

Statistical annex

The future composition of the statistical annex

The statistical annex has been an integral part of the *Bulletin* since it was first issued at the end of 1960. At that time its principal aim, in line with the recommendations of the report of the Radcliffe Committee on the Working of the Monetary System, was to make more financial statistics available to the general public. A secondary aim was to provide figures to illustrate and support the commentary in the *Bulletin*. The annex thus became, and has remained, the main medium for publishing statistics compiled by the Bank.

It has, however, become appropriate to review the rôle and content of the annex in the light of three main developments. First, in 1963 the Central Statistical Office introduced their publication *Financial Statistics*. This has a broader coverage than the annex and, because it is issued monthly, contains more up-to-date information. There has inevitably been a considerable overlap between the two publications, although the annex has always contained some tables not covered in *Financial Statistics*.

Secondly, there has been a substantial growth in the volume of financial statistics, especially banking statistics, available for publication and in the production of financial analyses and accounts. *Financial Statistics* and the annex have both been expanded to cater for this growth — the annex is now roughly double its original size — and, as a result, what was once held to be acceptable overlap has tended to become regarded as wasteful duplication. This problem has been highlighted as demand for the *Bulletin* has increased and the quarterly print order has risen to nearly 17,000.

Thirdly, a factor of growing importance in recent years is the more widespread use of computers for data storage and a related demand for data in machine-readable form.

The conclusion has now been reached in the light of these developments that changes should be made in the range of statistical services provided by the Bank for the general public and that these should now comprise:

- (i) The annex reduced to about half its present size. With only minor exceptions, the information no longer to be carried in the annex will all be contained in *Financial Statistics*.^[1] The reduction is planned to begin with the March 1979 issue of the *Bulletin*.
- (ii) A magnetic tape service, covering all the tables in the current issue of the annex but with longer runs and, in some cases, more frequent observations and additional details. This service is immediately available.
- (iii) Long runs of certain series or groups of series generated to more specific demand and duplicated from computer print-out. It is hoped that this service will be available from June 1979; details will be announced later.

A charge will be made for items (ii) and (iii) to cover basic production costs. Consideration is also to be given to separate publication of one or a series of handbooks of financial statistics, but decisions on this will depend on the extent of demand for the services at (ii) and (iii) above.

The Bank are grateful to the Central Statistical Office for agreeing to expand the coverage of *Financial Statistics* to include tables which will no longer appear in the annex. Attention is also drawn to the CSO's 'Data Service',^[2] under which long runs of selected tables from *Financial Statistics* are available, at cost of production, in the form of computer print-out.

List of tables

The tales should be used in conjunction with the additional notes which follow them. Some figures may subsequently be revised, as more complete information becomes available.

- 1 Bank of England
- 2 1 Banks in the United Kingdom: summary
2 British banks: London clearing banks
3 British banks: Scottish clearing banks
4 British banks: Northern Ireland banks
5 British banks: accepting houses
6 British banks: other
7 Overseas banks: American
8 Overseas banks: Japanese
9 Overseas banks: other
10 Consortium banks
- 3 Eligible liabilities, reserve assets, reserve ratios and special deposits:
1 Banks
2 Finance houses
3 Special and supplementary deposits
- 4 Analysis of advances in sterling and foreign currencies to UK residents by banks in the United Kingdom
- 5 Discount market
- 6 UK banking sector:
1 Liabilities and assets outstanding
2 Further analysis
3 Transactions in liabilities and assets
- 7 Central government borrowing requirement and its financing
- 8 Analysis of government debt:
1 Stocks
2 Treasury bills
3 National savings

- 10 Currency circulation
- 11 Money stock:
1 Amounts outstanding
2 Changes
3 Public sector borrowing requirement, domestic credit expansion and money stock
- 12 Stock exchange transactions
- 13 Transactions in British government stocks on the stock exchange
- 14 Capital issues on the UK market (excluding British government stocks):
1 Gross domestic and international issues
2 Net domestic issues
3 Net domestic issues by listed UK public companies
- 15 Acquisitions and mergers by financial companies within the United Kingdom:
1 Type of transaction
2 Business of acquiring company
- 16 Investment trust companies
- 17 Unit trusts
- 18 Property unit trusts
- 19 Exchange reserves in sterling; and banking and money-market liabilities in sterling to holders other than central monetary institutions:
1 Exchange reserves in sterling held by central monetary institutions
2 Banking and money-market liabilities to other holders
- 20 External liabilities and claims of UK banks and certain other institutions in foreign currencies:
1 Summary
2 Geographical details

[1] Published monthly by HM Stationery Office. Annual subscription, including Explanatory Handbook and postage, £46.36.

[2] Introduced with the October issue of *Financial Statistics*. Enquiries to The Editor (133A/4), Central Statistical Office, Great George Street, London SW1P 3AQ.

- 21** Maturity analysis of liabilities and claims of UK banks and certain other institutions in foreign currencies:
 1 Summary
 2 Sectoral analysis of net positions
 3 Sectoral analysis of liabilities and claims
- 22** External liabilities, in total, and external claims, by maturity, of banks and certain other financial institutions at end-June 1978:
 1 Summary: foreign currency and sterling
 2 Summary: foreign currency
 3 Detailed analysis of claims: foreign currency and sterling
 4 Detailed analysis of claims: foreign currency
- 23** External positions in domestic and foreign currency of banks in the BIS reporting area and of certain off-shore branches of US banks:
 1 Detailed analysis: end-March 1978
 2 Summary
- 24** Reserves and related items
- 25** 1 Outstanding official short and medium-term borrowing from abroad
 2 Schedule of capital repayments of government and other public sector foreign currency borrowing outstanding at 30 September 1978
 3 Schedule of interest payments on government and other public sector foreign currency borrowing outstanding at 30 September 1978
- 26** Balance of payments
- 27** UK security yields
- 28** UK short-term money rates
- 29** Exchange rates and comparative interest rates
- 30** Foreign exchange rates:
 1 Against sterling
 2 Against US dollars
 3 Against special drawing rights
 4 Indices of effective exchange rates
- 31** Flow of funds accounts:
 1 Flow of funds accounts, not seasonally adjusted
 2 Flow of funds accounts, seasonally adjusted
 3 Income and expenditure
 4 Public sector
 5 Overseas sector
 6 Personal sector
 7 Industrial and commercial companies
 8 Banking sector
 9 Financial institutions other than banks
 10 All financial institutions

Additional notes to the tables

Symbols and conventions

... not available.

— nil or less than half the final digit shown.

... figures above and below are not strictly comparable.

Owing to rounding of figures, the sum of the separate items will sometimes differ from the total shown.

'Government stocks' comprise British government and government-guaranteed stocks (now only those of the gas and electricity industries).

Changes in this issue

Tables 2.1 to 2.10

These tables have been slightly rearranged to provide a breakdown between the private and public sectors of UK sterling deposits and advances and also, in Table 2.1, to distinguish throughout between sterling and foreign currency items. Details of eligible liabilities and reserve ratios have been omitted but are still shown in Table 3.

Tables 7 and 8

Holdings of central government debt by other parts of the public sector and by the non-bank private sector are now shown separately.

Table 11.3

The monthly figures for the public sector element of DCE are now subdivided into: CGBR; purchases of central government debt by the non-bank private sector; and the net contribution of the rest of the public sector. The three-monthly series which previously included this analysis no longer appears. A further analysis of purchases of central government debt by the non-bank private sector is given in the additional notes to Table 11.

[a] Including 'government debt' £11 million.

[b] Including 'capital' £14.6 million.

[c] Including supplementary deposits between July 1974 and February 1975, between May and July 1977 and in November 1978.

[d] From this date, premises (within 'premises, equipment and other securities') are being valued professionally on an open-market value for existing use basis. The corresponding increase on the liabilities side is under 'reserves and other accounts'.

Additional notes follow the tables

[a] Breaks in series are caused by movements of banks between groups.

[b] The National Girobank became a contributor to this series (and to Table 2) in October 1978; for further details see the additional notes to Table 2. The first line of figures excludes those for National Girobank, whilst the second line includes it. See Table 2.1 for the alternative presentation of the constitution of total reserve assets.

[a] Including lending under special schemes for domestic shipbuilding.

[b] The analysis provided by Northern Ireland banks differs slightly from other banks. Chemicals and allied industries are included indistinguishably in 'other manufacturing'; and metal manufacture, electrical engineering, shipbuilding, and vehicles in 'other engineering and metal goods'.

[c] The figures exclude as far as possible the effect of changes in exchange rates on the sterling value of advances in foreign currencies.

Additional notes follow the tables

[d] Under the reorganisation of the trustee savings banks, the Fund for Banks of Savings (a government fund) repaid £28 million to the new TSB departments in December 1976.											
[e] The Banking Department's holdings of government debt and of notes and coin, less its deposit liabilities to the National Loans Fund and the Paymaster General.											
[f] Certificates of tax deposit are included as from the fourth quarter of 1975. Banks last held tax reserve certificates in December 1974.											
[g] National Insurance Funds transactions in local authority debt are included as from the second quarter of 1975.

[a] Changes in money stock may differ from those which can be calculated by reference to amounts outstanding in Table 11.1.

[b] After deducting 60% of transit items; see additional notes to Table 6.

[c] M₁ equals columns 1 + 2 + 3. Sterling M₂ equals M₁ + columns 5 + 6. M₃ equals sterling M₂ + columns 8 + 9.

[d] Including certificates of deposit.

[e] See additional notes.

[f] The quarterly seasonal adjustments have been revised.

[a] See Table 7 (quarters only).

[b] See additional notes.

[c] Bank lending in sterling to the private sector (see Table 6.3) plus Issue Department's holdings of commercial bills (see Table 7, quarters only).

[d] See Table 6.3.

[e] Domestic credit expansion equals the sum of columns 1 to 6. Sterling M₃ equals domestic credit expansion plus columns 8, 9, 10 and 11—see also Table 11.2.

[f] Banks' foreign currency deposits from, less foreign currency lending to, UK and overseas residents—see Table 6.3.

[a] The quarterly seasonal adjustments have been revised.

[b] The seasonally-adjusted figures for the public sector borrowing requirement add to the same total in a calendar year as the unadjusted figures on the opposite page.

[c] See additional notes.

[d] Bank lending in sterling to the private sector (see Table 6.3) plus Issue Department's holdings of commercial bills (see Table 7, quarters only).

[e] See Table 6.3.

[f] Domestic credit expansion equals the sum of columns 1 to 6. Sterling M_s equals domestic credit expansion plus columns 8, 9, 10 and 11—see also Table 11.2.

Additional notes follow the tables

Table 12

[a] Figures represent the sum of both brokers' purchases and their sales on behalf of clients—the transfer of a security from one investor to another therefore counts twice in the totals.

Additional notes follow the tables

Table 12

Table 13

Transactions in British government stocks on the stock exchange

£ millions: percentage of total in italics

[a] Net acquisitions of British government stocks by the public are recorded in Table 8.1.

[b] The figures for May and September include £269.4 million and £179.6 million, respectively, being instalment payments on a rights issue by BL Ltd (formerly British Leyland Ltd), over 99% of which was taken up by the National Enterprise Board.

[c] Figures of convertible issues are shown separately in the additional notes.

