
Finance leasing: estimates of investment in assets for leasing out

This note updates figures published on page 559 of the November 1987 Bulletin.

The statistics in the table measure the contribution to fixed investment of assets purchased for leasing out; they cover investment in such assets by monetary sector institutions, by finance houses outside the monetary sector, and by specialist finance leasing subsidiaries (or associates) of these institutions and of other companies. By far the greater part of the expenditure is on assets to be leased out under finance leases, but expenditure by these companies on assets for leasing out on other terms is also included. The figures exclude business transacted in non-owned assets.

The main source for the statistics continues to be a quarterly enquiry into capital expenditure addressed to a panel of financial companies actively engaged in finance leasing. Figures are also collected from monetary sector

institutions. As the panel does not include all leasing companies outside the monetary sector, the figures are grossed up to take account of expenditure by non-reporters.

The quarterly figures presented in the table are not currently published elsewhere, but constitute the basic material for the series of net capital expenditure by the finance leasing industry, not analysed by asset type or by lessee sector, which is published by the Department of Trade and Industry in *British Business* within regular articles devoted to the results of successive quarterly capital expenditure surveys. That series is presented at constant prices (recently rebased on 1985) and seasonally adjusted. It also omits expenditure on ships leased to the UK shipping industry.

Finance lessors' capital expenditure on assets for leasing out: annual and quarterly estimates

£ millions, current prices

(a) Includes leasing of ships and aircraft to overseas residents.

(b) Largely finance leasing for which information about lessees has not been reported, but including a small amount of other forms of leasing carried out by the reporting institutions.

(c) Up to 1982 includes all expenditure reported by monetary sector institutions.
