined as purchases which result in the buyer holding more than 50% of the equity capital of the company whose securities are acquired. Purchases of minority interests in existing subsidiaries and mergers of subsidiaries within the same company group are excluded. Where a company, in the course of acquiring a subsidiary, purchases preference or loan capital as well as equity, the whole amount of the transactions is included. Mergers are amalgamations effected by arrangement between companies.

The values shown relate to the consideration paid in respect of acquisitions and mergers, whether in cash or by the issue of securities. As far as possible, securities are included at market value. The amounts shown are those of expenditure during the current period and therefore do not include any previous investment in the company acquired. Purchases of shares on the stock exchange made directly in connection with successful bids are included. Mergers are valued as if the larger (or largest) company concerned had acquired the smaller. In general, amounts are included at the date when a bid

is declared unconditional or a contract to purchase is signed. An article introducing this series appeared in the September 1971 *Bulletin*, page 349.

Table 17: Investment trust companies

The investment trust companies which contribute returns are either members of the Association of Investment Trust Companies or are listed as investment trust companies by the stock exchange; 274 are covered by the most recent statistics. Returns are not sought from about sixty small trusts.

Net current assets do not take account of contingent assets and liabilities such as claims on, or sums due to, the Inland Revenue, or the liability for accrued loan interest and for dividends proposed but not yet paid. They include, however (in 'other short-term assets in the United Kingdom' or 'other short-term borrowing in the United Kingdom'), sums due from, or to, stockbrokers on account of securities sold or purchased and still awaiting settlement.

Transactions in investments are recorded when the contract is agreed; only transactions for cash are included. Valuation of listed securities at end-years is at market prices, except in the maturity classification where values are nominal. Unlisted securities are at current values, and bills and mortgages at maturity values. The figures include the investment currency premium where appropriate.

The end-year figures of assets may be reconciled approximately as follows:

£ millions	
Assets at end-1972	7,569.8
Transactions in trusts' own capital	— 21.1
Adjustment due to changes in trusts making returns	— 82.3
Undistributed income, changes in market valuation, capital gains tax, etc. (residual)	-1,743.9
Assets at end-1973	5,722.5

Transactions in trusts' own capital include net issues of share and debenture capital for cash (excluding estimated costs of issue), other identified long-term borrowing at home and abroad, and issues of capital against the acquisition of trusts not previously included in the statistics.

The present series was introduced in an article in the September 1961 *Bulletin*, page 29.

Table 18: Unit trusts

The returns cover virtually all unit trusts authorised by the Department of Trade under the Prevention of Fraud (Investments) Act 1958. They are collected in the main through the Association of Unit Trust Managers, but also include returns of trusts whose managers are not members of the association. The numbers of trusts covered by the returns were: 1973, March, 303; June, 308; September, 318; December, 321; 1974, March, 323; June, 327; September, 341. The definitions and valuation of net transactions and assets are the same as in Table 17.

The present series was introduced in an article in the September 1961 *Bulletin*, page 29.

Table 19: Property unit trusts

The statistics cover all nineteen UK property unit trusts for pension funds and charities. An article describing the origin and nature of these institutions appeared in the September 1969 *Bulletin*, page 294. Some transactions are financed by long-term borrowing and not by sales of units.

Table 20: Balance of payments

The figures for UK banks' net foreign currency borrowing or lending abroad are adjusted to exclude changes in the sterling valuation of overseas currency liabilities and claims between the beginning and end of periods. They do not, therefore, tally exactly with changes in the banks' net position as given in Table 23. Similarly, changes in holdings of British government stocks are shown at transactions values in this table but levels are at nominal values in Table 25. Since 23 August 1971 changes in official reserves are valued at transactions rates of exchange, and differ from the changes in the amounts outstanding as valued in Table 21.

Table 23: External liabilities and claims of UK banks in foreign currencies

The figures are gross, as shown in the reporting banks' books at the close of business on the last working day of the period, currency amounts being calculated in sterling mainly at the middle closing exchange rate on that day. Forward commitments and unsettled spot deals are not included. After December 1971 the series excludes commercial bills held by banks on behalf of customers and includes items in overseas sterling currencies. The figures for December 1971 have been adjusted to make them comparable with those for later dates. Contributing institutions differ somewhat from those in Table 11. The figures comprise:

UK liabilities

Deposits and advances received from non-residents; and negotiable dollar certificates of deposit issued in London. The series does not include official liabilities in foreign currencies arising from short-term loans to the UK Government and from drawings on central bank facilities.

UK claims

Deposits with, and advances to, non-residents; notes and coin; Treasury bills and similar short-term paper; commercial bills drawn on non-residents and claims on overseas customers arising from acceptances.

Middle East oil exporters comprise Bahrain, Iran, Iraq, Kuwait, Libya, Oman, Qatar, Saudi Arabia, and United Arab Emirates.