Additional notes follow the tables

[a] Net acquisitions of British government stocks by the public are recorded in Table 8.1.

[b] Figures of convertible issues are shown separately in the additional notes.

[c] The figures for May and September include £269.4 million and £179.6 million, respectively, being instalment payments on a rights issue by BL Ltd (formerly British Leyland Ltd), over 99% of which was taken up by the National Enterprise Board.

[a] Banks' holdings of London dollar certificates of deposit and other negotiable paper issued by listed banks have been included according to maturity date. The alternative figures in *italics* show the effect of treating all such holdings as immediately realisable assets.

[b] These items cannot be analysed by sector and individual bank group; they are therefore excluded from the sectoral analysis in Tables 21.2 and 21.3.

[a] Austria, Belgium/Luxembourg, Canada, Denmark, France, Italy, Japan, the Netherlands, Republic of Ireland, Sweden, Switzerland, the United Kingdom, the United States and Western Germany.
 [b] Foreign branches of US banks in the Bahamas, Cayman Islands, Panama, Lebanon, Hong Kong and Singapore.

[c] For liabilities and assets of banks in Canada, Japan, Switzerland and the United States a full country breakdown is not available. Positions of the banks in these countries have been allocated as indicated in the table by the following: H = Switzerland, C = Canada, J = Japan and U = United States.

[d] Excludes positions of banks in Western Germany vis-à-vis the German Democratic Republic.

[e] Figures for the US banks' liabilities and assets vis-à-vis the Cayman Islands are estimates based on other statistical reports.

[f] Includes positions of Japanese banks vis-à-vis Kuwait, Saudi Arabia, United Arab Emirates, Iran, Iraq and Libya only.

[g] Includes on a partly estimated basis the positions of US banks vis-à-vis Middle Eastern countries other than Egypt, Israel, Lebanon, Libya (which is included under the residual for 'other Africa') and Syria.

[h] Excludes, except in the case of the Dutch, UK banks and the foreign branches of US banks in the Caribbean Area and the Far East, regional institutions which are included under the residual items for the respective areas. The positions vis-à-vis the BIS are included under Switzerland, except for the US banks which report them under the residual for 'other countries in Western Europe'.

The above table is reproduced by permission of the Bank for International Settlements.

The figures in this table are partly based on estimates.

- [a] Up to December 1977 (December I) the reporting area covered Belgium/Luxembourg, Canada, France, Italy, Japan, the Netherlands, Sweden, Switzerland, United Kingdom, United States and Western Germany. Since 1977 (December II) it also includes Austria, Denmark and the Republic of Ireland; consequently, positions vis-à-vis Austria, Denmark and the Republic of Ireland have been excluded from the positions vis-à-vis 'other countries in Western Europe' from 1977 (December II).
- [b] Foreign branches of US banks in the Bahamas, the Cayman Islands, Panama, Hong Kong and Singapore. As from September 1977 these figures include also the branches of US banks in the Lebanon, but the figures involved are very small.
- [c] The Bahamas, Barbados, Bermuda, the Cayman Islands, Hong Kong, Lebanon, Liberia, Netherlands Antilles, New Hebrides, Panama, Singapore and West Indies.
- [d] Including those countries in the Caribbean Area which cannot be considered as off-shore banking centres.
- [e] Including international institutions.

[a] From end-December 1971, convertible currencies are valued at middle or central rates. Special drawing rights are valued at SDR1 = \$1 until end-November 1971; at SDR1 = \$1.08571 from end-December 1971 until end-January 1973, and at SDR1 = \$1.20635 from end-February 1973 onwards. Gold is valued at \$35 per fine ounce until end-November 1971; at \$38 per fine ounce from end-December 1971 until end-January 1973; and at \$42.2222 per fine ounce from end-February 1973 onwards.

[b] Represents an automatic drawing right on the Fund and equals the amount by which the UK quota exceeds holdings of sterling by the IMF; apart from UK drawings/repurchases, it will rise or fall as other countries draw sterling from or repay sterling to, the IMF. It was included in the reserves after June 1972.

3rd "	16,401	3,062	—	—	4,350	8,989

[a] The borrowing included is that recorded (at market related rates of exchange) as official financing in the balance of payments accounts. Amounts outstanding in non-dollar currencies have been converted to dollars at the parity or central rates obtaining at the dates shown.

[b] Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries.

Excludes interest, charges in sterling, and from 1972 transactions which affect the United Kingdom's reserve position in the IMF.

[c] In December 1971, and again in February 1973, the US dollar was devalued against gold. The amounts shown are therefore increased by the extent to which the dollar depreciated against the currencies in which assistance was taken.

[a] Figures as published in the article 'United Kingdom balance of payments in the third quarter of 1978' in *Economic Trends*, December 1978. Definitions of the items in this table are given in *United Kingdom Balance of Payments 1967-77* (HMSO, September 1978) and in a technical note in *Economic Trends*, June 1976. See also additional notes.

[b] This total excludes foreign currency borrowing by the public sector under the exchange cover scheme, which is shown as a financing item.

[c] Includes certain other financial institutions. Excludes foreign currency borrowing under the exchange cover scheme.

[a] Consisting principally of lending to overseas and private sectors (including refinancing of export credits), advance payments on imports by public corporations and their identified domestic trade credit, changes in bank deposits, and accruals adjustments (for definition, see the note on line 19 to Tables 31.1 and 31.2).

[b] Other domestic borrowing, less net acquisitions of local authority debt and commercial bills and receipts from public corporations for the redemption of government-guaranteed stocks. Includes payments to local authorities and public corporations under the exchange cover scheme.

[c] Includes receipts from the central government under the exchange cover scheme.

[d] Includes payments to the central government for the redemption of government-guaranteed stocks.

[e] Repayments of foreign currency borrowing under the exchange cover scheme are recorded at current market rates, as are the corresponding transactions in the official reserves. The differences from the sterling actually paid (at the original borrowing rates) by the local authorities and public corporations are entered as receipts from the central government.

[a] It has not been possible to include in this table the balance of payments estimates for the third quarter of 1978, and revisions to previous quarters, which were released early in December.

[b] Other than net purchases of securities. Includes foreign currency borrowing from abroad to finance lending to the UK public sector.

[c] These overseas transactions of the public sector increase its borrowing requirement.

[d] These overseas transactions of the public sector are among the items financing its borrowing requirement (see Table 31.4).

[a] Includes transactions in commercial bills by the Issue Department and accruals adjustments.

[b] Treasury bills, British government stocks, local authority temporary debt, tax reserve certificates, tax deposit accounts, certificates of tax deposit, and deposits with other financial institutions. The figures for government stocks relate only to transactions by those large companies covered by the Department of Industry's survey of company liquidity.

[c] Includes long-term local authority debt, net trade credit with public corporations and instalment credit granted by retailers.

[d] Most of the balancing item in the balance of payments accounts, especially when large, probably reflects unidentified transactions between companies and overseas. It is deducted from the total amount unidentified in the company accounts to leave a rough estimate of unidentified domestic transactions.

 Unit Trust Association

Tables 2 to 5

An updated list of contributors to these tables as at mid-October 1977 was published separately with the December 1977 *Bulletin* and subsequent amendments were published in the March, June and September issues of the *Bulletin*. The following further amendments had been made up to 1 November:

British banks: accepting houses

<i>Add</i>	
25 September	Charterhouse Japhet (Jersey) Limited
<i>British banks: other</i>	
<i>Add</i>	
25 September	Robert Fleming & Co. Limited National Girobank

Overseas banks: American

<i>Add</i>	
25 September	First National Bank of Maryland
<i>Overseas banks: other</i>	
<i>Delete</i>	
25 September	Barclays Western Bank Limited
<i>Change of name</i>	
	Credit Suisse First Boston Limited (formerly Credit Suisse White Weld Limited)

Revisions to the lists of contributors are generally made at the end of the calendar quarter in which the event occurs, and a notice is circulated to reporting institutions.

Table 2: Banks in the United Kingdom

An article describing the main features of the current series of banking statistics which were introduced in May 1975 may be found in the June 1975 *Bulletin* (page 162).

The table covers all banks observing the common 12½% reserve ratio introduced on 16 September 1971; it excludes the Banking Department of the Bank of England and the five money trading departments of listed banks together with other institutions observing an undefined assets multiple (see the notes to Table 5) but, with effect from October 1978, includes the National Girobank which hitherto had been outside the normal credit control arrangements although included within the banking sector. Table 2.1, which summarises the figures of the contributors to Tables 2.2 to 2.10, is thus not comparable with Table 6 which covers the whole banking sector. Also, the adjustments made in Table 6 to eliminate inter-bank transactions and transit items (see the notes to Table 6) have not been made in this table. The figures cover the business of all the banks' offices within the United Kingdom. Reporting day is the third Wednesday in each month, except in December when it is the second Wednesday.

Liabilities and assets are reported at the value standing in the reporting banks' books. Liabilities and assets in currencies other than sterling are converted into sterling at the closing middle market spot rate on reporting days. The figures are therefore affected by movements in exchange rates.

The residential status of an official body, body corporate or person in the statistics follows the exchange control regulations. Under them, the United Kingdom comprises Great Britain, Northern Ireland, the Isle of Man and the Channel Islands. UK residents include the Government and other UK public authorities, UK diplomatic and military representatives overseas, companies and branches (including agents and agencies acting for or on behalf of them) which are established and operating in the United Kingdom and persons of overseas origin who are in the United Kingdom and who are classified as UK residents.

Overseas residents include overseas governments and public authorities (including their diplomatic and military representatives in the United Kingdom), London offices of official monetary institutions, international organisations and their branches or representatives in the United Kingdom, companies and branches (including agents and agencies acting for or on behalf of them) which are established and operating outside the United Kingdom and persons, including those of UK origin, who have taken up residence outside the United Kingdom.

Deposit liabilities includes all credit balances on customers' accounts, including deposits by other banks (except deposits in connexion with syndicated lending); overdrawn accounts with UK and overseas correspondents; and deposits by overseas offices of the reporting bank (except working capital provided by overseas offices which is invested in fixed assets). It also includes certificates of deposit and all liabilities in gold bullion or gold coin except that deposited for safe custody. For the definition of the UK banking sector see additional notes to Table 6.

Sight deposits comprises balances as defined above, whether interest-bearing or not, which are transferable or withdrawable on demand without interest penalty (or interest indemnity). It includes money immediately at call and money placed overnight.

Time deposits comprises all other deposit liabilities as defined above (with the exception of certificates of deposit which are shown separately). Included are promissory notes issued by the reporting bank; bills drawn by the reporting bank under an acceptance credit facility provided by another bank; and such instruments as silver and other commodity deposit receipts.

Items in suspense and transmission comprises credit balances not in customers' names but relating to customers' funds rather than to banks' internal funds or to shareholders' funds, together with standing orders and credit transfers debited to customers' accounts, and other items for which the corresponding payment has not yet been made by the reporting bank. It includes credits in course of transmission to the banks' own UK branches, the UK branches of other banks and to banks and banking offices abroad.

Capital and other funds includes shareholders' funds, working capital provided by overseas offices, together with all internal accounts (both liability and asset).

For details of *eligible liabilities*, *reserve assets*, *reserve ratios* and *special and supplementary deposits* see additional notes to Table 3.

