Money and Credit: February 2016

Part one: Broad money and credit

Aggregate money and credit

UK broad money, $M4^{ex}$, is defined as M4 excluding intermediate other financial corporations (OFCs). $M4^{ex}$ increased by £10.0 billion in February, compared to the average monthly increase of £6.4 billion over the previous six months. The three-month annualised and twelve-month growth rates were 5.0% and 4.5% respectively.

$M4L^{ex}$ is defined as M4 lending excluding intermediate OFCs. $M4L^{ex}$ increased by £19.9 billion in February, compared to the average monthly increase of £6.8 billion over the previous six months. The three-month annualised and twelve-month growth rates were 8.0% and 4.8% respectively.

About these data:

Monetary financial institutions (MFIs) are defined as UK-resident banks and building societies.

Data presented in Tables A to D and Charts 1 to 4 relate to UK sterling measures of broad money (M4^{ex}) and credit (M4L^{ex}). The credit measure excludes the effects of any securitisations of lending by banks and building societies: this means that any lending that is securitised remains included in this definition.

Broad money comprises cash (sterling only) and holdings of sterling deposits and similar short-term sterling liabilities including repo positions. Credit comprises sterling borrowing from UK MFIs, including loans, overdrafts, issuance of securities, reverse repos and similar financial instruments.

In all tables, the 'changes' data are measured after the removal of significant series break effects that may be present in the amounts outstanding measures. Growth rates are calculated using 'changes' data.

Further information can be found in the explanatory notes, available at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/m4_sectoral.aspx.

If you have any queries with regards to these data please email srdd_ms@bankofengland.co.uk or call 020 7601 5361.

Aggregate M4 and M4 lending

Table E provides summary data for the aggregate broad money and credit data on definitions that do not exclude intermediate OFCs, i.e. they include all OFCs.

Deposits and loans of financial and non-financial businesses, by industry

Deposits from financial and non-financial businesses increased by £13.7 billion in February, compared to the average monthly decrease of £6.3 billion over the previous six months. The increase was mainly in deposits from businesses in the financial services industry (£17.4 billion) partially offset by a fall in deposits from businesses in the mining and quarrying industry (-£10.0 billion). The twelve-month growth rate was -0.1%.

Loans to financial and non-financial businesses increased by £33.0 billion in February, compared to the average monthly decrease of £3.7 billion over the previous six months. This increase is mainly in loans to businesses in the financial services industry (£29.7 billion). The twelve-month growth rate was 0.8%.

(a) The SIC codes associated with the series shown in this table are available at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/industrial.aspx.

About these data:

Monetary financial institutions (MFIs) are defined as UK-resident banks and building societies.

Data presented in Table F relate to deposits placed at MFIs by all UK industries and loans by MFIs to all UK industries. Data cover loans and deposits in both sterling and foreign currency, expressed in sterling.

Deposits and loans are classified according to the National Accounts standard industrial classification.

Table F has a broader scope compared to Tables A to D. It includes all currencies and also covers public sector institutions and enterprises, and intermediate financial corporations.

Further information can be found in the explanatory notes, available at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/industrial.aspx.

If you have any queries with regards to these data please email srdd_ms@bankofengland.co.uk or call 020 7601 5361.

Money and Credit: February 2016

Part two: Lending to individuals

Total lending to individuals

Total lending to individuals increased by £4.9 billion in February, in line with the average over the previous six months. The three-month annualised and twelve-month growth rates were 4.1% and 3.7% respectively.

Table G: Lending to individuals

Feb	1,465.1	4.9	0.3	4.1	3.7

(a) For the equivalent series not seasonally adjusted, see *Bankstats* Table [A5.2](#), with the exception of the three-month annualised growth rate, which is available on the Statistical Interactive Database as code [BZ2H](#).

Lending secured on dwellings

Lending secured on dwellings increased by £3.6 billion in February, in line with the average over the previous six months. The three-month annualised and twelve-month growth rates were 3.4% and 3.0% respectively. Gross lending secured on dwellings was £21.0 billion and repayments were £17.1 billion.

Table H: Lending secured on dwellings

(b) The changes series will not necessarily equal gross lending minus repayments, due to the seasonal adjustment methodology used and small differences in coverage between the three series.