The residual figure under the heading 'other' includes China, Israel, Malta, and certain other countries with liabilities to UK banks of less than £5 million. It also includes unallocated items; under liabilities these are mainly unallocated dollar certificates of deposit, which are thought to be held by residents of foreign countries.

Table 24: Maturity analysis of liabilities and claims of UK banks in foreign currencies

All banks in the United Kingdom with permission to take deposits and make loans in foreign currencies contribute to the series.

Although these surveys provide useful general information about the market as a whole, they are only periodic snapshots of the position on a particular day; and that position can change rapidly as market circumstances vary. Further, the figures as reported need to be interpreted with care, for there may have been significant changes since the last return in the sterling valuation of the currencies reported.

Table 25: Exchange reserves in sterling; and banking and money market liabilities in sterling to holders other than central monetary institutions

This table brings together those figures which bear on the reserve role of sterling and also figures of cash or near-cash funds held in the United Kingdom by other overseas holders (e.g. commercial banks, companies and individuals).

Exchange reserves in sterling are funds held by central monetary institutions and international organisations. The detailed breakdown illustrates the extent to which countries choose to hold banking and money market assets as distinct from readily marketable investments in the form of government stocks (which are shown at nominal value). There are, of course, other holdings of sterling which countries may regard as part of their reserves. Some are included in banking and money market liabilities to other holders; others are in types of assets – equities, for example – which are not covered by the table.

Banking and money market liabilities to other overseas holders, like those held as part of sterling reserves, are the most liquid and normally the most variable of all the different types of sterling investments. Those held by non-sterling countries are particularly sensitive to interest-rate differentials and to changes in confidence in sterling. The holdings of the overseas sterling countries may also be affected by the same influences, but fluctuations in these holdings more usually reflect movements between cash balances and marketable investments not included in this table and changes in the working balances of overseas banks and commercial concerns.

Banking and money market liabilities comprise:

a Deposits and Treasury bills (see below) held for banks overseas (including overseas offices of UK banks) and other account-holders abroad, by banks and their nominee companies in the United Kingdom, and by certain other financial institutions. Similar funds held with the Crown Agents for Oversea Governments and Administrations are also included.

The following amounts of sterling certificates of deposit are included under external deposits with banks:

£ millions	
End of	
1971	59
1972	97
1973 2nd quarter	114
3rd quarter	94
4th quarter	128
1974 1st quarter	132
Apr.	92
May	96
June	114
July	101
Aug.	92
Sept.	76

The following amounts of non-interest-bearing notes held by international organisations, (other than the IMF) are included under Treasury bills:

£ millions	
End of	
1971	86
1972	112
1973 2nd quarter	99
3rd quarter	91
4th quarter	135
1974 1st quarter	128
Apr.	120
May	120
June	119
July	111
Aug.	107
Sept.	120

b Temporary loans to and bills drawn on local authorities, and deposits with hire-purchase finance companies, whether made direct by non-residents or by UK banks and other UK agents for account of non-residents.

Liabilities to the IMF are excluded; the United Kingdom's outstanding drawings on the Fund from March 1969 are shown in Table 22.

The break in the series for deposits with banks and hire-purchase finance companies after February 1972 arises from the reclassification of several hire-purchase companies as banks after that date.

Overseas sterling countries comprise Australia, Bahamas, Bahrain, Bangladesh, Barbados, Belize, Bermuda, Brunei, Cyprus, Gambia, Ghana, Gibraltar, Guyana, Hong Kong, Iceland, India, Jamaica, Jordan, Kenya, Kuwait, Malawi, Malaysia, Malta, New Zealand, Nigeria, Oman, Pakistan, Qatar, Sierra Leone, Singapore, South Africa, South Yemen, Sri Lanka, Tanzania, Trinidad and Tobago, Uganda, United Arab Emirates, Zambia, and other UK dependent territories.

Table 26: External advances and overdrafts in sterling

This table shows the extent to which UK banks provide financial accommodation in the form of cash to overseas residents. The greater part is believed to represent advances and overdrafts given by UK banks to their own branches and correspondents overseas.

Table 27: UK short-term money rates

Bank of England's minimum lending rate

Previously known as Bank rate. The minimum rate at which the Bank, acting as lender of last resort, normally lends to members of the discount market against security of Treasury bills, other approved bills, or government stocks with five years or less to maturity. From 13 October 1972, the rate is automatically set $\frac{1}{2}\%$ higher than the average rate of discount for Treasury bills established at the weekly tender, rounded to the nearest $\frac{1}{4}\%$ above. The rate becomes effective, for lending by the Bank, from the following Monday. Special changes in the rate are not excluded under this system, in which event the operation of the formula is temporarily suspended until market rates have adjusted themselves to the new rate.

Treasury bills

The average rate of discount on allotment for 91-day bills at the weekly tender.

Trade bills

The rate at which bills are discounted depends on their quality. The figures shown are for bills of good quality; some bills are discounted at other rates.