Market loans (other than reserve assets) includes all balances (including correspondent balances) with, and funds lent to, listed banks and to banks overseas, apart from trade or portfolio investments. For other UK institutions it includes only funds lent through brokers or in special financial markets, such as the local authority money market and the finance company deposit market, i.e. it does not include funds lent direct to the reporting banks' customers in the ordinary course of banking business.

Market loans to banks in the United Kingdom includes bills drawn by other listed banks under acceptance credit facilities and discounted by the reporting bank, promissory notes and other negotiable paper (excluding certificates of deposit) issued by listed banks. *Market loans to the discount market* comprises funds which are not both secured and immediately callable, i.e. it includes non-reserve asset money with the discount houses, the discount brokers and the money trading departments of listed banks. *Certificates of deposit* includes only those issued by UK listed banks. Non-reserve asset money with listed money brokers is included under *market loans to UK private sector*.

Market loans to overseas includes bills drawn under acceptance credit facilities opened by overseas banks (including overseas offices of the reporting bank) which the reporting bank has itself discounted, and certificates of deposit, promissory notes and other negotiable paper issued by overseas banks and owned by the reporting bank.

Bills (other than reserve assets) includes bills, promissory notes and other negotiable paper (excluding certificates of deposit) owned by

the reporting bank. It excludes acceptances by the reporting bank which it has also discounted, bills connected with refinanceable lending under the special schemes for exports and shipbuilding, and bills which the reporting bank has disposed of by rediscounting. Bills and notes are classified according to the currency in which they are drawn.

Advances includes all balances with, and lending (whether against collateral or not) direct to, customers not included elsewhere. It includes the reporting bank's own acceptances which it has also discounted, except for those drawn by another listed bank or by banks overseas, which are entered under market loans. Own acceptances discounted are shown as advances to the party on whose behalf the acceptance credit has been opened. Provisions for bad and doubtful debts are not deducted. Where the reporting bank participates in (or acts as manager or co-manager of) a loan financed by more than one institution, it includes only the reporting bank's participation for its own account, the loan being classified according to the ultimate borrower. *Advances to UK private sector* includes all medium and long-term (i.e. with an original maturity of two years and over) refinanceable lending at fixed rates for domestic shipbuilding under Department of Industry guarantee, less any amounts refinanced. Non-reserve asset money with jobbers on the stock exchange is also included. *Advances to overseas* includes all medium and long-term lending, whether or not refinanceable, at fixed rates for exports under ECGD guarantee, less any amounts refinanced, and all short-term export lending (i.e. with an original maturity of up to two years) at rates related to base rate under ECGD comprehensive bill and open-account guarantee schemes.

Investments includes all securities beneficially owned by the reporting bank or branch. It includes securities which the reporting bank has lent (or pledged) but still beneficially owns, but excludes securities which the reporting bank has borrowed and which it does not beneficially own.

British government stocks includes all stocks issued by the Government and stocks of nationalised industries guaranteed by the Government. *Other public sector investments* includes stocks and bonds issued by local authorities except mortgage bonds, which are included in advances. *Other investments* includes all investments in listed banks which are subsidiaries or associates of the reporting bank, and deposits with overseas offices which have been invested in fixed assets such as premises and equipment.

Items in suspense includes all debit balances not in customers' names but related to customers' funds rather than to the banks' own internal funds, e.g. debit balances awaiting transfer to customers' accounts. *Collections* comprises cheques etc. drawn on and in course of collection on banks and other institutions in the United Kingdom and debit items in transit between UK offices of the reporting bank. It includes cheques that have been credited to customers' accounts but are held overnight before being presented or paid into another bank, but excludes cheques already passed to other listed banks for collection (these are entered as balances with UK banks). It includes all collections on banks outside the United Kingdom and items in transit to overseas offices of the reporting bank, where the reporting bank is acting as principal and not as an agent for collection and where it has already given credit or value for the items.

Assets leased includes all plant and equipment beneficially owned by the reporting bank which has been leased out (except plant and equipment leased to branches, subsidiaries or associates overseas which are treated as overseas investments).

Other miscellaneous assets includes unallocated gold bullion and gold coin. It also includes other commodities (e.g. silver), land, premises, plant and equipment and other goods beneficially owned, but excluding assets leased.

Acceptances comprises all acceptances given by the reporting bank which are still outstanding, excluding any which the reporting bank has also itself discounted, but including any such discounts which have been rediscounted.

Tables 2.2 to 2.10 provide, for each group of banks, the same basic information, but in rather less detail.

2 London clearing banks

This group comprises the members of the Committee of London Clearing Bankers.

3 Scottish clearing banks

This group comprises the members of the Committee of Scottish Clearing Bankers.

Notes outstanding includes the 'authorised' circulation, which was approximately £2.7 million at all dates shown; the remaining notes are covered by holdings of Bank of England notes and by coin. These form part of *notes and coin*, which also includes the banks' holdings of each other's notes.

4 Northern Ireland banks

This group comprises the members of the Northern Ireland Bankers' Association, which includes two banks with head offices in the Republic of Ireland. The figures relate to the liabilities and assets of their banking offices situated within Northern Ireland.

Notes outstanding includes the 'authorised' circulation which was approximately £2 million at all dates shown.

5 Accepting houses

This group comprises the members of the Accepting Houses Committee together with certain of their Channel Islands and Isle of Man banking subsidiaries.

6 Other British banks

All other banks with majority UK ownership (excluding consortium banks where there is foreign participation), including their Channel Islands and Isle of Man subsidiaries. It also includes the Great Britain offices of the Northern Ireland banks and the UK branches of three banks with head offices in the Republic of Ireland which are subsidiaries of members of the Northern Ireland Bankers' Association.

7 American banks

Branches and subsidiaries of American banks, including subsidiaries operating in the Channel Islands.

8 Japanese banks

The UK branches of Japanese banks.

9 Other overseas banks

All other branches and subsidiaries of foreign banks, including Channel Islands subsidiaries.

10 Consortium banks

Banks which are owned by other banks but in which no one bank has a direct shareholding of more than 50%, and in which at least one shareholder is an overseas bank.

Table 3: Eligible liabilities, reserve assets, reserve ratios and special deposits

Full definitions of reserve ratio items, which were introduced on 16 September 1971, were contained in an article 'Reserve ratios: further definitions' in the December 1971 *Bulletin* (page 482).

1 Banks

Eligible liabilities comprises, in broad terms, sterling deposit liabilities, excluding deposits having an original maturity of over two years, plus any sterling resources obtained by switching foreign currencies into sterling. Inter-bank transactions and transactions with the discount market (other than reserve assets) and sterling certificates of deposit (both held and issued) are taken into the calculation of individual banks' liabilities on a net basis, irrespective of term. Adjustments are also made in respect of transit items.

Reserve assets comprises *balances with the Bank of England* (other than special and supplementary deposits); *money at call* (secured and immediately callable) with the listed discount market institutions (discount houses, discount brokers and the money trading departments of listed banks) and with listed brokers (money brokers and jobbers on the stock exchange); *British government and Northern Ireland government Treasury bills*; *UK local authority bills* eligible for rediscount at the Bank of England; *commercial bills* eligible for rediscount at the Bank of England—up to a maximum of 2% of eligible liabilities (these comprise bills which are payable in the United Kingdom and have been accepted by banks which are members of the Committee of London Clearing Bankers, or the Committee of Scottish Clearing Bankers, or the Accepting Houses Committee, or by British overseas banks or certain other banks having their head offices in the Commonwealth and with long-established branches in London); and *British government stocks* and stocks of nationalised industries guaranteed by the Government with one year or less to final maturity.

The *reserve ratio* is the total of reserve assets as a percentage of the total of eligible liabilities. Each bank is required to maintain reserve assets amounting to at least 12½% of its eligible liabilities.

2 Finance houses

Eligible liabilities comprises deposits with an original maturity of two years or less received from UK residents, other than banks, and from overseas. The definition of *reserve assets* and the method of calculation of the *reserve ratio* are the same as for banks.

The figures shown relate to certain of the larger finance houses which have agreed to observe the common 10% reserve ratio introduced on 16 September 1971.

3 Special and supplementary deposits

Special deposits may be called by the Bank of England from all banks observing the common 12½% reserve ratio and from all finance houses observing the common 10% reserve ratio under arrangements which came into operation on 16 September 1971. Interest is paid on special deposits at a rate adjusted weekly to the nearest ½% per annum on the average rate for Treasury bills issued at the latest weekly tender. With effect from August 1978, for the duration of the reactivated supplementary special deposits scheme, the liability of the London and Scottish clearing banks to pay special deposits was reduced to offset the additional resources devoted by these banks to medium and long-term lending, at fixed rates, for exports and domestic shipbuilding. The release of special deposits, which totalled £207 million in August, fulfils an undertaking given by the Chancellor of the Exchequer in 1976 when the clearing banks agreed to a progressive increase in the threshold beyond which they were entitled to government refinancing of such lending under the then existing arrangements with the Export Credits Guarantee Department/Department of Industry.

The initial consultative document *Competition and credit control* was reprinted in the June 1971 *Bulletin*; details of these arrangements, and subsequent developments, have been published in later issues of the *Bulletin*. A comprehensive booklet containing all the relevant articles published between 1971-78 is obtainable from the Economic Intelligence Department, Bank of England, at the address given on the reverse of the contents page; the price, which includes despatch, is 50p to addresses in the United Kingdom and £1 to addresses overseas.

The booklet also contains a reprint of the article on the *supplementary special deposits* scheme which was published in the March 1974 *Bulletin*. The operation of the scheme was suspended in August 1977 but it was reactivated in June 1978. The scheme requires banks and finance houses, which are subject to calls for special deposits as set out above, to make supplementary deposits if the growth of their interest-bearing eligible liabilities exceeds the guideline; these supplementary deposits do not bear any interest.

Under the arrangements announced on 8 June 1978, deposits became payable if an institution's average interest-bearing eligible liabilities for the three months August/October 1978 grew by more than the specified rate of 4% over the average for the six months November 1977/April 1978. On 17 August it was announced that further growth of 1% per month would be permitted for the following eight months. The rate of deposits is progressive, according to growth in excess of the guideline, at 5% (up to 3% excess), 25% (over 3% up to 5%) and 50% (over 5%) of interest-bearing eligible liabilities. The same institution can therefore be penalised in one, two or all three tranches in any one month.

Table 4: Analysis of advances in sterling and foreign currencies to UK residents by banks in the United Kingdom

As far as possible the analysis is based on the Standard Industrial Classification: there are twenty-three categories grouped under the broad headings of manufacturing, other production, financial, services, and persons. Advances are classified by industry, irrespective of owner (i.e. private, local authority or government); and if an advance cannot be attributed to any particular activity, it is classed according to the main activity of the borrower—if necessary within the residual groups provided under the broad divisions. Advances to merchants, brokers, importers and exporters are included in retail distribution or other distribution, as appropriate, and advances to unincorporated businesses, etc. are allocated according to the trade or profession.

The analysis covers advances in both sterling and foreign currencies provided by banks to their customers and therefore does not include funds placed through the specialised financial markets, such as the local authority money market or the finance company deposit market. The dates and contributors are the same as for Table 2.