Chart 7: Lending secured on dwellings

Seasonally adjusted

Mortgage approvals

The number of loan approvals for house purchase was 73,871 in February, compared to the average of 70,991 over the previous six months. The number of approvals for remortgaging was 40,749, broadly in line with the average over the previous six months. The number of approvals for other purposes was 12,514, compared to the average of 12,103 over the previous six months.

About these data:

Monetary financial institutions (MFIs) are defined as UK-resident banks and building societies.

Data presented in Tables G to K relate to sterling lending to individuals by MFIs and by other lenders (including non-MFI consumer credit grantors, specialist mortgage lenders, retailers, central and local government, public corporations and insurance companies).

Lending to individuals is split between lending secured on dwellings (mortgages) and consumer credit. Consumer credit is further split between credit card debt and other loans and advances. Student loans are excluded from the definitions in this statistical release.

The data presented in Part two are not directly comparable to the data on M4 lending to households presented in Part one. Firstly, in Part one households are defined to include individuals, unincorporated businesses and non-profit institutions serving households. Secondly, data in Part two relate to a broader definition of lenders as they include other (non-MFI) lenders, which are excluded from the M4 lending definitions. The tables also provide additional information on flows of new lending and repayments, and on mortgage approvals.

In all tables, the 'changes' data are measured after the removal of significant series break effects that may be present in the amounts outstanding measures. Growth rates are calculated using 'changes' data.

There is some overlap in the data covered in this release with those in the joint Bank of England and FCA [release](#) on Mortgage Lenders and Administrators Statistics. For further details see *Bankstats*, November 2014, 'Residential mortgages: a comparison of the Bank of England's published statistical and regulatory data collections', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1nov14.pdf.

Further information on lending to individuals data can be found in the explanatory notes, available at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/ltot.aspx.

If you have any queries with regards to these data please email srdd_ms@bankofengland.co.uk or call 020 7601 5361.

Money and Credit: February 2016

Part three: Lending to businesses

PNFCs' financing

Table L outlines a wider measure of PNFCs' financing from MFIs and capital markets. PNFCs' net finance raised from MFIs and capital markets was £5.0 billion in February, compared to an average of £2.6 billion raised over the previous six months.

Table L: Net finance raised by PNFCs

All currencies, £ billions

Seasonally adjusted

(a) Owing to the seasonal adjustment methodology, this series may not equal the sum of its components.

(b) This series has not been seasonally adjusted as, after examination, it was found not to be significantly seasonal. This series is reviewed for seasonality regularly.

(c) An equivalent series not seasonally adjusted, is available on the IADB as code [B6NT](#).

(a) Finance raised by PNFCs from monetary financial institutions and capital markets. Data cover funds raised in both sterling and foreign currency, expressed in sterling. Bonds, equity and commercial paper are non seasonal.

(b) Owing to the seasonal adjustment methodology, this series may not equal the sum of its components.

Loans to non-financial businesses

Loans to non-financial businesses increased by £3.3 billion in February, compared to an average monthly increase of £0.9 billion over the previous six months. The twelve-month growth rate was 1.4%. Within this, loans to small and medium-sized enterprises (SMEs) increased by £0.7 billion, compared to an average monthly increase of £0.2 billion over the previous six months. The twelve-month growth rate was 1.5%.

(a) Large businesses are those with annual debit account turnover on the main business account of £25 million or over.

(b) SMEs are those businesses with annual debit account turnover on the main business account less than £25 million.

Gross lending to and repayments by non-financial businesses (excluding overdrafts)

Gross lending (excluding overdrafts) to non-financial businesses was £17.9 billion in February. Within this, gross lending to large businesses was £13.1 billion, whilst gross lending to SMEs was £4.8 billion. Repayments by non-financial businesses were £14.7 billion in February. Within this, repayments by large businesses were £10.4 billion, whilst repayments by SMEs were £4.2 billion. Net lending - defined as gross lending less repayments - to large businesses was £2.6 billion in February. Net lending to SMEs was £0.6 billion.

(a) Large businesses are those with annual debit account turnover on the main business account of £25 million or over.

(b) SMEs are those businesses with annual debit account turnover on the main business account less than £25 million.