London clearing banks' base rate

Each bank has a single base rate, which may sometimes differ from those of other banks. Since the beginning of October 1971 the rates of interest charged by the London clearing banks for their advances to customers and their discounting of trade bills have been, in general, linked to their own individually declared base rates. The rates charged for advances depend on the nature and status of the customer. Most lending is between 1% and 5% higher than base rate. In December 1973, however, the clearing banks announced that, in order to curtail arbitrage transactions by their customers, they proposed to indicate to certain customers (in particular local authorities, finance houses, and other banks) that advances would in future be related to market rates instead of to base rates. The following are now the only uniform rates paid on unsecured overdrafts and loans made by the clearing banks:

Customer	Rate
Nationalised industries, with Treasury guarantee	Syndicated base rate [a] +½% or 1%
Export loans other than for ships, with ECGD guarantee:	
up to two years	Base rate +½% (4½% minimum)
two to five years	7%
over five years	6%–8½%
Term loans for exports of ships, with ECGD guarantee, and domestic shipbuilding, with Department of Industry guarantee:	
over two years	7½%

[a] The syndicated rate is agreed by the banks from time to time in the light of their declared base rates.

The rates for exports and domestic shipbuilding exclude management and commitment charges and negotiation fees. Such additional charges are not made on overdrafts.

Call money

Overnight secured loans to the discount market.

Local authorities: three months' temporary loans

For a minimum term of three months and thereafter at seven days' notice.

From January 1973 the method has been modified as explained in an article in the September 1973 *Bulletin*, page 315. All dated stocks are used in this calculation, except those where:

- the total market issue is less than £150 million;
- there is provision for a sinking fund, redemption by drawings or an option for the holder to convert into another stock; or
- the stock matures in less than one year.

3½% War Loan is also included in the calculation of the curve as the representative undated stock, because it is the most widely held, and its flat yield is shown in the table. The monthly average yield on 2½% Consols is published in *Financial Statistics*.

Debenture and loan stocks

The redemption yield on high-coupon debenture and loan stocks is taken from an index developed by the Bank of England to provide a measure of the yield to buyers of debentures which may be compared with the yield on government stocks of similar maturity. The constituents of the index are eighteen first-class debenture and loan stocks which have a high coupon (over 7%) and in which there is an active market; the average term to maturity of the stocks is between twenty and twenty-five years. The yield is an unweighted arithmetic average of the yield of individual stocks and is based on buying prices plus expenses.

The Financial Times-Actuaries index of debenture and loan stocks is not restricted to high-coupon stocks and is based on middle market prices. The yields of the fifteen constituent stocks are combined to give an average yield for a stock with a term to redemption of twenty years.

Industrial ordinary shares

The dividend yield is gross. From February 1973 the yield is calculated by grossing up the net dividend yield at the advance corporation tax rate (30% until 29 April 1974 and 33% from 30 April).

The method of calculation of the earnings yield was changed in February 1973 in anticipation of the system of imputation which became effective on 6 April 1973. From February 1973 earnings are taken as net profit (gross profit less corporation tax, at 50% until 29 April 1974 and at 52% from 30 April, unrelieved advance corporation tax, other charges and preference dividends) grossed up at the advance corporation tax rate; full distribution of earnings is assumed. Before February 1973, earnings were taken as gross profit less corporation tax at 40%, other charges and gross preference dividends.

Table 29: Foreign exchange rates

3 Against the special drawing right

This table shows currency units per SDR as calculated by the International Monetary Fund. The calculation was described in an article in the September *Bulletin*, page 281.

4 Effective changes

This table shows effective changes in exchange rates since 21 December 1971 – immediately after the Smithsonian settlement. Estimates are made of the effects on each country's visible trade balance of the actual changes in the main exchange rates since the base date. The effective change in each case is simply equivalent to an estimate of the unilateral change in the exchange rate which would have produced the same effect. The estimates incorporate a number of arbitrary assumptions about the responsiveness of trade flows to price changes, and they are not to be regarded as definitive. (For a fuller description, see *Economic Trends*, June 1974.)

Table 30: UK security yields

Government stocks

The flat yield on a security is the annual amount receivable in interest, expressed as a percentage of the purchase price. The gross (i.e. tax ignored) redemption yield comprises the gross flat yield together with the apportionment of the capital gain or loss on dated securities held to redemption; more precisely, it is the rate of interest which, if used to discount future dividends and the sum due at redemption, makes their present value equal to the present price of the stock. In calculating yields on stocks with alternative redemption dates, redemption is assumed at the later date when the price, net of accrued interest, is below par (that is when the flat yield is above the nominal rate) and at the earlier date when the price is above par.

The table shows gross redemption yields for selected maturities derived from yield-maturity curves fitted mathematically. The method was described in an article in the December 1972 *Bulletin*, page 467.