Figures for the Northern Ireland banks are broadly comparable with those provided by the other contributors to the table, but are in slightly less detail for certain classifications as indicated in the footnotes.

It is not yet possible to provide a seasonally-adjusted series of the new figures. However, an estimate has been made, as in Table 6.3, of the value of transactions in foreign currency, excluding changes in the sterling value of existing business in foreign currency arising from fluctuations in exchange rates.

The complete series from May 1975 (when the analysis was changed—see the notes to Table 10 in the December 1975 *Bulletin*) to November 1976 was published in the March 1977 *Bulletin*.

Table 5: Discount market

The figures relate to the London Discount Market Association, two discount brokers and the money trading departments of five banks. Credit control is applied to the discount market through a limit on

each institution's aggregate holding of 'undefined assets' to a maximum of twenty times its capital and reserves. Undefined assets for this purpose are all assets other than those in the following list:

- a balances at the Bank of England;
- b UK and Northern Ireland Treasury bills;
- c government stocks with not more than five years to final maturity;
- d local authority stocks with not more than five years to final maturity;
- e local authority and other public boards' bills eligible at the Bank;
- f local authority negotiable bonds; and
- g bank bills drawn by nationalised industries under specific government guarantee.

For further details see 'Competition and credit control: modified arrangements for the discount market' in the September 1973 *Bulletin* (page 306).

The capital resources bases for the calculation of the undefined assets multiple are as follows:

£ millions	1977	122	1978	147
------------	------	-----	------	-----

Table 6: UK banking sector

The UK banking sector comprises all banks included in Table 2 together with the discount market institutions included in Table 5, the Banking Department of the Bank of England and the National Girobank (which is included in Table 2 for dates after 25 September 1978). The figures are designed to show the position of the banking sector as a whole in relation to third parties; transactions between institutions within the sector are therefore excluded, and various adjustments are made to the figures on consolidation to avoid double-counting etc.

Transit items etc.

The banks' gross figures for deposits and advances are adjusted to allow for sterling transit items. These transit items appear in an individual bank's balance sheet both as credit items (e.g. standing orders) and debit items (e.g. cheques in course of collection). When banks' figures are aggregated these items may give rise to double-counting of deposits received from customers outside the banking system or, where overdrawn or loan accounts are concerned, to the undervaluing of total lending made to such customers. In accordance with the treatment adopted for the calculation of reserve ratios (see 'Reserve ratios: further definitions', in the December 1971 *Bulletin*, page 482), it is assumed that 60% of the total value of debit items less credit items affects deposits. This proportion is therefore deducted from gross deposits and the remaining 40% is added to advances, the full adjustments being applied in Table 6.2 to deposits of, and lending to, *UK industrial and commercial companies*. From mid-May 1975 some other sterling accounts on both sides of banks' balance sheets, which are unclassifiable by sector, are added to transit items and treated in the same way. At end-June 1977, funds temporarily held by banks arising from the oversubscription of the offer for sale of shares in British Petroleum Limited have been treated in Tables 6 and 11 as time deposits; an estimated figure of £50 million has been ascribed to *overseas residents*, and the balance to other *UK residents*; the allocation of the latter in Table 6.2 by sector is estimated. Figures for 100% of net transit items etc. are as follows.

		Monthly series		
		1975	1977	1978
		May 21	Aug. 17	Aug. 17

3rd quarter	2,418			

Breaks in the series

At end-March 1972 and end-March 1973 breaks occurred in the series of banking sector assets and liabilities after the inclusion of new contributors to the banking statistics. Before being included within the banking sector other banks' lending to these institutions was included within lending to the private sector (other than banks) in Table 6.1.

At end-December 1975, two lines of figures are shown in Tables 6.1 and 6.2 following the exclusion of one contributor to the banking statistics. In the first line this institution is regarded for all purposes as being part of the banking sector and in the second line as being outside the banking sector.

In Table 6.3, the changes for 1972, 1973 and 1975 have all been calculated to exclude the effect of changes in the number of contributors to the banking statistics.

Two lines of figures are also shown in Tables 6.1 and 6.2 at end-June 1975. The figures in the second line are derived from new, more comprehensive, statistical returns which were introduced in May 1975, while the first line gives estimates for comparison with the earlier series; the difference between the two lines represents the breaks between the two series, which have been eliminated from the figures for transactions during the second quarter shown in Table 6.3.

The bridge between the old and new series for both total domestic and overseas deposits and lending has been estimated with the help of partial information provided by the banks. The original allocation among the three domestic private sectors (personal, industrial and commercial companies, and other financial institutions) was heavily revised in the June 1977 *Bulletin* in the light of subsequent information. The earlier estimates, also based on information from the banks, gave rise to some implausible entries in the flow of funds accounts, and the new estimates were based on a comparison of trends in the three sectors' deposits and bank borrowing before and after the break, using a simple regression model.

Valuation adjustment

From the second calendar quarter 1975, the changes in assets and liabilities in foreign currencies shown in Table 6.3 have been adjusted to exclude the effect of movements in exchange rates (to the extent that the total of adjustments made to foreign currency assets does not equal the total of adjustments to foreign currency deposits, a net adjustment is made to non-deposit liabilities). From this date the figures may not equal the differences between the amounts outstanding in Tables 6.1 and 6.2; they will, however, more accurately reflect banks' transactions.

Overseas deposits

These include estimated overseas holdings of negotiable dollar and sterling certificates of deposit. Identified overseas holdings of sterling certificates are given in Table 19. The figures for overseas deposits also include some unclassified foreign currency accounts which are assumed to affect the total overseas liabilities of the UK banking sector.

The allocation of negotiable dollar and sterling certificates of deposit by sector is partly estimated. Identified domestic holdings of dollar certificates were included for the first time from end-March 1973.

Non-deposit liabilities (net)

These comprise the banking sector's capital and other non-deposit liabilities less their investments in UK banks and other non-financial assets; this item also includes some residual errors arising from the exclusion of transactions between institutions within the sector.

Public sector

Before the introduction of the new returns in May 1975, all UK residents' deposits in foreign currencies were allocated to the private sector.

Personal sector

In Table 6.2 the figures for the personal sector are further disaggregated to show separately deposits by and lending to persons, households and individual trusts. The rest of the personal sector includes unincorporated businesses of sole traders and partnerships (e.g. solicitors), farms, universities, trade unions, clubs, charities and churches.

Table 7: Central government borrowing requirement and its financing

This table provides a summary, for calendar quarters and financial years, of all transactions affecting the central government, and analyses government borrowing according to the source of the funds borrowed. It classifies transactions in three main categories. The first category comprises:

a The net amount paid out, or received, by the Consolidated Fund; this is mainly on account of current revenue and expenditure, but also covers certain domestic loans—including any at subsidised rates of interest—and all overseas lending.

b The amount lent from the National Loans Fund (all at market rates) to local authorities, nationalised industries and other domestic bodies, less the repayments of principal on such loans. Interest on these loans, together with the profits of the Issue Department of the Bank of England, is set off in the National Loans Fund against the cost of interest, management and expenses of the national debt. Any shortfall is made good by a transfer from the Consolidated Fund, so that receipts and payments relating to debt servicing are self-balancing in the National Loans Fund by the end of a financial year.

c The net change in other central government funds and accounts, the largest components of which are the balances of the National Insurance Funds and departmental balances held with the Paymaster General. This category also includes various statistical adjustments.

d The borrowing requirement of the Northern Ireland Government.

The aggregate of these items, called the *central government borrowing requirement*, is a measure of the net expenditure (including lending) of the central government resulting broadly from decisions of a budgetary nature.

Secondly, the table brings together under the heading *external and foreign currency financing* any net cost or gain in sterling resulting from:

1 changes in the official reserves and other items which are the counterpart of the balance for official financing in the balance of payments accounts; these comprise changes resulting from the Exchange Equalisation Account's transactions in gold, foreign exchange and special drawing rights (other than allocations), and changes in net transactions with the International Monetary Fund (except for the payment of subscriptions) and with other monetary authorities; and

2 any other increase or decrease in overseas holdings of government stocks and Treasury bills, and any change in other forms of central government debt to overseas.

Together these items represent the impact on the central government's domestic financing of the overseas transactions of the country as a whole.

The sterling equivalent of the proceeds to the Government of the \$2.5 billion loan (announced in the March 1974 Budget), and the \$1.5 billion loan (announced in January 1977) are shown under *other central government transactions*. Both loans were arranged through UK and foreign banks, and are repayable in instalments (the first between 1981 and 1984 and the second between 1985 and 1988).

Finally, the table analyses government domestic borrowing in sterling to show identified changes in sector holdings of notes, coin and government debt. Financing of the Northern Ireland Government's borrowing requirement takes the form of bank advances and changes in holdings of stocks, Treasury bills and other securities issued by the Northern Ireland Government.

The division between non-bank private and overseas sector holdings of government stocks and Treasury bills is not exact. Some unidentified changes in overseas sector holdings may be included among the residual figures for non-bank private sector holdings, but the amounts involved are thought not to be very large.

Tax deposit accounts, operated by the Inland Revenue, were introduced with effect from 2 April 1973 to enable companies to anticipate payments of corporation tax (but not advance corporation tax); the scheme was terminated on 8 October 1974. Tax deposit accounts continued to attract interest at Treasury bill rate with a bonus of 2½% per annum if the funds were used to meet the tax. Deposits had to be applied in satisfaction of tax or withdrawn for cash within the period ended 1 January 1977.

A new form of tax reserve certificate, the certificate of tax deposit, became available on 6 October 1975. It is available to taxpayers generally and may be used in payment of most taxes.

The treatment of the redemption of government guaranteed stock was altered in the September 1975 issue of the *Bulletin*. The adjustment item *redemption of guaranteed stocks* was removed from the central government capital account thereby increasing the borrowing requirement by a corresponding amount. On the previous basis all such redemptions were regarded as having been financed by government loans; this was akin to the central government refinancing its own debt, which should not contribute to the borrowing requirement. However, nationalised industries do not necessarily borrow from central government in order to redeem their government guaranteed stock. For this reason a more conventional treatment was adopted under which all central government lending to public

corporations, whether or not for the redemption of government guaranteed stock, contributes to the borrowing requirement.

Central government capital payments under the exchange cover scheme represent the profit or loss to central government of guaranteeing the capital repayments of foreign currency borrowing by local authorities and public corporations under the exchange cover scheme, as a result of changes in the value of sterling. The profit or loss from interest payments on such borrowing forms part of the central government borrowing requirement.

More details of the components of central government financing were given in an article in the March 1966 *Bulletin* (page 29) and the changes resulting from the National Loans Act 1968 were explained in the September 1968 *Bulletin* (page 280).

Table 8: Analysis of government debt

1 Stocks

This section gives a more detailed analysis by type of holder of the changes, shown in Table 7, in the amount of government stocks held by the overseas, non-bank private, other public and banking sectors. Changes are shown at cash value except for those of the overseas and banking sectors, where the figures relate mainly to changes in book value—any difference between the book and cash value being reflected in the residual figures for *non-bank private sector*.