(c) Net lending is defined as gross lending minus repayments.

About these data:

Monetary financial institutions (MFIs) are defined as UK-resident banks and building societies.

Data presented in Table L relate to net flows of lending to UK private non-financial corporations (PNFCs) in the form of borrowing from MFIs and issuance of securities by PNFCs (such as equity, bonds and commercial paper) on capital markets, to all investors, in all currencies. There may be some flows of global finance to UK PNFCs not captured by these data. Further information can be found in the Capital Issuance release, available at www.bankofengland.co.uk/statistics/Pages/calendar/default.aspx.

Tables M and N relate to UK MFIs lending to UK non-financial businesses, in all currencies. This is a broader coverage of borrowers than Tables A and C, because this definition of businesses also includes public sector enterprises and unincorporated businesses, but it relates to a narrower definition of lending, because capital market issuance of debt securities is excluded. There is an 'of which' split relating to small and medium-sized enterprises (SMEs). Gross lending data presented in Table N relate to gross loans excluding overdrafts.

Further information can be found in the explanatory notes, available at

www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/loans_to_non-financial_businesses.aspx.

If you have any queries with regards to these data please email srdd_ms@bankofengland.co.uk or call 020 7601 5361.

Technical notes

Background material on the data in this statistical release is provided in the 'About these data' sections in each Part. These notes cover more technical material.

General

- 1 The Statistical Interactive Database, IADB, (www.bankofengland.co.uk/boeapps/iadb/NewIntermed.asp) provides long runs of statistical data with comprehensive search options and the ability to download these in a variety of formats. The series codes are listed in the tables in this release. Tables providing more detailed breakdowns of data, including quarterly data, are also available in Bank of England *Bankstats* (*Monetary & Financial Statistics*) (www.bankofengland.co.uk/statistics/Pages/bankstats/default.aspx).
- 2 Further information on the definition of 'changes', the treatment of break effects and the calculation of growth rates can be found at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/Changes_flows_growth_rates.aspx. Movements in amounts outstanding can reflect breaks in data series as well as underlying flows. Users requiring data for amounts outstanding series on a break-adjusted basis should refer to www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/Break_adjusted_levels_data.aspx. For changes and growth rates data, users are recommended to refer directly to the appropriate series or data tables.
- 3 Monetary Financial Institutions (MFIs) are defined as UK-resident banks and building societies. Money and credit data, including the industrial analysis of deposits and lending, exclude inter-MFI deposits and lending.
- 4 All tables in this statistical release have UK coverage, meaning that they relate to deposits of, or credit to, UK residents only. Loans include MFIs' loans and advances including under reverse repos, to the non-MFI sector. Deposits includes MFIs' liabilities under repo positions.
- 5 Tables showing data for totals and components of totals may be subject to rounding effects.
- 6 When the 'direct method' of seasonal adjustment is used for a totals series, the seasonally adjusted total need not correspond to the sum of its seasonally adjusted components. Under the alternative 'indirect' method, however, this equality is preserved. The choice of application of the 'direct' or 'indirect' method depends on an assessment of the seasonal adjustment criteria in any particular case. For more details please see Annex A, *Bankstats*, September 2010, 'Seasonal adjustment of quarterly M4 excluding intermediate OFCs (M4ex)', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1sep10.pdf.
- 7 Following a change in the compilation and descriptions of some credit series, data for M4 lending (M4L) and M4 lending excluding the effects of securitisations and loan transfers (M4Lx) are identical for January 2010 data onwards. From the publication of April 2015 data, only one of these series - M4Lx (renamed as M4L) – continued as part of our regular publications. For more details see *Bankstats*, April 2015, 'Changes to the treatment of loan transfers and lending to housing associations', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1apr15.pdf.