The figures for the *overseas sector*, as in Table 7, are based partly on the statistics of UK external liabilities in sterling (Table 19) and partly on information extracted from the registers of government stocks; they should not be regarded as more than estimates—any error being reflected in the residual figures for *non-bank private sector*. *Central monetary institutions* covers the holdings of central banks, most currency boards, the General and Note Security Funds of the Crown Agents, the Bank for International Settlements, and a few other accounts known to be used for central monetary purposes.

The table includes a maturity analysis of official transactions in government stocks. In this analysis, stocks with optional redemption dates are classified according to the final date.

2 Treasury bills

This table gives a further analysis of the changes, included in Table 7, in market holdings of Treasury bills at nominal values. However, the figures for the overseas and banking sectors show changes at book values from the 1st and 2nd quarters of 1975 respectively. From that date, any difference between the nominal and book value for those sectors is reflected in the residual figures for *non-bank private sector*.

Figures for overseas sector holdings of Treasury bills include changes in Treasury bills held as the counterpart of official financing transactions with overseas monetary authorities. These are not necessarily identifiable in Table 7 as they are one component only of the item *other central government transactions*.

3 National savings

This table, derived from Department for National Savings statistics, analyses the figures for *national savings* in Table 7. Changes in deposits with the new departments of the trustee savings banks and in the investment account of the National Savings Bank are excluded because they do not directly affect the central government: that part of their funds which is invested in government debt is included in Table 7 under *sterling borrowing from non-bank private sector: marketable debt*.

Figures of net receipts of the two index-linked schemes—National Savings Certificates Retirement Issue and SAYE (third issue)—since their introduction on 2 June 1975 and 1 July 1975 respectively, are separately identified.

Table 9: Treasury bill tender and Bank of England's minimum lending rate

Bank of England's minimum lending rate to the market

The minimum rate at which the Bank, acting as lenders of last resort, normally lend to members of the discount market against security of Treasury bills, other approved bills, or government stocks with five years or less to maturity. Until 24 May 1978, the rate was normally set $\frac{1}{2}\%$ higher than the average rate of discount for Treasury bills established at the weekly tender, rounded to the nearest $\frac{1}{4}\%$ above and effective, for lending by the Bank, from the following working day. However, special changes in the rate were not precluded under this system, in which event the announcement was normally made at midday on Thursdays: a new rate determined in this way was effective immediately and the operation of the normal formula suspended until market rates had moved into line. On 11 March 1977, these arrangements were modified in one respect: in cases where the

operation of the formula would have brought about a reduction in the rate, the Bank reserved the right, exceptionally, either to leave the rate unchanged, or to change it by less than would have resulted from the operation of the formula.

On 25 May 1978 it was announced that the rate would in future be determined by administrative decision and any change would normally be announced at 12.30 p.m. on a Thursday; the new rate would become effective, for lending by the Bank, immediately.

Table 10: Currency circulation

Figures for the Bank of England and the London clearing banks relate to the average of Wednesdays in each month; those for the Scottish clearing banks and the Northern Ireland banks relate to the average in periods of four consecutive weeks, as published in the *London Gazette* and the *Belfast Gazette* respectively, with as close a correspondence as possible to the calendar month.

The figures for the amount of coin in circulation are provided by the Royal Mint, and make allowance for coin which has been lost, destroyed, or otherwise wasted. Coin in the Bank of England, Issue Department (none held since February 1972) is excluded.

Table 11: Money stock

Three definitions of the money stock are used in this table. The first definition (M_1) is a narrow one consisting of notes and coin in circulation with the public plus sterling sight deposits held by the private sector only. The second definition (sterling M_3) comprises notes and coin in circulation with the public, together with all sterling deposits (including certificates of deposit), held by UK residents in both the public and private sectors. The third definition (M_5) equals sterling M_3 plus all deposits held by UK residents in other currencies. In all three definitions, deposits are confined to those with institutions included in the UK banking sector, and 60% of the net value of sterling transit items etc. is deducted—see additional notes to Table 6.

Quarterly figures for these series are available from the first quarter of 1963. Quarterly figures eliminating breaks have been prepared in the Bank and are available on application to the Economic Intelligence Department at the address given on the reverse of the contents page. Monthly figures for M_1 are available from October 1971 onwards, and for sterling M_3 and M_5 from July 1971 onwards. Some general comments on the method of seasonal adjustment are given in the Bank of England's publication of May 1978 *United Kingdom flow of funds accounts: 1963-1976* (page 30) for the quarterly figures. The method of seasonal adjustment for the monthly figures was described in the article 'Seasonal adjustment of monthly money statistics' in the June *Bulletin* (page 196).

The amounts outstanding at end-December 1975 and mid-January 1976 are shown in Table 11.1 after the exclusion of one previous contributor to the series, but the effect on the figures is very small (see Table 6.1). Somewhat larger breaks occurred at end-March 1972 and 1973 (see additional notes to Table 6).

The introduction of new statistical returns in mid-May 1975 led to a slight break in the series (see the June 1975 *Bulletin*, page 162). The estimation previously needed to calculate M_1 , sterling M_3 and M_5 was reduced, and slight changes in the definitions of some items reported by the banks caused some inconsistencies with earlier figures. In particular, the definition of M_1 was clarified by the replacement of 'current accounts' (a term which had different meanings for different banks) by 'sight deposits' which is more precisely defined as funds available on demand, including money at call and money placed overnight. Also, private sector deposits with the discount market, which had previously all been included in sterling M_3 and M_5 but not in M_1 , were included in M_1 if falling within the definition of sight deposits (about £100 million of such deposits were outstanding in mid-May 1975). Some of these sight deposits bear interest, and these are shown separately from May 1975 onwards. In Table 11.1, the two lines of figures at end-June 1975 show the money stock and its component parts on the old and new basis respectively. The first line of figures (and the changes in Table 11.3) for the quarter ended June 1975 are, as far as possible, consistent with the earlier series, but include a large degree of estimation. From the second calendar quarter 1975, all foreign currency items in Tables 11.2 and 11.3 have been adjusted to exclude the effects of movements in exchange rates (see additional notes to Table 6). The direct effect of such movements on the sterling value of UK residents' foreign currency deposits is shown in column 9 of Table 11.2.

From the end of the first quarter of 1976 to the end of the first quarter of 1978 (and from mid-May 1976 to mid-April 1978 in the monthly series) certain public sector funds placed temporarily with banking institutions through the inter-bank money market, which have been included in Table 6 within public sector deposits (within public corporations' deposits in Table 6.2), were excluded from the money stock. This has given rise to differences between Table 11 and

Table 6, which in the changes series extend to mid-May and end-June 1978. In Tables 11.1 and 11.2 these funds are excluded from column 6 and in Table 11.3 they have been treated as internal to the banking sector and included in column 11.

The changes in the money stock given in Tables 11.2 and 11.3 may not equal the differences in the amounts outstanding in Table 11.1. This is because changes in bank liabilities arising either directly from alterations in the composition of the banking sector (in 1971/72; 1972/73; the last quarter of 1975 and the month ended mid-January 1976), or from the use of new sources of information (e.g. in the first quarter of 1973—see additional notes to Table 6), are excluded from Tables 11.2 and 11.3. Similarly, from end-December 1977 the coverage of UK holders of dollar certificates of deposit has been somewhat expanded: the effect of this has been excluded from the changes shown in Table 11.2 (and Table 6.3). Small discrepancies in the quarterly figures also arise because the changes in notes and coin in circulation with the public do not allow for wastage and hoarding of coin, as do the amounts outstanding in Table 11.1. Also, the seasonally-adjusted changes in M_1 , sterling M_3 and M_5 may not be the same as the differences between seasonally-adjusted amounts outstanding in Table 11.1 as was explained in the article in the June *Bulletin*.

Table 11.3 shows the relationship between the public sector borrowing requirement, sterling M_3 and domestic credit expansion. This last concept can also be seen as bank and overseas lending to the public sector plus bank lending in sterling to the private and overseas sectors plus changes in the public's holdings of notes and coin. This table was further discussed in an article in the March 1977 *Bulletin*, page 39.

Details for banking months of the purchases (−) of central government debt by the private sector other than banks (column 4 of Table 11.3), analysed by type of instrument, are as follows:

£ millions

Month ended	Marketable debt		National savings		Tax instruments	Other	Total (Table 11.3, column 4)

Only national savings are seasonally adjusted at present. Certificates of tax deposit were not issued on any scale until mid-1977, so it is too soon for any regular seasonal pattern to be established for this item. Calendar quarter figures (with reversed sign convention) are given in Tables 7 and 8.

Table 12: Stock exchange transactions

Table 13: Transactions in British government stocks on the stock exchange

In both tables, transactions are recorded at dealing (contract) dates, rather than at settlement dates. Until 1973 statistics were available for the London, Scottish and Belfast exchanges, but not for the other stock exchanges, although deals done by London brokers on behalf of brokers on other exchanges were included in the London figures. Following the union of the stock exchanges of the United Kingdom and the Republic of Ireland in March 1973 to form one exchange (the Stock Exchange), the statistics from April 1973 cover all floors of the exchange, except that figures for the Republic of Ireland were not available for that month. In Table 13 the effect of the increased coverage is thought to be very small.

There are certain transactions, mainly cash subscriptions to new issues and redemption payments on maturing stocks, which do not pass through stockbrokers and are not therefore included in stock exchange turnover. Such transactions have been eliminated as far as possible from the figures in Table 13, but payments of second or subsequent instalments on partly-paid issues (since the second quarter of 1977) by other financial institutions are included indistinguishably. The effect on the figures is not thought to be significant. In this table, *official holders* includes the Issue and Banking Departments of the Bank of England, the National Debt Commissioners, government departments, and the Northern Ireland Government. The special temporary purchase of short-dated stock by the Bank of England from the banks in June 1972 is excluded. *Savings banks' investment accounts* comprises the National Savings Bank investment account and the trustee savings banks' special investment departments up to 21 November 1976 and thereafter the National Savings Bank investment account and the trustee savings banks' new department (which was formed by the amalgamation of the special investment departments and current accounts of the trustee savings banks). Figures for financial institutions other than those listed are included within *other holders (residual)*.

Table 14: Capital issues on the UK market (excluding British government stocks)

The estimates relate to new money raised by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by local authorities and listed public companies in the United Kingdom; and by overseas public authorities (including local authorities and international organisations) and companies. Issues by UK public authorities are included, except domestic issues guaranteed by the Government. The estimates include UK local authority negotiable bonds (of not less than one year) issued to, or through the agency of, banks, discount houses, issuing houses or brokers. Mortgages, and bank advances and any other loans redeemable in less than twelve months, are excluded; so also are loans from UK government funds (including the former Industrial Reorganisation Corporation and the National Enterprise Board)—but not government subscriptions to company issues made *pari passu* with the market. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of the amounts raised are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed-interest securities of the kinds included as issues; conversion issues in lieu of cash repayment are included in the gross figures of both issues and redemptions. No allowance is made for company liquidations or other repayments of share capital.

The estimates for loan capital include issues of debentures and loan stock carrying the right of conversion into, or subscription to, equity capital. The amounts included in parts 2 and 3 of the table for such issues by UK companies are as follows:

£ millions	1973	1974	1975	1976	1977	1978	1979
1973	38.5						
1974		20.8					
1975			106.5				
1976				43.3			
1977					5.3		
1978						Jan.	
						Feb.	
						Mar.	
1977 3rd quarter							
4th quarter							
1978 1st quarter							
2nd quarter							
3rd quarter							
1977 July							
Aug.							
Sept.							
1978 Oct.							
Nov.							

As the series relates only to new money raised, bonus issues, share exchanges and issues for other forms of consideration are excluded, as are issues in which the cash raised accrues not to the borrowing company but to its existing shareholders. It is not possible to segregate funds destined, in turn, for the purchase of existing securities or for subscription to other new issues, but the separate analysis of issues by financial institutions goes some way towards doing so.

The division between UK and overseas company borrowers is determined by the location of the registered office. *Financial companies* in part 3 of the table comprises listed UK public companies within the definitions of the banking sector and other financial institutions for flow of funds statistics (see notes on sources, definitions, seasonal adjustments and valuation in the article 'Sector financing: 1977', see the June *Bulletin*, page 205). The industrial classification is according to the primary occupation of the borrowing company or group and is based on the Standard Industrial Classification.

International issues (usually issues made on more than one market and through an international syndicate) are included in part 1 of the table if UK institutions took a leading part in arranging them. The amounts included, which are rough estimates of the proportions for which UK sponsors arranged subscriptions, are as follows:

£ millions

	Total	UK borrowers	Overseas borrowers
1973	273.1	121.5	151.6
1974	112.0	11.2	100.8
1975	683.1	25.2	657.9
1976	2,260.0	130.7	2,129.3
1977	4,041.9	274.2	3,767.7
1977 3rd quarter	850.8	76.2	774.6
4th quarter	1,026.2	45.1	981.1
1978 1st quarter	995.2	40.0	955.2
2nd quarter	827.1	10.5	816.6
3rd quarter	754.0	46.8	707.2
1977 July	211.7	29.7	182.0
Aug.	214.4	—	214.4
Sept.	424.7	46.5	378.2
Oct.	499.8	—	499.8
Nov.	261.7	29.6	232.2
Dec.	235.5	15.5	220.0
1978 Jan.	190.0	31.0	159.0
Feb.	494.5	—	494.5
Mar.	310.8	9.0	301.8
Apr.	266.7	10.5	256.2
May	345.2	—	345.2
June	215.2	66.3	148.9
July	378.7	12.6	366.1
Aug.	174.5	34.2	140.3
Sept.	200.8	—	200.8
Oct.	206.8	—	206.8
Nov.	185.2	—	185.2

An article in the June 1966 *Bulletin* (page 151) presented annual figures of capital issues in broadly the present form back to 1954 together with an earlier series going back to 1927, and described the differences between the series.

Table 15: Acquisitions and mergers by financial companies within the United Kingdom

The figures cover company acquisitions and mergers initiated by financial companies and include, besides amalgamations between financial companies, the acquisition by financial companies of non-financial companies. They complement the Department of Trade's statistics for industrial and commercial companies (which include acquisitions by non-financial companies of financial companies).

Financial companies are here defined as companies falling within Minimum List Headings 860-62 of the Standard Industrial Classification 1968 (insurance; banking and bill discounting; other financial institutions—which include investment, hire purchase, export finance, leasing and factoring companies). Deals involving unincorporated businesses, and financial institutions such as building societies which are not incorporated under the Companies Act, are not covered. Companies with diverse activities are classified according to what appears to be the main one. In some cases the classification is necessarily arbitrary.

Acquisitions are defined as purchases which result in the buyer holding more than 50% of the equity capital of the company whose securities are acquired. Purchases of minority interests in existing subsidiaries and mergers of subsidiaries within the same company

group are excluded. Where a company, in the course of acquiring a subsidiary, purchases preference or loan capital as well as equity, the whole amount of the transactions is included. Mergers are amalgamations effected by arrangements between companies.

The values shown relate to the consideration paid in respect of acquisitions and mergers, whether in cash or by the issue of securities. As far as possible, securities are included at market value. The amounts shown are those of expenditure during the current period and therefore do not include any previous investment in the company acquired. Purchases of shares on the stock exchange made directly in connection with successful bids are included. Mergers are valued as if the larger (or largest) company concerned had acquired the smaller. In general, amounts are included at the date when a bid is declared unconditional or a contract to purchase is signed. An article introducing this series appeared in the September 1971 *Bulletin* (page 349).

Table 16: Investment trust companies

The investment trust companies which contribute returns are either members of the Association of Investment Trust Companies or are listed as investment trust companies by the stock exchange; 203 are covered by the most recent statistics. Returns are not sought from about thirty small trusts.

Net current assets does not take account of contingent assets and liabilities such as claims on, or sums due to, the Inland Revenue, or the liability for accrued loan interest and for dividends proposed but not yet paid. It includes, however (*in other short-term assets in the United Kingdom or other short-term borrowing in the United Kingdom*), sums due from, or to, stockbrokers on account of securities sold or purchased and still awaiting settlement.

Transactions in investments are recorded when the contract is agreed; only transactions for cash are included. Valuation of listed securities at end-years is at market prices, except in the maturity classification where values are nominal. Unlisted securities are at current values, and bills and mortgages at maturity values. The figures include the investment currency premium where appropriate.

The end-year figures of assets may be reconciled approximately as follows:

£ millions	
Assets at end-1976	6,065.7
Transactions in trusts' own capital	8.5
Adjustments due to changes in trusts making returns	— 184.7
Undistributed income, changes in market valuation, capital gains tax, etc. (residual)	673.2
Assets at end-1977	6,562.7

Transactions in trusts' own capital include net issues of share and debenture capital for cash (excluding estimated costs of issue), other identified long-term borrowing at home and abroad, and issues of capital against the acquisition of trusts not previously included in the statistics.

The present series was introduced in an article in the September 1961 *Bulletin* (page 29).

Table 17: Unit trusts

The returns cover virtually all unit trusts authorised by the Department of Trade under the Prevention of Fraud (Investments) Act 1958. From the first quarter of 1975 responsibility for the collection of the quarterly and annual unit trust statistics passed from the Unit Trust Association to the Bank. The numbers of trusts covered by the returns were:

1976: December, 347;
1977: March, 349; June, 356; September, 355; December, 358;
1978: March, 359; June, 358; September, 365. The definitions and valuation of net transactions and assets are the same as in Table 16.

The present series was introduced in an article in the September 1961 *Bulletin* (page 29).

Table 18: Property unit trusts

The statistics cover all twenty-two UK property unit trusts for pension funds and charities. An article describing the origin and nature of these institutions appeared in the September 1969 *Bulletin* (page 294). Some transactions are financed by long-term borrowing and not by sales of units.

Table 19: Exchange reserves in sterling; and banking and money-market liabilities in sterling to holders other than central monetary institutions

Prior to the publication of the March 1976 *Bulletin*, non-interest-bearing notes owned by international organisations (other than the IMF) and sterling certificates of deposit were included indistinguishably in this table under *banking and money-market liabilities* and were separately identified only in the additional notes to the tables. Non-interest-bearing notes are now shown as a separate category and sterling certificates of deposit are identifiable under *banking and money-market liabilities*.

1 Exchange reserves in sterling

These cover readily marketable investments in the form of government and government-guaranteed stocks, Treasury bills, and other banking and money-market assets (as defined below) held by central monetary institutions and international organisations. There are, of course, other holdings of sterling which countries may regard as part of their reserves; some are included in banking and money-market liabilities to other holders and others are in types of assets—equities for example—which are not covered by the table.

2 Banking and money-market liabilities to other holders

These consist, in the main, of private balances held by individual non-residents, working balances of banks and other companies overseas, and of overseas governments' holdings that are not classed as exchange reserves.

Banking and money-market liabilities comprise:

- a Deposits by non-residents, including overseas offices of UK banks, with banks in the United Kingdom and with certain other institutions, including a number of hire-purchase finance companies and the Crown Agents for Overseas Governments and Administrations.
- b Bills drawn on and temporary loans to local authorities, whether made direct by non-residents or by banks or other agents in the United Kingdom for account of non-residents.
- c Treasury bills held by banks and other agents in the United Kingdom on behalf of non-residents.

Liabilities to the IMF are excluded; the United Kingdom's outstanding drawings on the Fund are shown in Table 25.1.

A modified reporting system for external liabilities and claims in sterling was introduced at the end of 1974 giving rise to some changes in definition and coverage. The main difference from earlier data is that holdings of British government stocks are shown at approximate market value instead of at nominal value. There has also been some improvement in coverage and consistency of reporting. Data are now normally collected as at the close of business on the third Wednesday of each month and at the end of each calendar quarter (although, exceptionally, information for mid-March 1975 is not available). Data on the old basis for 1974 and earlier were last published in the March 1975 *Bulletin*. A further improvement in coverage increased deposits with banks by some £180 million from mid-May 1975.

Table 20: External liabilities and claims of UK banks and certain other institutions in foreign currencies

This table is based on reporting requirements which took effect from end-December 1974. It is not thought that the introduction of new returns at that date caused any significant changes in the figures. One minor change, however, is that claims in foreign currencies now exclude those claims on overseas customers arising from acceptances. In total these acceptances probably contributed some £100 million to UK claims in the former series.

The figures show gross liabilities to, and claims on, overseas banks and other overseas customers as recorded in the reporting institutions' books at the close of business at mid-month reporting dates and on the last working day of calendar quarters. Amounts in foreign currency have been converted into sterling at the middle closing exchange rate on that day: the figures need to be interpreted with care, therefore, because fluctuations in exchange rates between reporting dates will affect the sterling valuation. Forward commitments and unsettled spot deals are not included in the series, which also excludes commercial bills held by banks on behalf of customers and claims on customers arising from acceptances; items in overseas sterling currencies are included. In addition to the institutions contributing to Table 6, the figures also include certain other institutions with permission to take foreign currency deposits and make foreign currency loans. The figures comprise:

UK liabilities

Deposits and advances received from non-residents; and negotiable dollar certificates of deposit issued in London. The series does not

include official liabilities in foreign currencies arising from short-term loans to the UK Government and from drawings on central bank facilities.

Gross liabilities in section 1 include London dollar certificates of deposit whose holders are unknown but are thought to be non-residents. A further adjustment is made to gross liabilities in respect of certain other minor items which are not allocated sectorally by reporting institutions but which are assumed to relate to overseas residents.

UK claims

Deposits with and advances to, non-residents; commercial bills and other negotiable paper drawn on non-residents; lending under special schemes for exports.

Middle East oil exporters comprise: Bahrain, Iran, Iraq, Kuwait, Libya, Oman, Qatar, Saudi Arabia and the United Arab Emirates.

Up to June 1974, a geographical breakdown of external liabilities and claims denominated in US dollars was published. Figures for more recent reporting dates are available on request.

There is one break in this series. In section 2, 'geographical details', a break occurs between end-December 1977 and end-March 1978: this is due to measures which were taken during the quarter to extend the number of financial institutions reporting, and to improve the quality of the data in respect of, certificates lodged on behalf of overseas residents with reporting institutions. Prior to these changes, there were at end-December 1977 some £2 billion of US dollar certificates of deposit outstanding which were assumed to relate to overseas residents but which were not attributed by country; following the changes in early 1978, the amount of such unattributed certificates became negligible.