Part one

- 8 In Tables A and D, intermediate other financial corporations (OFCs) are defined as non-bank credit grantors; mortgage and housing credit corporations; bank holding companies; securitisation special purpose vehicles and other activities auxiliary to financial intermediation. Sterling deposits from and sterling loans and advances to 'other financial intermediaries' undertaken with banks and building societies in their own financial group are also included in intermediate OFCs. Banks' and building societies' holdings of securities issued by their own securitisation vehicles are also included in intermediate OFCs.
- 9 In Table B, households are defined as individuals, unincorporated businesses other than unlimited liability partnerships (i.e. sole traders) and non-profit institutions serving households (e.g. charities and universities).
- 10 M4 excluding intermediate OFCs is calculated as households' M4 (seasonally adjusted) plus private non-financial corporations' (PNFCs') M4 (seasonally adjusted) plus non-intermediate OFCs M4 (seasonally adjusted). For more details see www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/m4adjusted.aspx.
M4L excluding lending to intermediate OFCs is calculated as household M4L (seasonally adjusted) plus PNFC M4L (seasonally adjusted) plus non-intermediate OFCs' M4L, (not seasonally adjusted). For more details see www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/m4lxadjusted.aspx. Following a review of the seasonal adjustment method for non-intermediate OFCs, changes were made to the seasonally adjusted measures of M4 and M4 lending. The changes are detailed in *Bankstats*, October 2013, 'Modifications to the seasonally adjusted measures of M4 and M4 lending excluding intermediate OFCs', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1oct13.pdf.

- 11 In Table F, the definition of the industry categories follows the Standard Industrial Classification (SIC 2007) and is consistent with the broad industry categories employed by the Office for National Statistics (ONS). Within 'business services', real estate is defined as the 'buying, selling and renting of own or leased real estate' plus 'real estate activities on a fee or contract basis', corresponding to SIC codes 68.1, 68.2 and 68.3. 'Government and other services' comprise ONS divisions O to T (e.g. as published in the ONS Blue Book 2012), which include total government, health and education, and 'other services'. This table excludes intra-MFI sector balances. More detailed industry-level breakdowns of deposits and loans are provided in *Bankstats* tables section C, at www.bankofengland.co.uk/statistics/Pages/bankstats/current/default.aspx. For more information on the data classifications, see Parts IV.1 and IV.2 of the Classification of Accounts Guide available at www.bankofengland.co.uk/statistics/Pages/reporters/default.aspx.

Part two

- 12 In Table I, approvals secured on dwellings are measured net of cancellations. Additional monthly gross approvals and cancellations data are available on the IADB. See Technical Note 1 for more details.
- 13 The consumer credit data in Tables J and K include input from the Office for National Statistics. Historical data and additional data not presented here can be accessed from www.ons.gov.uk/ons/index.html. Further information on breaks and valuation in consumer credit data can be found at www.bankofengland.co.uk/statistics/Pages/iadb/notesiadb/ltot.aspx.
- 14 Student loans are excluded from the measures of consumer credit presented in this statistical release. Data on UK student loans are published on an annual basis by the Student Loans Company, see www.slc.co.uk/statistics.aspx. More information is provided in *Bankstats*, July 2012, 'A new measure of consumer credit', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1jul12.pdf.
- 15 The definition of lending to individuals presented in this statistical release does not include lending to housing associations. For further details see *Bankstats*, April 2015, 'Changes to the treatment of loan transfers and lending to housing associations', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1apr15.pdf.

Part three

- 16 Table L shows available data for finance raised by UK PNFCs. The scope of this table includes sterling and foreign currency loans from MFIs, and finance raised through the issuance of sterling and foreign currency equity, bonds and commercial paper in capital markets. Certain sources of finance of PNFCs will be outside the scope of available data for this table, for example, loans advanced by non-UK resident banks or privately raised capital.
- 17 Tables M and N cover MFIs' loans to UK non-financial businesses split by business size. The definition of 'non-financial businesses' is consistent with the non-financial industry sectors presented in Table F. Gross lending is defined as loans and advances (including claims made under sale and repurchase agreements) and finance leases granted to UK businesses. More information on the data sources underlying these tables is provided in *Bankstats*, March 2012, 'Lending to Businesses – a new data source', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art2mar12.pdf.
- 18 A broad description of the lending to businesses measures in Tables C, L, and M and N and the main differences between them is provided in *Bankstats*, August 2014, 'Measures of lending to UK businesses', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art1sep14.pdf. A summary of the known available data on measures of lending to UK small and medium-sized enterprises is provided in *Bankstats*, January 2015, 'Data on lending to UK SMEs', available at www.bankofengland.co.uk/statistics/Documents/ms/articles/art2jan15.pdf.