Table 21: Maturity analysis of liabilities and claims of UK banks and certain other institutions in foreign currencies

Banks and certain other institutions in the United Kingdom with permission to accept deposits and make loans in foreign currencies contribute to the series. The number of reporting institutions is greater than that contributing to Table 6; figures therefore differ from those shown elsewhere. Certain miscellaneous liabilities and assets (largely capital and other internal funds) are excluded from the analysis.

In this analysis, banks are required to classify maturities by reference to the period remaining to maturity rather than to the original period of the deposit or loan. Most lending is in the form of 'roll-overs' (i.e. a loan may be made for, say, five years but the interest rate is refixed in line with prevailing market rates every three, six or nine months, depending on the agreement between the borrower and the lender); in these statistics, such lending is classified by the banks according to the period remaining to the ultimate maturity date of the loan and not to the next roll-over date. Deposits with banks, on the other hand, are classified according to the period remaining to the earliest possible repayment date.

Although these surveys provide useful general information about the market as a whole they are only periodic snapshots of the position on a particular day; and that position can change rapidly as market circumstances vary.

In reporting their foreign currency positions, the banks convert their outstanding balances into sterling at the appropriate middle closing exchange rate. To reduce distortion in comparisons caused by fluctuations in exchange rates between reporting dates, figures are shown in US dollars; conversions have been made at the middle closing rate for sterling against the dollar.

Certain items are shown unallocated by sector in Table 21.2 and are excluded from Table 21.3: these are, on the liabilities side, certificates of deposit and other negotiable paper issued, and, on the assets side, banks' holdings of commercial bills and other negotiable paper issued other than by listed banks. On the assets side, banks' holdings of certificates of deposit and other negotiable paper issued by listed banks are included in the 'UK inter-bank market' sector in Tables 21.2 and 21.3. The following table analyses by maturity the total of US dollar certificates of deposit and other negotiable paper both issued and held

on their own account by the reporting institutions:

\$ millions: percentages in italics

	1978			
	15 Feb.	17 May	16 Aug.	
Liabilities (liens)				
Less than 8 days	766	4	584	3
8 days to less than 1 month	2,043	10	3,083	14
1 month to less than 3 months	6,612	30	6,291	29
3 months to less than 6 months	5,498	25	4,802	23
6 months to less than 1 year	2,859	13	2,893	14
1 year to less than 3 years	2,989	14	2,808	13
3 years and over	951	4	921	4
Total	21,718	100	21,382	100
Claims (holdings)				
Less than 8 days	185	5	108	3
8 days to less than 1 month	389	10	562	15
1 month to less than 3 months	1,330	36	1,207	33
3 months to less than 6 months	618	17	769	21
6 months to less than 1 year	587	16	535	15
1 year to less than 3 years	437	12	328	9
3 years and over	145	4	156	4
Total	3,691	100	3,665	100

The amount of 'other negotiable paper' in the above data represents a very small proportion of the total.

Apart from certificates of deposit and other negotiable paper issued, liabilities of banks in the United Kingdom to other banks in the United Kingdom should equal claims of banks in the United Kingdom on other banks in the United Kingdom as shown in Table 21.3; but the figures as reported differ. In calculating the change in the banks' net liabilities in foreign currencies to overseas residents in the balance of payments, it is assumed that this difference probably relates to misidentification of liabilities to, and claims on, overseas residents.

Table 22: External liabilities, in total, and external claims, by maturity, of UK banks and certain other financial institutions at end-June 1978

The figures in this table are compiled from data supplied by banks and other financial institutions in the United Kingdom as part of an exercise, undertaken jointly by central banks in the Group of Ten countries, Austria, Denmark, Republic of Ireland and Switzerland, to collect regular half-yearly statistics, by maturity, of international bank lending to countries outside the reporting area. Aggregate data are submitted by each reporting central bank to the Bank for International Settlements, which consolidates them for publication in due course.

The second, third and fourth paragraphs of the additional notes to Table 21 apply to this analysis.

Liabilities comprise: deposits, loans, and advances received from overseas residents and balances placed by them; and London sterling and foreign currency certificates of deposit held in safe custody on behalf of overseas residents.

Claims comprise: loans and advances made to overseas residents and deposits and balances placed with them; commercial bills, promissory notes and other negotiable paper, drawn on overseas residents, owned by reporting institutions; and sterling, but not foreign currency, acceptances given on behalf of overseas residents. They include lending under ECGD special schemes for exports.

Unused facilities comprise all undertakings to lend to overseas residents, in any of the forms listed under 'claims' above, which have not been utilised.

Table 23: External positions in domestic and foreign currency of banks in the BIS reporting area and of certain off-shore branches of US banks

1 Detailed analysis: end-March 1978

This table is reproduced, from the regular quarterly press release by the Bank for International Settlements: a full explanation was given in a special press release dated 27 February 1976.

The table gives a detailed geographical breakdown of the external positions, in domestic and foreign currencies taken together, of commercial banks in the BIS reporting area and of certain off-shore branches of US banks. Countries in the BIS reporting area are Austria, Belgium/Luxembourg, Canada, Denmark, France, Italy, Japan, the Netherlands, Republic of Ireland, Sweden, Switzerland, the United Kingdom, the United States and Western Germany. Austria, Denmark and Republic of Ireland are included in the series from December 1977. The off-shore centres comprise the Bahamas, Cayman Islands, Panama, Lebanon, Hong Kong and Singapore. From December 1977 French banks' external assets in domestic currency include for the first time buyers' credits. In addition there are some minor revisions to French banks' external liabilities in domestic currency and UK banks' external claims in sterling.

A full geographical breakdown is not available for banks in Canada, Japan, Switzerland and the United States, for which the analysis covers only those countries marked in the table with the allocation codes C, J, H and U respectively. That part of the Canadian, Japanese, Swiss and United States banks' external positions which can only be allocated by areas is shown in the items marked 'residual' at the end of the various country groupings. Also, an 'unallocated' item (immediately before the grand total) contains all those external positions of banks in the reporting countries for which no geographical identification, even by area, is possible.

Viewed from another aspect, the figures show the total identifiable assets and liabilities in all currencies of residents in the countries listed in the tables *vis-à-vis* commercial banks in the BIS reporting area and of certain off-shore branches of US banks. However, it should be noted that:

a the data do not represent the overall external debtor or creditor positions of the countries listed in the table, but only their liabilities to, or claims on, commercial banks in BIS reporting area and of certain off-shore branches of US banks;

b because a full geographical breakdown is not available for banks in all the reporting countries, the data do not give a complete picture of the assets and liabilities of residents in the countries listed in the tables *vis-à-vis* banks in the BIS reporting area and the identified off-shore banking centres; and

c in some cases, the individual country positions do not represent the extent to which residents of these countries have themselves been the original suppliers, or the end users, of the funds in question. This applies particularly to those European countries which are the main centres of the euro-currency market and to those countries outside Europe which are important international financial centres. In these cases, inter-bank business may account for a large proportion of the total positions.

Table 25.2: Schedule of capital repayments of government and other public sector foreign currency borrowing outstanding at 30 September 1978

The table provides a summary of scheduled capital repayments of all government and other public sector foreign currency debt outstanding at 30 September 1978. The schedule also takes account of early repayments by the public sector announced prior to 8 November. In particular, it includes in the fourth quarter of 1978 the prepayment of a further \$1 billion to the IMF, which was announced in the Budget and was made in October.

The schedule includes both borrowing recorded as official financing in the balance of payments (as shown in Table 25.1) and the following categories of borrowing not included in Table 25.1:

a Public sector borrowing not covered under the exchange cover scheme, including approximately \$0.3 billion in external sterling;

b Long-term government borrowing (e.g. the lend-lease settlement and the United States and Canadian lines of credit); and

c HMG foreign currency bonds.

In this table amounts outstanding in currencies other than the US dollar have been converted into US dollars at end-September middle-market rates, rather than at parity or central rates as in Table 25.1.

The timing of the remaining repayments to the IMF is not certain; outstanding drawings of \$1.9 billion under the credit tranches fall due for repayment between 1980 and 1982. However, after repayment of the first \$1 billion of this \$1.9 billion, further repayments by the United Kingdom will have the effect of reconstituting the United Kingdom's reserve position in the Fund; this is counted as part of the UK official reserves. The schedule, therefore, only includes those repayments which will have the effect of reducing the reserves.

Table 25.3: Schedule of interest payments on government and other public sector foreign currency borrowing outstanding at 30 September 1978

The table provides a summary of estimated interest payments on all government and other public sector foreign currency debt outstanding at 30 September 1978. Table 25.2 gives a schedule of capital repayments.

Currencies other than US dollars are converted at end-September 1978 middle-market rates.

No attempt has been made to forecast future interest rates; for those loans on which interest is based on a floating rate, the end-September three-month euro-dollar rate (9.75%) and three-month LIBOR (9.56%), where applicable, were used.

Table 26: Balance of payments

The figures of UK banks' net foreign currency borrowing or lending abroad are adjusted to exclude changes in the sterling valuation of overseas currency liabilities and claims between the beginning and end of periods. Foreign currency borrowing by the public sector through banks under the exchange cover scheme, and the sterling equivalent of borrowing under the government loan facilities (see below), are also excluded and instead are treated as financing items. The movements are not, therefore, equal to changes in banks' net positions as given in Table 19.

Net transactions with overseas monetary authorities: IMF includes drawings under the oil facility made in January 1976 (see the March 1976 *Bulletin*, page 12), drawings on the United Kingdom's first credit tranche, made in May 1976 (see the June 1976 *Bulletin*, page 163), in January, May and August 1977, drawings on the SDR 3,360 million stand-by arranged in December 1976 (see the March 1977 *Bulletin*, page 8), in April 1978 a repayment (see the June *Bulletin*, page 166), and use of sterling by third countries in April, July and August 1978.

Net transactions with overseas monetary authorities: other monetary authorities includes drawings on the stand-by credit made available by the Group of Ten and Switzerland in June 1976 (see the June 1976 *Bulletin*, page 163), which were repaid in December 1976.

Foreign currency borrowing by the Government represents drawings on the \$2.5 billion loan facility announced in the March 1974 Budget (see the June 1974 *Bulletin*, page 126), drawings on the \$1.5 billion loan facility announced in January 1977 (see the March 1977 *Bulletin*, page 8), and the issue of \$350 million bonds in New York which was announced in the April 1978 Budget.

Table 27: UK security yields*Government stocks*

The flat yield on a security is the annual amount receivable in interest, expressed as a percentage of the purchase price. The gross (i.e. tax ignored) redemption yield comprises the gross flat yield together with the apportionment of the capital gain or loss on dated securities held to redemption; more precisely, it is the rate of interest which, if used to discount future dividends and the sum due at redemption, makes their present value equal to the present price of the stock. In calculating yields on stocks with alternative redemption dates, redemption is assumed at the later date when the price, net of accrued interest, is below par (that is when the flat yield is above the nominal rate) and at the earlier date when the price is above par.

The table shows gross redemption yields for selected maturities derived from yield-maturity curves fitted mathematically. The method was described in an article in the December 1972 *Bulletin* (page 467). From January 1973 the method has been modified as explained in an article in the September 1973 *Bulletin* (page 315). The further modification described in the article which appeared in the June 1976 *Bulletin* (page 212) will be used for all future published yields; yields for the last working day of each month have been recalculated back to January 1975. All dated stocks are used in this calculation, except those where:

- a the total market issue is less than £150 million;
- b there is provision for a sinking fund, redemption by drawings or an option for the holder to convert into another stock;
- c the stock matures in less than one year; or
- d the rate of interest is variable.

3½% War Loan was included in the calculation of the curve as the representative undated stock up until the end of 1976. Its exclusion has a negligible effect on the curve.

Debenture and loan stocks

The redemption yield on high-coupon debenture and loan stocks is taken from an index developed by the Bank of England to provide a measure of the yield to buyers of debentures which may be compared with the yield on government stocks of similar maturity. The constituents of the index are eighteen first-class debenture and loan stocks which have a high coupon (over 7%) and in which there is an active market; the average term to maturity of the stocks is between twenty and twenty-five years. The yield is an unweighted arithmetic average of the yield of individual stocks and is based on buying prices plus expenses.

The Financial Times-Actuaries index of debenture and loan stocks is not restricted to high-coupon stocks and is based on middle market prices. The yields of the fifteen constituent stocks are combined to give an average yield for a stock with a term to redemption of twenty years.

Industrial ordinary shares

The dividend yield is gross. It is calculated by grossing up the net dividend yield at the advance corporation tax rate (35% until 2 August 1977, 34% until 24 July 1978, 33% thereafter).

The earnings yield is taken as net profit (gross profit less corporation tax, currently 52%, unrelieved advance corporation tax, other charges and preference dividends) grossed up at the advance corporation tax rate; full distribution of earnings is assumed.

Table 28: UK short-term money rates

For details of Bank of England's minimum lending rates see additional notes to Table 9.

Treasury bills

The average rate of discount on allotment for 91-day bills at the weekly tender.

Trade bills

The rate at which bills are discounted depends on their quality. The figures shown are for bills of good quality; some bills are discounted at other rates.

London clearing banks' base rate

Each bank has a single base rate, which may sometimes differ from those of other banks. Since the beginning of October 1971 the rates of interest charged by the London clearing banks for their advances to customers and their discounting of trade bills have been, in general, linked to their own individually declared base rates. The rates charged for advances depend on the nature and status of the customer. Most lending is between 1% and 5% higher than base rate. In December 1973, however, the clearing banks announced that, in order to curtail arbitrage transactions by their customers, they proposed to indicate to certain customers (in particular local authorities, finance houses, and other banks) that advances would in future be related to market rates instead of to base rates. The following are now the only uniform rates paid on unsecured overdrafts and loans made by the clearing banks:

Customer	Rate
Nationalised industries, with Treasury guarantee	Syndicated base rate [a] + ½% or 1%
Export loans other than for ships, with ECGD guarantee:	
up to two years	Base rate + ½% (4½% minimum)
two to five years	7½% minimum
over five years	7½% minimum
Term loans for exports of ships, with ECGD guarantee, and domestic shipbuilding, with Department of Industry guarantee:	
over two years	7½% minimum

[a] The syndicated rate is agreed by the banks from time to time in the light of their declared base rates.

The rates for exports and domestic shipbuilding exclude management and commitment charges and negotiation fees. Such additional charges are not made on overdrafts.

Call money

Overnight secured loans to the discount market.

Local authorities: three months' temporary loans

For a minimum term of three months and thereafter at seven days' notice.

Table 29: Exchange rates and comparative interest rates

The spot dollar, forward premium, euro-sterling deposit and euro-dollar deposit rates are middle market rates as recorded by the Bank of England during the late afternoon.

Investment dollars

Foreign currency owned by residents of the Scheduled Territories which, with permission, may be used for the purchase of foreign currency securities and for certain purposes including direct investment and the purchase of property outside these Territories. The rate is shown both in terms of the number of US dollars to the pound sterling and, in percentage terms, as the 'effective' premium over the current spot rate of exchange; for an explanation of the premium, see the September 1976 *Bulletin* (page 315).

US Treasury bill rates

The market selling rate in New York for 91-day Treasury bills, expressed as a yield (per cent per annum of 365 days).

UK Treasury bill rates

The average rate of discount for 91-day bills established at the weekly tender expressed as a yield (per cent per annum of 365 days).

Local authority temporary loans

The mid-point of the range of rates quoted for loans taken for a minimum term of three months and renewable at seven days' notice.

Inter-bank sterling deposits

The mid-point of bid and offered rates in the London market for unsecured sterling deposits.

Interest-rate differentials

These columns provide only a broad comparison. The differences are obtained after deducting the forward premium (per cent per annum) on US dollars from the UK rates, or adding the forward discount.

Table 30: Foreign exchange rates

3 Against special drawing rights

This table shows currency units per SDR as calculated by the International Monetary Fund. The calculation was described in an article in the September 1974 *Bulletin* (page 281).

4 Indices of effective exchange rates

This table shows indices of effective exchange rates based on 21 December 1971 (immediately after the Smithsonian settlement) = 100. Estimates are made of the effects on each country's visible trade balance of the actual changes in the main exchange rates since the base date. Each change from 100 in the effective exchange rate indices is equivalent to an estimate of the unilateral change in the value of the currency in question which would have produced the same effect. The estimates incorporate a number of arbitrary assumptions about the responsiveness of trade flows to price changes, and they are not to be regarded as definitive.

The calculation was discussed in an article in the March 1977 *Bulletin* (page 46).

Table 31: Flow of funds accounts

Fuller notes, including details on the content of each line in Tables 31.4 to 31.9 and a detailed account of the method of seasonal adjustment are given in *United Kingdom flow of funds accounts: 1963-1976* (Bank of England 1978).

Line numbers refer only to Tables 31.1 and 31.2.

Sources

The main statistical series used in compiling the tables appear elsewhere in the statistical annex or in the Central Statistical Office's *Financial Statistics* or *Economic Trends*. Most of the seasonally-adjusted figures are not published elsewhere.

Definitions

Public sector

The central government, local authorities, nationalised industries and other public corporations.

Overseas sector

Non-residents as defined for the balance of payments estimates.

Personal sector

Individuals, unincorporated businesses, and private non-profit-making bodies.

Industrial and commercial companies

All corporate bodies other than public corporations, banks and other financial institutions.

Banking sector

As in Table 6.

Other financial institutions

Insurance companies, pension funds, building societies, finance houses and other consumer credit companies, the National Savings Bank investment account, trustee savings banks: new departments, investment trust companies, authorised unit trusts, property unit trusts, special finance agencies, Central Trustee Savings Bank and Crown Agents for Oversea Governments and Administrations.

Lines 1-4

As defined in the national income and expenditure accounts.

Line 5

The sum of the financial surpluses/deficits for all sectors equals the residual error in the national accounts. For the overseas sector, the entry is the counterpart of the UK balance of payments on current account.

Line 6

See footnote [e] to Table 7.

Line 7

The increase in policyholders' net claims on these funds. The entry under public sector is for public sector schemes which are contributory but not funded.

Line 8

All loans by the UK government except those to private housing associations (line 18); those to international organisations and private companies abroad (line 11); and those to refinance export and shipbuilding credits (lines 11 and 19).

Line 9.1

Central government transactions, apart from foreign currency borrowing from UK banks, included in the counterpart of the *balance for official financing* in the balance of payments (the sum of lines 9.1, 9.3 and 10.1 is equal to the total *balance for official financing*).

Line 9.2

All the *other central government external transactions* included in Table 7.

Line 9.3

Net borrowing by public corporations and local authorities directly from abroad under the exchange cover scheme. Repayments are recorded at current market rates.

Line 10.1

Net borrowing from abroad to finance lending in foreign currencies to the central government, and to other public sector bodies under the exchange cover scheme.

Line 10.2

Other changes in overseas deposits with the banking sector less bank lending to overseas by way of advances, market loans and commercial bills.

Line 11

Those parts of the balance of payments items classified as 'investment and other capital transactions' which are not elsewhere included. That part of export credit extended by UK banks which is refinanced by the central government is included here.

Line 12

Changes in Bank of England notes (treated as liabilities of the public sector), in banks' liabilities on account of issues of Scottish and Northern Irish notes, and in coin.

Line 13

Changes in gross sight and time deposits of UK residents, after the entries for the banking sector and industrial and commercial companies have been adjusted for 60% of transit items (see additional notes to Table 6). Changes in domestic holdings of certificates of deposit are included here.

Line 14

Includes building society shares. Deposits by banks with finance houses are in line 16.

Line 15.1

As in Table 7.

Line 15.2

Tax reserve certificates, tax deposit accounts and certificates of tax deposit.

Line 16

Advances and overdrafts, market loans and transactions in commercial bills, excluding loans for house purchase (included in line 18), lending to local authorities (line 22), and lending to the Northern Ireland Government (line 19). Recorded advances to industrial and commercial companies are adjusted for 40% of the change in transit items (see also line 13).

Line 17
Changes in hire purchase and other instalment credit granted by department stores etc.

Line 18
New loans less repayments, including estimates for bank lending, and lending by the public sector to housing associations.

Line 19
Loans between domestic sectors not entered elsewhere, including hire purchase and other instalment credit extended by finance houses, trade credit given or received by public corporations, central government refinance of fixed-rate bank credit for domestic shipbuilding, domestic transactions in public corporations' foreign currency bonds, and the Issue Department's transactions in commercial bills (treated as lending by the central government to industrial and commercial companies). The differences between the figures entered in the national income accounts on an accruals basis (such as local authority rates, various royalties and taxes, subsidies and other public sector receipts and expenditure, and interest charges) and the corresponding cash payments are also included here.

Lines 20 and 21
The entries for Treasury bills under industrial and commercial companies are residuals and include any changes in personal and unidentified overseas holdings. Likewise, the entries for stocks under persons are residuals and include unidentified changes in holdings by industrial and commercial companies (see footnote [b] to Table 31.7) and by overseas residents.

Line 22
Borrowing by local authorities from outside the public sector, except for direct borrowing abroad under the exchange cover scheme (line 9.3).

Line 23
Net issues in the United Kingdom (including identified unlisted issues) and euro-currency issues by UK companies.

Line 24
All other transactions. The entries for persons are residuals from the estimates in lines 23 and 24 for all other sectors.

Line 25
Net sales of units to persons by authorised unit trusts.

Line 27
The net total for all sectors corresponds to the residual error in the national accounts.

Seasonal adjustments

The adjustments allow for purely seasonal adjustments and certain other factors, taking full account of the data up to the end of 1977.

Purely seasonal adjustments
For each item which displays seasonality, preliminary seasonal adjustments are obtained which sum to zero over the four quarters in each calendar year. Consistent adjustments are then estimated by a system of balancing under which, in any quarter, the sum of the adjustments for all sectors in any line entry is zero, and the sum of the adjustment for all line entries in any sector is zero.

Other adjustments
These are made to certain series (such as notes and coin) in order to remove recurrent variations not adequately measured by moving average seasonal adjustments (for example, the half-yearly crediting of interest on some bank deposits), distortions due to the calendar (such as the effect of the particular days of the week on which a quarter begins and ends, and of the proximity of Easter to the last working day in March), and distortions due to tax changes. It should be noted that, unlike the purely seasonal adjustments, the other adjustments may not add to zero over a calendar year.
